

LIST OF FIGURES

Figure 1: Regulatory role of <i>cis</i> -encoded sRNA (Diagrammatic representation)	10
Figure 2: Depiction of regulatory role of <i>trans</i> -encoded sRNA.....	11
Figure 3: sRNAs modulating protein activity	13
Figure 4: Mechanisms of sRNA regulation	15
Figure 5: Genomic location of sRNA	18
Figure 6: Virulence determinants of <i>Staphylococcus aureus</i>	23
Figure 7: Pore formation of α -hemolysin.....	25
Figure 8: AgrCA: The quorum sensing TCS regulating virulence gene expression in <i>S. aureus</i>	29
Figure 9: WalKR: The essential TCS control the cell wall metabolism in <i>S. aureus</i>	30
Figure 10: Timeline of sRNA discovery in <i>Staphylococcus aureus</i>	32
Figure 11: Map of sRNA expressed in <i>S. aureus</i> Newman	33
Figure 12: Construction of <i>sprX</i> knockdown strain	52
Figure 13: Expression of SprX in different strains in <i>S. aureus</i> Newman.....	53
Figure 14: Differential protein profile of <i>S. aureus</i> Newman	54
Figure 15: Influence of SprX on <i>isaA</i> expression in <i>S. aureus</i> Newman.	55
Figure 16 : Weak interaction of SprX with <i>isaA</i> mRNA	57
Figure 17 : SprX regulates the expression of autolysins.....	58
Figure 18: Effect of SprX on cell clustering by phase-contrast microscopy	59
Figure 19: Effect of SprX on cell clustering by scanning electron microscopy	60
Figure 20: Influence of SprX on cell clustering and biofilm formation	61
Figure 21: Influence of SprX levels on the expression of <i>walR</i> , <i>atlA</i> , and <i>lytM</i> transcripts in <i>S. aureus</i> Newman.....	63
Figure 22: <i>In silico</i> analysis of mRNA-sRNA interaction.....	65
Figure 23: Interaction of SprX with <i>walR</i> mRNAs by gel mobility shift assay	66
Figure 24: Schematic illustration of regulation at the nucleotide sequence of <i>isaA</i> and <i>lytM</i> genes.....	67
Figure 25: Regulatory network of SprX in autolysin regulation in <i>S. aureus</i>	68
