

Acknowledgement

The journey of Ph.D. has been long and finally the time has come to wind up. Looking back, reminds me all those people who have played significant role in achieving the goal. Without them, achieving success seems to be an impossible task. My distinctive words of thanks goes to Department of Microbiology.

My hearty gratitude to my research guide Prof. Anuradha Nerurkar. She has been one of the very strong pillar who supported me to her full strength, despite of all the odds. Her timely advice, encouragement, inspiration and continuous help has helped me to achieve important milestones of my Ph.D. as well as personal life. I am really glad to be associated with a person like her.

I would like to extend my heart-felt gratitude to Prof. G. Archana, Head of Department, under whose guidance I was introduced to research in this field of microbiology, as she had guided my M.Sc. dissertation work. My sincere gratitude to former heads of the department Prof. Anjana Desai and Prof. Bagchi. I am thankful to Prof. Ingle, Dr. Vyas, Dr. Baxi, Prof. Manjrekar, Prof. Nair, whose comments and suggestions during annual presentations have helped me to ponder on many experiments and conclusions. I am also thankful to Prof. Ratnaprabhakar, Prof. Naresh. & Dr. Jayshree, the faculties of Biochemistry Department for their valuable suggestions and welcoming nature.

My Ph.D. work would have been possible to finish without the valuable support, guidance and inputs of my friends and colleagues. I am thankful to my lab members Gosai, Sneha, Siddhi, Reshma, Ashtaad for their strong support and suggestions. I owe a lot to Gosai, Sneha and Siddhi as they help me to improve constantly by being my strong critics. Their company have made the long journey of my Ph.D. filled with cherishable moments. A major and notable thanks to other friends without whom this work would not have been possible are Jaswinder, Vihang, Abhi, Anuja, Hashim, Akhil, Divya, Anand, Juliya, Roshni, Mihir. I am thankful to all the research scholars of my department for helping me in one or the other way. I am thankful to Fatema dholkawala, the only student stayed with me during her entire dissertation work, Anindya for his valuable suggestions on my experimental hitches and Isha and Sonam for providing the helping hand.

I am thankful to Dr. Anoop Markende, Dr. Priya, Dr. Harish, Dr. Ruchi, Dr. Murlí, Dr. Srinandan, Dr. akolkar for sharing their knowledge and experience has helped me in my research in many ways. My dedicated thanks to late. Dr. Sumant Choubey who had introduced me to the research field. I owe him for initiating the scientific aptitude in me. The long discussions and conversations with him shall always be remembered.

My special regards to few wonderful friends who despite of quite hectic workload, have never overlooked my cry for

help. Priyanka, Megha, Indrajeet, Rajesh and Khyati have contributed to my work significantly despite the long distance. Sumit and Ashish for their support and amicable nature.

I am obliged to Shirish sir for all the management and insights needed for the documentation work. Nilesh sir, Verghese sir, Mandvekar sir, Seema ma'am, Aparna ma'am and other non-teaching staff for being available and providing glassware, microbial cultures and other help as and when needed.

My sincere gratitude to the eminent scientists who have readily and easily provided me with important scientific support, just on a single email. Xoo BXO43 provided by Dr. Sonti from Centre for Cellular & Molecular Biology (CCMB), Hyderabad. The pSS122 vector was a gift kindly provided by Dr. Venturi from International Centre for Genetic Engineering and Biotechnology, Trieste, Italy. The rice variety was a kind gift by Dr. Pun, officer in-charge, Regional Rainfed Lowland Rice Research Station, Gerua, Hajo, Assam. The plants for isolation experiments were collected from fields of Main Rice Research Station, Anand Agricultural University Navagam, Gujarat with the help of Dr. Sharad and from University of Agricultural Sciences, Bangalore at Gandhi Krishi Vigyan Kendra (GKVK), natural rice field, Gokarna, Karnataka with the help of Dr. Malali Gowda. I am thankful to UGC for providing me with fellowship which has been of great help.

A special mention of thanks to the most valuable and integral people without whom finishing this task would have just not been possible, to my Family! I am utterly thankful to God for such people in my life. My dad, mom and sis have been the strongest pillars and am grateful for their endless support and patience. I am lucky to have similar extended family as my in-laws, who support and appreciate my efforts. To my husband Soam Dey for his encouragement and care. All my cousins for their care and understanding. Thank you.
