

LIST OF TABLES

| Sr. No. | Title | Page no. |
|---------|---|----------|
| 1 | Physical and chemical properties of Lindane and other HCH isomers | 8 |
| 2 | Toxic effects of Lindane on several organisms | 19 |
| 3 | Physical-chemical non-combustion technologies for HCH removal from soil | 22 |
| 4 | Natural attenuation processes that influence the persistence of POPs in soil | 25 |
| 5 | List of microorganisms reported for HCH biodegradation | 28 |
| 6 | HCH-degradative (<i>lin</i>) genes in HCH-degrading <i>Sphingomonads</i> | 37 |
| 7 | Bacterial isolates obtained from different soil samples in present study | 62 |
| 8 | Analysis of the carbohydrate utilization profiles by <i>Shewanella</i> sp. CGR-L1 and <i>Sphingobium</i> sp. CGR-L2 based on the GN2 Micro Plate | 67 |
| 9 | Identification of bacteria on the basis of their 16S rDNA sequence identity on NCBI (BLAST) obtained from enrichment culture of soil no. 4 | 75 |
| 10 | Accession numbers of the sequences deposited in the GenBank database (NCBI) | 76 |
| 11 | Primers used in the present study for the amplification of <i>lin</i> genes | 86 |
| 12 | Soil analysis and antibiotic sensitivity assay for the isolate CGR-L1 and CGR-L2 | 91 |
| 13 | PCR amplification of <i>lin</i> genes from isolate <i>Sphingobium</i> sp. CGR-L2 and its percentage sequence identity with <i>lin</i> genes of other well studied γ -HCH degraders | 140 |
