

## LIST OF FIGURES

- 3.1 Centroid shift and change of scale due to perturbation of the hamiltonian by a small operator  $\alpha K$  (univariate case).
- 3.2 Changes taking place in the conditional density defined on bivariate distribution due to perturbation of a hamiltonian by small operator  $\alpha K$ .
- 4.1 Ground state occupancies and effective S.P.E's for s-d shell nuclei.
- 4.2 Location of SNT centroids and ground state energies of target and final nuclei in the s-d shell region.
- 4.3 Effective single particle energies of f-p shell nuclei.
- 4.4 Ground state occupancies of upper f-p-g shell nuclei.
- 4.5 Locations of SNT centroids with respect to target and final nuclei in the f-p-g shell region.
