LIST OF TABLES	i
LIST OF FIGURES	ii-v
LIST OF ABBREVIATIONS	vi-vii
ABSTRACT	viii-ix
REVIEW OF LITERATURE	1-25
1. Rice blast disease	
2. Rice blast fungus: <i>Magnaporthe oryzae</i>	
3. Infection cycle of <i>M. oryzae</i>	
4. <i>Magnaporthe oryzae</i> as a model organism	
5. Molecular approach to study gene function: Functional genomics	
6. Reverse genetics approach	
7. Forward genetics approach	
PRESENT STUDY: FUNCTIONAL CHARACTERISATION OF	
SKP1 IN RICE BLAST FUNGUS (<i>Magnaporthe oryzae</i>)	26
1. INTRODUCTION	27-33
2. MATERIALS AND METHODS	34-63
2.1 Media and culture condition	
2.2 Buffers	
2.3 Stock Solutions	
2.4 Bacterial strains	
2.5 Yeast strains	
2.6 Fungal culture	
2.7 Competent cell preparation and transformation of <i>E. coli</i> with plasmid DNA	
2.8 Transformation of <i>S. pombe</i> with plasmid DNA	
2.9 Protoplast transformation of <i>M. oryzae</i> B157	
2.10 <i>Agrobacterium tumefaciens</i> mediated transformation of <i>M. oryzae</i> B 157	
2.11 Isolation of plasmid DNA	
2.12 Nucleic acid manipulations	
2.13 Bioinformatics analysis of <i>MoSKP1</i>	

- 2.14 PCR amplification and cloning of *MoSKP1* gene
- 2.15 Generation of *MoSKP1* RNAi, antisense, disruption and overexpression construct
- 2.16 Triparental mating and mobilisation of antisense construct in *Agrobacterium*
- 2.17 Cloning and heterologous expression of MoSkp1 protein in *E. coli* BL21DE3
- 2.18 Purification of *MoSkp1* and raising of polyclonal antibodies
- 2.19 PCR and southern blot analysis
- 2.20 Protein extraction, western blot hybridisation and MoSkp1 protein estimation
- 2.21 Total RNA isolation from transformants and quantitative analysis
- 2.22 Small RNA enrichment, polyacrylamide gel electrophoresis for RNA and detection of siRNA in *MoSKP1* transformants
- 2.23 Interspecific gene complementation study of *MoSKP1* in *S. pombe*
- 2.24 Cell wall and nuclear staining of *S. pombe* and rice blast fungus *M. oryzae*
- 2.25 Immunolocalisation of MoSkp1 in *M. oryzae* B157
- 2.26 Cell wall integrity assay
- 2.27 Infection assay, sporulation assay and appressorial assay of *MoSKP1* transformants
- 2.28 Hydroxyurea (HU) treatment of B157 strain and cell cycle study
- 2.29 Ubiquitinated protein enrichment assay and western blot analysis
- 2.30 Phosphorylation and dephosphorylation assay of MoSkp1 protein
- 2.31 Pull down assay and yeast two hybrid assay
- 2.32 Two dimensional polyacrylamide gel electrophoresis analysis of MoSkp1 RNAi transformants

3. RESULTS

64-129

- 3.1 Bioinformatics analysis for *MoSKP1*
- 3.2 Cloning of *MoSkp1* and generation of anti-sense construct
- 3.3 Mobilisation of antisense construct in *Agrobacterium* by Triparental mating
- 3.4 Fungal transformation by ATMT
- 3.5 Phenotypic characterization of putative antisense fungal transformants
- 3.6 A dual selection based targeted gene replacement tool in *Magnaporthe oryzae* and development of *MoSKP1* disruption vector
- 3.7 Transformation of *M. oryzae* B157 strain using *MoSKP1* Disruption constructs
- 3.8 Development of RNAi and overexpression construct for *MoSKP1*

- 3.9 Protoplast transformation of B157 strain using *MoSKP1* RNAi and overexpression constructs
- 3.10 Screening of putative RNAi and overexpression transformant of *MoSKP1*
- 3.11 Interspecies gene complementation study of *MoSKP1*
- 3.12 Nuclear staining of complemented Fission yeast
- 3.13 Cell septum staining of complemented Fission yeast
- 3.14 Heterologous expression of *MoSKP1*, purification of MoSkp1 protein and antibody generation
- 3.15 Southern hybridization analysis of antisense and RNAi transformant
- 3.16 Detection of siRNA in RNAi transformants and antisense transformants
- 3.17 Quantitative analysis of *SKP1* transcript in antisense transformants and RNAi transformants
- 3.18 Ubiquitination enrichment assay of *MoSKP1* RNAi transformant
- 3.19 Western blot analysis of the MoSkp1 transformants
- 3.20 Infection assay and onion epidermis assay of MoSkp1 RNAi transformants
- 3.21 Localisation of MoSkp1 protein in wild type
- 3.22 Expression profiling of Skp1 protein in wild type *M. oryzae*
- 3.23 Sporulation assay and qPCR of various RNAi and antisense transformants
- 3.24 Appressorial assay and conidial septa formation assay
- 3.25 MoSkp1 overexpression transformants show enhanced appressoria development
- 3.26 Calcofluor staining and phenotypic study of RNAi transformant
- 3.27 Nuclear and chitin staining of RNAi transformants
- 3.28 Cell wall integrity assay
- 3.29 Interaction study of MoSkp1
- 3.30 Pull down analysis
- 3.31 Two dimensional protein analysis of MoSkp1-RNAi transformant
- 3.32 *in Vitro* phosphorylation and dephosphorylation assay of MoSkp1 protein
- 3.33 Hydroxyurea treatment of *M. oryzae* B157 strain

4. DISCUSSION

130-143

- 4.1 Ubiquitin mediated proteosomal degradation
- 4.2 Silencing of *MoSkp1* gene in *M. oryzae* B157
- 4.3 Phenotypic and molecular characterisation of MoSkp1 transformants
- 4.4 Role of MoSkp1 in growth, sporulation, development and pathogenesis
- 4.5 Molecular basis of appressorium development and pathogenicity

CONCLUSION	144
SUMMARY	145-147
APPENDIX	148-151
