List of Tables	xv
List of Figures	xix
List of Abbreviations	xxi
List of Accepted/Communicated Papers	xxiii
1 Introduction, Preliminaries and Summary	1
1.1 Introduction	1
1.2 Examples of inliers	4
1.3 Inlier prone models	7
1.3.1 Instantaneous failure model	8
1.3.2 Early failure model-1	8
1.3.3 Early failure model-2	9
1.3.4 Model with inlier at zero and one	10
1.4 Preliminaries	11
1.5 Estimation procedures	17
1.5.1 Maximum Likelihood Estimation	17
1.5.2 Least Squares and Weighted Least Squares Estimation	18
1.5.3 Percentile Estimation	19
1.5.4 Maximum Product Spacings Estimation	20
1.5.5 UMVU Estimation	22
1.6 Testing of hypothesis for parameters	38
1.7 Tests for number of inliers	40
1.7.1 Block test procedure for detecting inliers	40
1.7.2 Sequential test procedure for detecting inliers	43

1.8	Summary of the thesis	45
2	Inferences on inliers in Exponential distribution	49
2.1	Introduction	49
2.2	Analysis of instantaneous failure model	52
2.2.1	UMVUE based on conditional approach	53
2.2.2	UMVUE based on exponential family approach	58
2.3	Analysis of early failure model-1	63
2.4	Analysis of early failure model-2	66
2.5	Nearly instantaneous failure model	69
2.6	Simulation study	72
2.7	Numerical examples	74
3	The Testing of hypothesis for inliers in Exponential distribution	77
3.1	Introduction	77
3.2	Test of hypothesis for parameters (p, θ)	79
3.3	Test of hypothesis for about multiple inliers	81
3.3.1	The models and problem of testing of hypothesis	81
3.3.2	Block test for testing k inliers using M_k model	84
3.3.3	Test of hypothesis for single inlier using L_k model	88
3.3.4	Outward sequential procedure for testing hypothesis for k inliers	90
3.4	Illustrative example	96
3.4.1	NEFT outward amount in banks of India	97
3.4.2	Rainfall data	98
3.5	Masking and swamping effect in the test for inliers	99
3.5.1	Masking effect in the test of single inlier for Dixon type test and Cochran type test	100
3.5.2	Masking and swamping effect in the outward sequential test for more than one inliers	106

4 Inferences on inliers in Lindley distribution	113
4.1 Introduction	113
4.2 The Lindley's inliers model	114
4.3 Estimation	115
4.3.1 Maximum Likelihood Estimation	115
4.3.2 Asymptotic distribution of MLE	117
4.3.3 Uniformly Minimum Variance Unbiased Estimation	119
4.4 The testing of hypothesis for parameters	125
4.5 Simulation study	126
4.6 Data analysis	128
 5 Inferences on inliers in Gompertz distribution with Type II censored data	 131
5.1 Introduction	131
5.2 The Type II censored Gompertz inlier model	132
5.3 The likelihood estimates and its asymptotic distribution	135
5.3.1 Maximum Likelihood Estimation	135
5.3.2 Asymptotic distribution of MLE	136
5.4 Least Squares and Weighted Least Squares Estimation	139
5.5 Percentile Estimation	141
5.6 Uniformly Minimum Variance Unbiased Estimation	142
5.7 Test of hypothesis for parameters	149
5.8 Simulation study	151
5.9 Numerical example	154
 6 Inferences on inliers in Weibull distribution with Type II censored data	 157
6.1 Introduction	157

6.2	The Type II censored Weibull inlier mode	159
6.3	The likelihood estimates and its asymptotic distribution	161
6.3.1	Maximum Likelihood Estimation	161
6.3.2	Asymptotic distribution of MLE	165
6.4	Uniformly Minimum Variance Unbiased Estimation	169
6.4.1	UMVU Estimation of parameters	170
6.4.2	UMVU Estimation of parametric functions	173
6.5	Least Squares and Weighted Least Squares Estimation	179
6.6	Percentile Estimation	181
6.7	Simulation study	182
6.8	Numerical study	187
7	Inferences on inliers in Pareto II distribution with Type II censored data	195
7.1	Introduction	195
7.2	Maximum Likelihood Estimation	196
7.3	Asymptotic distribution of MLE	199
7.4	Maximum Product Spacings Estimation	202
7.5	Uniformly Minimum Variance Unbiased Estimation	205
7.5.1	UMVU Estimation of parameters	206
7.5.2	UMVU Estimation of parametric functions	210
7.6	Illustrative examples	215
8	Future scopes and limitation	221
	Appendix	225
	Bibliography	233
