

LIST OF TABLES

Table No.	Title	Page No.
2.1	Raw silk production in India in 2001-2006	28
3.1	Standardized recipes for extraction of dyes	55
3.2	Classification table for the Natural dyes of the study	57
3.3	List of different treatments of the study	63
4.1a	Reflectance Values of Madder dye on Eri silk fabric	84
4.1b	Reflectance Values of Madder dye on Sisal Fibre	85
4.2a	Reflectance Values of Marigold dye on Eri silk fabric	88
4.2b	Reflectance Values of Marigold dye on Sisal Fibres	89
4.3a	Reflectance Values of Henna dye on Eri silk fabric	90
4.3b	Reflectance Values of Henna dye on Sisal Fibre	92
4.4a	Reflectance Values of Flame of Forest dye on Eri silk fabric	93
4.4b	Reflectance Values of Flame of Forest dye on Sisal Fibre	95
4.5a	Reflectance Values of Ratanjot dye on Eri silk fabric	96
4.5b	Reflectance Values of Ratanjot dye on Sisal Fibre	98
4.6a	Reflectance Values of Acacia Catechu dye on Eri silk fabric	100
4.6b	Reflectance Values of Acacia Catechu dye on Sisal Fibre	101
4.7a	Reflectance Values of Madder and Ratanjot composite dye on Eri silk fabric.	103
4.7b	Reflectance Values of Madder and Ratanjot composite dye on Sisal Fibre	104
4.8a	Reflectance Values of Madder and Flame of Forest Composite dye on Eri silk fabric.	106
4.8b	Reflectance Values of Madder and Flame of Forest composite dye on Sisal Fibre.	107
4.9a	Reflectance Values of Madder Marigold dye on Eri silk fabric	109
4.9b	Reflectance Values of Madder Marigold dye on Sisal Fibre	110
4.10	Results of the Atomic Absorption Spectra Analysis of Eri Silk and Sisal Fibre	112
4.11	Optical Density and Transmittance readings of Madder Dye after premordanting and dyeing at different pH.	112
4.12	Optical Density and Transmittance readings of Marigold Dye after premordanting and dyeing at different pH	113
4.13	Optical Density and Transmittance readings of Henna Dye after premordanting and dyeing at different pH	114
4.14	Optical Density and Transmittance readings of Flame of forest Dye after premordanting and dyeing at different pH	115
4.15	Optical Density and Transmittance readings of the Ratanjot Dye after premordanting and dyeing at different pH	116
4.16	Optical Density and Transmittance readings of the Acacia catechu Dye after premordanting and dyeing at different pH	117
4.17	Optical Density and Transmittance readings of the Dyes after premordanting and dyeing at different pH	118
4.18	Optical Density and Transmittance readings of the Dyes after premordanting and dyeing at different pH	119
4.19	Optical Density and Transmittance readings of the Dyes after	120

	premordanting and dyeing at different pH	
4.20	Fastness rating of Eri silk fabric and Sisal Fibres Dyed with Madder	121
4.21	Fastness rating of Eri silk fabric and Sisal Fibres Dyed with Marigold Dye	123
4.22	Fastness rating of Eri silk fabric and Sisal Fibres Dyed with Henna Dye	124
4.23	Fastness rating of Eri Silk Fabric and Sisal Fibre Dyed with Flame of forest	126
4.24	Fastness rating of Eri Silk fabric and Sisal Fibre Dyed with Ratanjot	127
4.25	Fastness rating of Eri Silk fabric and Sisal Fibre Dyed with Acacia catechu	129
4.26	Fastness rating of Eri Silk fabric and Sisal Fibre Dyed with combination of Madder and Marigold	130
4.27	Fastness rating of Eri Silk fabric and Sisal Fibre Dyed with combination of Madder and Flame of forest	131
4.28	Fastness rating of Eri Silk fabric and Sisal Fibre Dyed with combination of Madder and Ratanjot	132
4.29	Demographic profile of the respondents for the study	155
4.30	Correlation between awareness and need for minor fibre products of the respondents (Average weighted scores)	158
4.31	Correlation between need and gap in availability of minor fibre products (Average weighted scores)	159
4.32	Correlation between need for minor fibre products and their perceived value (Average weighted scores)	160
4.33	Correlation between perceived value of the minor fibre products to purchase intention (Average weighted scores)	161
4.34	Correlation between purchase intention and availability of products through Handloom and Handicraft outlets. (Average weighted scores)	162
