

### LIST OF FIGURES

| Figure  | Title                                                                             | Page No. |
|---------|-----------------------------------------------------------------------------------|----------|
| 2.1.a:  | Madder plant                                                                      | 16       |
| 2.1.b:  | Madder roots                                                                      | 16       |
| 2.2.a:  | Flame of forest                                                                   | 17       |
| 2.2.b:  | Dried Flame of forest flowers                                                     | 17       |
| 2.3.a:  | Acacia catechu                                                                    | 19       |
| 2.3.b:  | Catechu wood                                                                      | 19       |
| 2.4.a   | Henna plant                                                                       | 20       |
| 2.4.b:  | Henna powder                                                                      | 20       |
| 2.5.a:  | Marigold flower                                                                   | 21       |
| 2.5.b:  | Marigold petals                                                                   | 21       |
| 2.6.a:  | Ratanjot Stems                                                                    | 22       |
| 2.6.b:  | Ratanjot powder                                                                   | 22       |
| 2.7.a:  | Jute Plant                                                                        | 23       |
| 2.7.b:  | Extracted Jute Fibre                                                              | 23       |
| 2.8.a:  | Sisal Plantation in India                                                         | 24       |
| 2.8.b:  | Sisal Harvesting                                                                  | 24       |
| 2.9.a:  | Eri silk worm                                                                     | 27       |
| 2.9.b:  | Eri Silk Moth                                                                     | 27       |
| 2.10:   | A map of Goat breeds in the Northwestern arid and Semi-arid regions               | 29       |
| 2.11.a: | Adult male Patanwadi Goat                                                         | 30       |
| 2.11.b: | Adult female Patanwadi Goat                                                       | 30       |
| 2.11.c: | The Flock of Patanwadi Goats                                                      | 30       |
| 2.12.a: | Myrobolan plant                                                                   | 32       |
| 2.12.b: | Dried Myrobolan fruit                                                             | 32       |
| 2.13.a: | Pomegranate fruit                                                                 | 33       |
| 2.13.b: | Dried pomegranate rind                                                            | 33       |
| 2.14.a: | Tea plant                                                                         | 34       |
| 2.14.b: | Dry tea powder                                                                    | 34       |
| 3.1:    | Flow chart of Research Design.                                                    | 53       |
| 3.2:    | Flow chart of dye exploration and application.                                    | 61       |
| 3.3:    | Flow chart of product designing and market evaluation.                            | 69       |
| 4.1     | Flow chart of different techniques used for the designing of minor fibre products | 134      |
