*It is the moment when my ship has reached its long-desired port. With the very essence of dedication, hard work and perseverance, Ph.D. is a voyage taken to reach one's competent self. The travel through the constant gusts and lulls would have not been possible without the people who adjusted my ship, and finding the favorable winds would have not been possible without the people who navigated my sail towards the destination. I take the opportunity to express my heartfelt gratitude to everyone who contributed in my journey and made it a lifetime memorable experience.*

*Becoming a part of the famous establishment, Department of Microbiology and Biotechnology Centre (DMBC) was possible only after Prof. Sanjaykumar S. Ingle accepted me as his Ph.D. student. First and foremost my deepest gratitude and my sincere appreciation to him for giving me the opportunity to work under his auspice. His constant guidance, support and encouragement have played a vital role in the studies. The patient attitude he has, had built a stress-free environment where I worked to improve my weaker areas. His encouragement for independent thinking and his unwavering belief in me, nurtured a confident independent researcher in me. His prompt treasured suggestions were influential to shape my work throughout the journey.*
