

ACKNOWLEDGEMENTS

I am deeply thankful to my guide Dr. D.S. Pathak, Professor of Business Economics, for inducing me to undertake this research work. In spite of his very busy schedule, he spared his valuable time and took pains to guide me. His insistence on strict standard of quality has put positive pressures upon me to do my work to the best of my ability. However, responsibility for fault, error or omission is mine alone.

I am very much thankful to the Head, Department of Business Economics, Prof. S.K. Singh, Dean, Prof. B.S. Patel, my Senior Colleague Prof. K.R. Shah and all the other colleagues in the department for their constant encouragement and valuable support in the completion of this research endeavour.

This work could not have been carried through without out the immense support provided by my close friends Mr. Vinod K. Padaria and Mr. B.C. Patel in the statistical analysis.

I am thankful to the Faculty Office Staff for their administrative support.

At the last I deeply acknowledge the never ending support provided by my wife, Neeta and my loving children, Radika, Priyanka and Harsh.
