

List of figures

SECTION I

Figure. 1. Blast infection in various parts of rice plants	7
Figure. 2. Infection cycle of <i>M. oryzae</i>	11
Figure. 3. Pheromone signalling pathway in yeast	14
Figure. 4. Signal transduction involved in infection related development	17
Figure. 5. Homolog for <i>S. cerevisiae</i> FAR1 in <i>M. oryzae</i>	44
Figure. 6. Phylogenetic tree of fungal yeast FAR1 orthologs	45
Figure. 7. Schematic representations of the structural organization	46
Figure. 8. PCR amplification of MFAR1 cDNA and PYES2 vector map	51
Figure. 9. Cloning of MFAR1 in PYES2 vector	52
Figure. 10. Mating assay of MFAR1 expressing <i>far1Δ</i> cells	53
Figure. 11. Shmoo morphology and cell cycle arrest	54
Figure. 12. Yeast complementation with MFAR1 without VWA domain	56
Figure. 13. Complementation of Δ STE5 mutant with MFAR1	59
Figure. 14. Schematic representation of split marker based gene deletion	63
Figure. 15. Split marker gene knockout	64
Figure. 16. Selection of hygromycin resistant transformants	65
Figure. 17. Confirmation of transformants for MFAR1 deletion	66
Figure. 18. Southern blot analysis	67
Figure. 19. Phenotypic characterization of mutants	69
Figure. 20. Δ <i>mfar1</i> shows reduction in conidia and early autolysis	70
Figure. 21. Appressoria and Infection assay of deletion mutants	72
Figure. 22. Complementation of Δ <i>mfar1</i> with MFAR1 gene	74

Figure.23. Determination of mating type of B157	77
Figure. 24. Schematic representation of mating assay in <i>M. oryzae</i>	78
Figure. 25. Fertility assay of B157 strain	79
Figure. 26. Determination of effect of MFAR1 deletion on fertility	81
Figure. 27. Asci and ascospore development	82
Figure. 28. PMK1 accumulation in <i>mfar1Δ</i> mutants	84
Figure. 29. Construction of MFAR1 localization plasmid	86
Figure. 30. Mfar1 is localized to nuclear region	87
Figure. 31. PMK1 and MFAR1 mRNA expression in presence of yeast cells	90
Figure. 32. α -factor induces expression of PMK1 and MFAR1	91
Figure. 33. Overexpression of MFAR1 in <i>M. oryzae</i>	94
Figure. 34. Characterization of MFAR1 overexpression transformants	95
Figure. 35. Appressoria formation in MFAR1 overexpression transformants	96
Figure. 36. Overexpression transformants show reduced virulence	97
Figure. 37. Cyclic AMP restores appressoria defect in overexpression transformants	99
Figure. 38. Δ <i>mfar1</i> mutant does not show appressorium inhibition by α -factor	101
Figure. 39. Effect of MFAR1 overexpression on expression of putative cyclins	104

SECTION II

Figure. 1. Effect of anacardic acid on conidial germination and mycelia growth	152
Figure. 2. Anacardic acid induces apoptosis like characteristics in <i>M. oryzae</i>	155
Figure. 3. Determination of caspase involvement and changes in MMP	158
Figure. 4. Antioxidant activity of anacardic acid.	160
Figure. 5. Domain arrangement and expression analysis of AIF1	163
Figure. 6. Infection assays of anacardic acid treated plants	165
