

List of Tables

Table No.	Title	Page No.
Table 1.	Profile of Gujarat State	23
Table 2.	Summary of Community Led Activities under NHM	35
Table 3.	Demographic Indicators of Chhotaudepur District	38
Table 4.	Objective wise Description of the Tool used for Survey	145
Table 5.	Categorisation of Selected Variables of the ASHAs	149
Table 6.	Categorisation of Other Variables of the ASHAs	150
Table 7.	Categorisation of Sources of Information	151
Table 8.	Categorisation of Provision of Health Communication Strategies	151
Table 9.	Minimum and Maximum Obtainable Scores of Overall and Activity wise Use of Health Communication Strategies	152
Table 10.	Categorisation of Overall and Activity-wise Use of Health Communication Strategies	153
Table 11.	Minimum and Maximum Obtainable Scores of Perceived Benefits of Health Communication Strategies	154
Table 12.	Categorisation of scores of Perceived Benefits of Health Communication Strategies	154
Table 13.	Range of Intensity Indices for Perceived Benefits of Health Communication Strategies	155
Table 14.	Minimum and Maximum Obtainable Scores of Barriers Related to Health Communication Strategies	155
Table 15.	Categorisation of Scores of Barriers Related to Health Communication Strategies	156
Table 16.	Categorisation of Scores of Barriers Related to Health Communication Strategies	156
Table 17.	Minimum and Maximum Obtainable Scores of Need for Additional Health Communication Strategies	157
Table 18.	Categorisation of Scores of the Need for Additional Health Communication Strategies	158
Table 19.	Plan for Statistical Analysis	159
Table 20.	Distribution of Participants in Focus Group Discussion	162
Table 21.	Objective wise Description of the Tools	163
Table 22.	Healthcare Facilities in Chhotaudepur District	174
Table 23.	Human Resource Deputed in Chhotaudepur District	175

Table 24.	Availability of facilities at PHC for Health Communication activities	179
Table 25.	Distribution of the ASHAs according to Variables under the study	191
Table 26.	Distribution of the ASHAs according to Personal Information	197
Table 27.	Distribution of the ASHAs according to Work-related Information	199
Table 28.	Distribution of the ASHAs according to Module wise Training received under NHM	201
Table 29.	Distribution of the ASHAs according to Sources of Information	218
Table 30.	Categorisation of the ASHAs according to Sources of Information	220
Table 31.	Distribution of selected ASHAs according to Provision of Health Communication Strategies under NHM	221
Table 32.	Categorisation of the ASHAs according to Provision of Health Communication Strategies under NHM	223
Table 33.	Distribution of the ASHAs according to Overall Use of Health Communication Strategies	230
Table 34.	t-test showing variable wise differences in Overall Use of Health Communication Strategies	232
Table 35.	Analysis of Variance (ANOVA) showing variable wise differences in Overall Use of Health Communication Strategies	233
Table 36.	Tukey's HSD comparison for Overall Use of Health Communication Strategies with Block and Occupational Skill	234
Table 37.	Distribution of the ASHAs according to Use of Health Communication Strategies during Home visit	236
Table 38.	Categorisation of the ASHAs according to Use of Health Communication Strategies for Home visit	238
Table 39.	t-test showing variable wise differences in Use of Health Communication Strategies during Home Visit	239
Table 40.	Analysis of Variance (ANOVA) showing variable wise differences in Use of Health Communication Strategies during Home Visit	241
Table 41.	Tukey's HSD comparison for Use of Health Communication Strategies during Home Visit with Block	242

Table 42.	Distribution of selected ASHAs according to Use of Health Communication Strategies for VHND	244
Table 43.	Categorisation of the ASHAs according to Use of Health Communication Strategies for VHND	246
Table 44.	t-test showing variable wise differences in Use of Health Communication Strategies for VHND	247
Table 45.	Analysis of Variance (ANOVA) showing variable wise differences in Use of Health Communication Strategies for VHND	249
Table 46.	Tukey's HSD comparison for Use of Health Communication Strategies for VHND with Block and Occupational skills	251
Table 47.	Distribution of the ASHAs according to Use of Health Communication Strategies for Visit to Health Facilities	253
Table 48.	Categorisation of the ASHAs according to Use of Health Communication Strategies for Visit to Health Facilities	255
Table 49.	t-test showing variable wise differences in Use of Health Communication Strategies during Visit to Health Facilities	256
Table 50.	Analysis of Variance (ANOVA) showing variable wise differences in Use of Health Communication Strategies for Visit to Health Facilities	257
Table 51.	Tukey's HSD comparison for Use of Health Communication Strategies for Visit to Health Facilities with Block and Knowledge level	258
Table 52.	Distribution of selected ASHAs according to Use of Health Communication Strategies for Village Health Sanitation and Nutrition Committee Meeting	260
Table 53.	Categorisation of the ASHAs according to Use of Health Communication Strategies for Village Health Sanitation and Nutrition Committee Meeting	262
Table 54.	t-test showing variable wise differences in Use of Health Communication Strategies for Village Health Sanitation and Nutrition Committee Meeting	263
Table 55.	Analysis of Variance (ANOVA) showing variable wise differences in Use of Health Communication Strategies for Village Health Sanitation and Nutrition Committee Meeting	265
Table 56.	Tukey's HSD comparison for Use of Health Communication Strategies for Village Health Sanitation	266

	and Nutrition Committee Meeting with Block and Occupational Skill	
Table 57.	Distribution of the ASHAs according to Use of Health Communication Strategies for Keeping and informing about records	268
Table 58.	Categorisation of the ASHAs according to Use of Health Communication Strategies for Keeping and Informing about Records	270
Table 59.	t-test showing variable wise differences in Use of Health Communication Strategies for Keeping and Informing about Records	271
Table 60.	Analysis of Variance (ANOVA) showing variable wise differences in Use of Health Communication Strategies for Keeping and Informing about Records	272
Table 61.	Tukey's HSD comparison for Keeping and Informing about Records with Block and Occupational Skill	273
Table 62.	Categorisation of the ASHAs according to Perceived Benefits of Health Communication Strategies	285
Table 63.	t-test showing variable wise differences in Perceived Benefits of Health Communication Strategies by the ASHAs	286
Table 64.	Analysis of Variance (ANOVA) showing variable wise differences in Perceived Benefits of Health Communication Strategies by the ASHAs	287
Table 65.	Tukey's HSD comparison for Perceived Benefits of Health Communication Strategies by the ASHAs with Block and Occupational Skill	288
Table 66.	Intensity Indices of the Perceived benefits of Health Communication Strategies expressed by the ASHAs	289
Table 67.	Categorisation of the ASHAs according to Barriers related to Health Communication Strategies	303
Table 68.	t-test showing variable wise differences in Barriers related to Health Communication Strategies	304
Table 69.	Analysis of Variance (ANOVA) showing variable wise differences in Barriers related to Health Communication Strategies	305
Table 70.	Tukey's HSD comparison for Barriers related to Health Communication Strategies among the ASHAs with Block,	306

	Occupational Skill, Knowledge regarding Health Communication Strategies and Media use	
Table 71.	Intensity indices showing Barriers related to features of Health Communication Strategies	308
Table 72.	Intensity indices showing Barriers related to Availability and Accessibility of Health Communication Strategies	309
Table 73.	Intensity indices showing Barriers related to Support from Authorities (Doctors, ANM, AWW etc.) for use of Health Communication Strategies	311
Table 74.	Intensity indices showing Barriers related to Characteristics of Beneficiaries for use of Health Communication Strategies	312
Table 75.	Intensity indices showing Barriers related to Personal (ASHA) Characteristics for use of Health Communication Strategies	313
Table 76.	Distribution of the ASHAs according to Readiness for Specific Components of Training related to Health Communication in future	332
Table 77.	Distribution of the ASHAs according to Most expressed Need of Additional Health Communication Strategies	333
Table 78.	Categorisation of ASHAs according to Overall Need of Additional Health Communication Strategies	334
Table 79.	t-test showing variable wise differences in Overall Need for Additional Health Communication Strategies	335
Table 80.	Analysis of Variance (ANOVA) showing variable wise differences in Overall Need for Additional Health Communication Strategies	336
Table 81.	Tukey's HSD comparison for Overall Need for Additional Health Communication Strategies with Block and Occupational Skill	337
Table 82.	Distribution of ASHAs according to Need of Additional Health Communication Strategies for Home visit	339
Table 83.	Categorisation of ASHAs according to Need of Additional Health Communication Strategies for a Home visit	341
Table 84.	t-test showing variable wise differences in Need of Additional Health Communication Strategies for a Home visit	341

Table 85.	Analysis of Variance (ANOVA) showing variable wise differences in Need of Additional Health Communication Strategies for a Home visit	342
Table 86.	Tukey's HSD comparison for Need of Additional Health Communication Strategies for a Home visit' by the ASHAs with Block and Occupational Skill	343
Table 87.	Distribution of ASHAs according to Need of Additional Health Communication Strategies for Planning and celebrating VHND	345
Table 88.	Categorisation of the ASHAs according to Need of Additional Health Communication Strategies for Planning and celebrating VHND	347
Table 89.	t-test showing variable wise differences in Need of Additional Health Communication Strategies for Planning and Celebrating VHND	349
Table 90.	Analysis of Variance (ANOVA) showing variable wise differences in Need of Additional Health Communication Strategies for Planning and Celebrating VNHD	350
Table 91.	Tukey's HSD comparison for in Need of Additional Health Communication Strategies for Planning and Celebrating VNHD' with Block and Occupational Skill	351
Table 92.	Distribution of ASHAs according to Need of Additional Health Communication Strategies for Visit to Health Facilities	353
Table 93.	Categorisation of the ASHAs according to Need of Additional Health Communication Strategies for Visit to Health Facilities	356
Table 94.	t-test showing variable wise differences in Need of Additional Health Communication Strategies for Visit to Health Facilities	357
Table 95.	Analysis of Variance (ANOVA) showing variable wise differences in Need of Additional Health Communication Strategies for Visit to Health Facilities	358
Table 96.	Tukey's HSD comparison for Need of Additional Health Communication Strategies for Visit to Health Facilities .with Block, Education, Occupational Skills and Knowledge regarding HCS	360
Table 97.	Distribution of ASHAs according to Need of Additional Health Communication Strategies for VHSNC Meeting	362

Table 98.	Categorisation of the ASHAs according to Need of Additional Health Communication Strategies for VHSNC meeting	364
Table 99.	t-test showing variable wise differences in Need of Additional Health Communication Strategies for VHSNC meeting	365
Table 100.	Analysis of Variance (ANOVA) showing differences in Need of Additional Health Communication Strategies for VHSNC meeting	366
Table 101.	Tukey's HSD comparison for Need of Additional Health Communication Strategies for VHSNC Meeting with Block, Occupational Skill and Knowledge related to Health Communication Strategies	367
Table 102.	Distribution of ASHAs according to Need of Additional Health Communication Strategies for Keeping and Informing about Records	369
Table 103.	Categorisation of the ASHAs according to Need of Additional Health Communication Strategies for Keeping and Informing about Records	372
Table 104.	t-test showing variable wise differences in Need of Additional Health Communication Strategies for Keeping and Informing about Records	373
Table 105.	Analysis of Variance (ANOVA) showing variable wise differences in Need of Additional Health Communication Strategies for Keeping and Informing about Records	374
Table 106.	Tukey's HSD comparison for Need of Additional Health Communication Strategies for Keeping and Informing about Records with Block	375
Table 107.	Objective wise Description of the Tools Used for Survey	422
Table 108.	Categorisation of Selected Variables of the ASHAs	425
Table 109.	Categorisation of the Other Variables of the ASHAs	426
Table 110.	Categorisation of Sources of Information	427
Table 111.	Categorisation of the Provision of Health Communication Strategies	427
Table 112.	Minimum and Maximum Obtainable Scores of Overall and Activity wise Use of Health Communication Strategies	428

Table 113.	Categorisation of Overall and Activity-wise Use of Health Communication Strategies	429
Table 114.	Categorisation of scores of Perceived Benefits of Health Communication Strategies	430
Table 115.	Range of Intensity Indices for Perceived Benefits of Health Communication Strategies	430
Table 116.	Categorisation of Scores of Barriers Related to Health Communication Strategies	431
Table 117.	Categorisation of Scores of Barriers Related to Health Communication Strategies	431
Table 118.	Minimum and Maximum Obtainable Scores of Need for Additional Health Communication Strategies	432
Table 119.	Categorisation of Scores of the Need for Additional Health Communication Strategies	433
Table 120.	Plan of Statistical Analysis	434
Table 121.	Objective wise Description of the Tools	436
