

List of Tables

Chapter 1

Table-1.1	Properties of different fuels	5
Table-1.2	DOE technical targets for on-board hydrogen storage	15
Table-1.3	State-of-the-art of technology for hydrogen storage media of 3 kg H ₂	16
Table-1.4	Summary of the reported hydrogen storage properties in carbon nano-tube	23

Chapter 2

Table-2.1	Properties of the alkali metal hydrides	50
Table-2.2	Properties of the alkaline earth metal hydride	50

Chapter 4

Table-4.1	Elemental mass (for 20 gm) of different Mg-V-Ni compositions	117
Table-4.2	The elemental compositions of the synthesized Mg-Ni-V compositions	119
Table-4.3	Crystallite parameters of different Mg-V-Ni compositions for 40 h milling time	123
Table-4.4	Crystallite parameters of MV2 composition for different milling times	123
Table-4.5	Elemental mass (for 20 gm) of different Mg-Pd-Ni compositions	139
Table-4.6	The elemental compositions of the synthesized Mg-Pd-Ni compositions	140
Table-4.7	Crystallite parameters of different Mg-Pd-Ni compositions for 40 h milling time	143
Table-4.8	Crystallite parameters of MP2 composition for	143

	different milling times	
Table-4.9	Elemental mass (for 20 gm) of different Mg–Zr–Mn–Ni Compositions	159
Table-4.10	The elemental compositions of the synthesized Mg–Zr–Mn–Ni compositions	161
Table-4.11	Crystallite parameters of synthesized alloy compositions after 40h milling	163
Table-4.12	Crystallite parameters of optimized MZ2 coded alloy composition at different milling time	163
 Chapter: 5		
Table-5.1	Elemental composition of the synthesized V–Ni alloy composition	193
