

LIST OF FIGURES

Figure no.	Title	Page no.
1	Various blast lesions caused by <i>Magnaporthe oryzae</i> in the field	5
2	Scanning micrograph of conidia and appressoria	14
3	Infection cycle of <i>M. oryzae</i>	15
4	Signal transduction pathway in <i>M. oryzae</i>	16
5	Plasmid based gene silencing mechanism	22
6	Mechanism of ubiquitin mediated protein degradation	29
7	Multiple sequence alignment and domain search of MoSkp1 protein	67
8	Development of phylogenetic tree	68
9	PCR amplification of <i>MoSKP1</i>	71
10	Confirmation of <i>MoSKP1</i> antisense silencing constructs	72
11	Confirmation of <i>Agrobacterium</i> containing antisense construct and genetic transformation of <i>M. oryzae</i> B157	75
12	Appressorial assay for <i>MoSKP1</i> antisense transformants	77
13	Restriction digestion confirmation of MoSkp1-pGKO2 and disruption construct	79
14	Restriction digestion confirmation of <i>MoSKP1</i> RNAi construct	82

15	Fungal transformation with <i>MoSKP1</i> RNAi construct and screening of putative transformant by PCR	85
16	Fission yeast complementation with <i>MoSKP1</i>	88
17	Nuclear and septa staining of complemented <i>skp1 A7</i> fission yeast	89
18	Confirmation of pET30a-MoSkp1 clone and heterologous MoSkp1 protein expression	91
19	Southern blot analysis of <i>MoSKP1</i> RNAi and antisense transformant	96
20	siRNA detection of <i>MoSKP1</i> RNAi and antisense transformant	97
21	qPCR analysis of <i>MoSKP1</i> RNAi, antisense and overexpression transformants	98
22	Ubiquitination enrichment assay of <i>MoSKP1</i> RNAi transformant	99
23	Western blot analysis of <i>MoSKP1</i> RNAi and antisense transformant	101
24	Rice infection assay and onion epidermis assay	107
25	Sub cellular localization of MoSkp1 in <i>M. oryzae</i> B157	108
26	Expression profiling of MoSkp1 protein in <i>M. oryzae</i> B157	109
27	Sporulation assay in knockdown transformants	110
28	Abnormal conidia and reduction in appressoria development	111
29	Growth assay, sporulation and appressoria development	112

30	Defective septation and nuclear disorganization	114
31	Cell wall integrity assay	115
32	Yeast two hybrid assay for MoSkp1 and MoFrp1	119
33	Pull down assay using MoSkp1 protein	120
34	2D gel analysis of <i>MoSKP1</i> RNAi R6 transformant	124
35	Multiple Sequence alignment for phosphorylation sites detection in MoSkp1 protein	125
36	<i>In vitro</i> phosphorylation assay of MoSkp1 protein	126
37	Hydroxyurea treatment of <i>M. oryzae</i> B157	127
