P R E F A C E

The material of the present thesis is based on
the researches which I have been carrying on since July,
1976 at the Maharaja Sayajirao University of Baroda,
Baroda, on ''A Study of the absolute convergence and the
absolute summability of lacunary Fourier series'' under
the able guidance and supervision of Professor V. M. Shah,
M. Sc., Ph. D., F. N. A. Sc., Head, Department of
Mathematics, Faculty of Science, The Maharaja Sayajirao
University of Baroda.

The present thesis contains six chapters. A part
of Chapter VI is published in the form of a paper in the
Journal of the M. S. University of Baroda, Volume XXIX,
Science No.3 (1980), pp. 49-56. One result of Chapter VI
was presented at the 69th Session of the Indian Science
Congress Association held at Mysore in December 1981. The
result of Chapter III is accepted for publication in the
Journal of the M. S. University of Baroda, Volume XXX,
Science No.3 (1981). A part of Chapter II has been accepted

for presenting at the 53rd annual conference of the National Academy of Sciences, India, to be held at Goa in October 1983. The rest of the results of the present thesis are under communication for publication.

It is with a great sense of gratitude that I take this opportunity of acknowledging my indebtedness to Professor V. M. Shah for his valuable guidance and help which I have received so generously from him during the course of this work. But for his continuous encouragement, I am sure that this thesis would not have seen the light of the day.

I am highly thankful to Dr. J. R. Patadia for continuous and fruitful discussions with him during the preparation of this thesis. Thanks are also due to Dr. V. D. Pathak for several useful discussions during this work.

BARODA,
October 20 ,1983.

(N. V. PATEL)
