<b>1 Introduction</b>	<b>1</b>
1.1 The Mittag-Leffler function . . . . .	1
1.2 Definitions and formulas . . . . .	3
1.2.1 Ordinary forms . . . . .	3
1.2.2 $q$ -Analogues . . . . .	6
1.3 Generalized hypergeometric function and basic hypergeometric function . . . . .	9
1.4 Integral transforms . . . . .	11
1.5 $q$ -Integral transforms . . . . .	12
1.6 Fractional integrals and derivatives . . . . .	13
1.7 Fractional $q$ -integrals and $q$ -derivatives . . . . .	15
1.8 Inverse series relation . . . . .	17
<b>2 Generalized Mittag-Leffler function</b>	<b>18</b>
2.1 Introduction . . . . .	18
2.2 Main results . . . . .	20
2.2.1 Convergence . . . . .	21
2.2.2 Differential equation . . . . .	25
2.2.3 Eigen function property . . . . .	27
2.2.4 Mellin-Barnes integral representation . . . . .	29

2.2.5	Mixed relations . . . . .	30
2.2.5.1	Particular cases . . . . .	35
2.2.6	Integral formula . . . . .	35
2.2.6.1	Particular cases . . . . .	36
2.2.7	Double series representation . . . . .	37
2.3	Other results . . . . .	39
2.3.1	Differentiation . . . . .	39
2.3.2	Integral representations . . . . .	40
2.4	Integral transforms . . . . .	43
2.4.1	The Euler (Beta) transform . . . . .	43
2.4.2	The Laplace transform . . . . .	44
2.4.3	The Whittaker transform . . . . .	45
2.4.4	The Mellin transform . . . . .	46
2.5	Relationship with certain known special functions . . . . .	46
2.5.1	Generalized hypergeometric function . . . . .	47
2.5.2	Generalized Konhauser polynomial . . . . .	47
2.5.3	Fox H- function . . . . .	48
2.5.4	Wright function . . . . .	48
2.6	Special cases . . . . .	48
2.7	Bessel function family . . . . .	49
2.7.1	Convergence . . . . .	50
2.7.2	Differential equation . . . . .	52
2.7.3	Eigen function property . . . . .	54
2.7.4	Mellin - Barnes integral representation . . . . .	56
2.7.5	Mixed relations . . . . .	57
2.7.6	Double series representation . . . . .	57
2.8	Special cases . . . . .	58
<b>3</b>	<b>Generalized <math>q</math>-Mittag-Leffler function</b>	<b>60</b>
3.1	Introduction . . . . .	60
3.2	Main results . . . . .	63
3.2.1	Convergence . . . . .	63
3.2.2	Contour integral . . . . .	66
3.2.3	Difference equation . . . . .	67
3.2.4	Eigen function property . . . . .	71
3.2.5	Mixed relations . . . . .	74
3.2.6	Finite summation formulas . . . . .	80
3.2.7	Double series representation . . . . .	84
3.3	Other results . . . . .	85
3.3.1	Differentiation . . . . .	85
3.3.2	Integral representations . . . . .	87
3.4	Special cases . . . . .	89
3.5	$q$ -Bessel function family . . . . .	90
3.5.1	Convergence . . . . .	92

---

3.5.2	Contour integral . . . . .	92
3.5.3	Difference equation . . . . .	93
3.5.4	Mixed relations . . . . .	96
3.5.5	Finite summation formulas . . . . .	97
3.5.6	Double series representation . . . . .	99
3.6	Special cases . . . . .	99
<b>4</b>	<b>Fractional integration and differentiation</b>	<b>101</b>
4.1	Introduction . . . . .	101
4.2	Main results . . . . .	101
4.2.1	Fractional operators associated with $E_{\alpha,\beta,\lambda,\mu}^{\gamma,\delta}(z; s, r)$ . . . . .	101
4.2.2	Gauss multiplication type formula of $E_{\alpha,\beta,\lambda,\mu}^{\gamma,\delta}(z)$ . . . . .	110
4.2.3	Fractional differential equations based upon the Hilfer derivative operator . . . . .	110
4.2.4	Integral transforms of $(\mathcal{E}_{\alpha,\beta,\lambda,\mu,\omega; 0_+}^{\gamma,\delta} f)(x)$ . . . . .	116
4.2.5	Properties of $E_t(c, \nu, \gamma, \delta, \lambda, \mu)$ and $E_t(c, -\eta, \gamma, \delta, \lambda, \mu)$ . . . . .	120
<b>5</b>	<b>Fractional <math>q</math>-integration and <math>q</math>-differentiation</b>	<b>125</b>
5.1	Introduction . . . . .	125
5.2	Main results for $E_{\alpha,\beta,\lambda,\mu}^{\gamma,\delta}(z; s, r q)$ . . . . .	126
5.2.1	Fractional $q$ -operators . . . . .	126
5.2.2	$q$ -Gauss multiplication type formula . . . . .	133
5.2.3	Fractional $q$ -differential equations involving the $q$ -analogue of Hilfer derivative operator . . . . .	134
5.2.4	Properties of $E_t(c, \nu, \gamma, \delta, \lambda, \mu q)$ and $E_t(c, -\eta, \gamma, \delta, \lambda, \mu q)$ . . . . .	142
5.3	Main results for $e_{\alpha,\beta,\lambda,\mu}^{\gamma,\delta}(z; s, r q)$ . . . . .	146
5.3.1	Fractional $q$ -operators . . . . .	146
5.3.2	$q$ -Gauss multiplication type formula . . . . .	147
5.3.3	Fractional $q$ -differential equations involving the $q$ -analogue of Hilfer derivative operator . . . . .	147
5.3.4	Properties of $e_t(c, \nu, \gamma, \delta, \lambda, \mu q)$ and $e_t(c, -\eta, \gamma, \delta, \lambda, \mu q)$ . . . . .	149
<b>6</b>	<b>Inequalities involving generalized Konhauser polynomial</b>	<b>151</b>
6.1	Introduction . . . . .	151
6.2	Generalized Konhauser polynomial . . . . .	152
6.3	Differential equation . . . . .	153
6.4	Inverse series and inequality relations . . . . .	155
6.5	Some inequalities . . . . .	162
6.5.1	Special cases-inequalities . . . . .	165
6.5.2	Special cases - Generating function relations . . . . .	166
6.6	Finite series inequalities . . . . .	167
6.6.1	Special cases . . . . .	169
6.7	Mixed relation . . . . .	170
6.8	Integral representations . . . . .	170
6.8.1	Special cases . . . . .	172

6.9	Fractional operators . . . . .	173
6.9.1	Fractional integral operator . . . . .	173
6.9.1.1	Special cases . . . . .	174
6.9.2	Fractional differential operator . . . . .	174
6.9.2.1	Special cases . . . . .	175
6.10	Integral transforms . . . . .	175
6.10.1	Laplace transform: . . . . .	175
6.10.2	Euler(Beta) transform: . . . . .	176
<b>7</b>	<b>Inequalities involving generalized <math>q</math>-Konhauser polynomial</b>	<b>178</b>
7.1	Introduction . . . . .	178
7.2	Generalized $q$ -Konhauser polynomial . . . . .	179
7.3	Difference equations . . . . .	183
7.4	Inverse series and inequality relations . . . . .	187
7.5	Some inequalities . . . . .	197
7.5.1	Special cases - Generating function relations . . . . .	199
7.5.2	Special cases-Inequalities . . . . .	199
7.6	Finite $q$ -series inequalities . . . . .	200
7.6.1	Special cases . . . . .	207
7.7	Mixed relations . . . . .	208
7.8	Integral representations . . . . .	210
7.8.1	Special cases . . . . .	212
7.9	Fractional $q$ -operators . . . . .	212
7.9.1	Fractional $q$ -integral operator . . . . .	212
7.9.1.1	Special cases . . . . .	215
7.9.2	Fractional $q$ -differential operators . . . . .	215
7.9.2.1	Special cases . . . . .	217
7.10	$q$ -Integral transforms . . . . .	217
7.10.1	Euler(Beta) transform: . . . . .	217
7.10.1.1	Special cases . . . . .	219
7.10.2	Laplace transform: . . . . .	219
7.10.2.1	Special cases . . . . .	220
