# PREFACE

The material of the present thesis is based on the
researches which I have been carrying on since April, 1973
at the Maharaja Sayajirao University of Baroda, Baroda,on
'A study of the absolute convergence of lacunary Fourier
series' under the able guidance and kind supervision of
Professor V. M. Shah, M. Sc., Ph.D., Head, Department of
Mathematics, Faculty of Science, The Maharaja Sayajirao
University of Baroda.

The present thesis contains six chapters. The first
half of the results of Chapters II and V was presented at
the 41st annual conference of the Indian Mathematical Society,
held at the Indian Institute of Technology, Kanpur,in December,
1975. The second half of the results of Chapter II is accepted
for publication in the form of paper in the Journal of
Mathematical Analysis and Applications, U. S. A.. The first
half of the results of Chapter III is published in the form
of a paper in the Journal of the London Mathematical Society
(2), 14(1976), pp.113-119. The rest of the results of the
present thesis are under communication for publication.

It is with a great sense of gratitude that I take
this opportunity to acknowledge my indebtness to Professor
V. M. Shah for his valuable guidance and supervision which

I have received so generously from him during the course
of this work. I also thank the University Grants Commission
for awarding me a Research Fellowship which enabled me to
carry on this research work.

October 29,1977.

J.R.Patel
