

List of Tables

S. no	Title of tables	Page no.
2.1	Injuries and illness among hospital workers	12
2.2	Incidence of back pain of acute onset associated with patient handling per 1000 whole time equivalents per year	30
3.1	Equipments used for measuring physical fitness of selected Health Care Workers (HCWs)	80
3.2	Equipments used for measuring physiological cost of work of selected HCWs	81
3.3	Formulas used for calculating physiological cost of work	81
4.1.1	General information related to Health Care Workers	90
4.1.2	General information on work related aspects of Health Care Workers	92
4.1.3	General information on work place of Health Care Workers	93
4.2.1	Nature of work carried out by Health Care Workers	96
4.3.1	Data on medical history of selected Health Care Workers	99
4.3.2	Data on back pain/ injury suffered by selected Health Care Workers	101
4.4.1	Work related injuries and health hazards faced by Health care Workers while working in hospital	103
4.5.1	Analysis of Musculoskeletal symptoms	113
4.5.2	Musculoskeletal symptoms experienced by Health Care Workers while performing various activities in hospital	118

S. no	Title of tables	Page no.
4.6.1	Anthropometric measurements of selected Health Care Workers	137
4.6.2	Measurements of hospital equipments/ furniture	138
4.7.1	Psychological cost of work of HCWs in terms of burnout, work stress and job satisfaction	142
4.8.1	Physical Fitness Index of the experimental group	152
4.8.2	Physiological cost work in terms of heart rate (beats/min)	155
4.8.3	Physiological cost work in terms of energy expenditure (KJ/min)	163
4.8.4	Physiological cost work in terms of total cardiac cost of work	168
4.8.5	Physiological cost work in terms of postural stress (angle of deviation) while performing different patient handling tasks and non patient handling tasks while performing different activities in hospital	172
4.8.6	Extent of pain experienced by HCWs while performing different activities in hospital	175
4.9.1	F- values and Z- values showing relationship between the selected work and worker- related variables and physiological cost of work i.e. musculoskeletal symptoms	186
4.9.2	F- Values and Z- values showing relationship between selected work and worker related variables and psychological cost of work (1) burn out	188
4.9.3	F – values and Z values showing relationship between selected work and worker related variables and psychological cost of work (2) work stress	190

S.no	Title of Tables	Page no.
4.9.4	F-values and Z values showing relationship between selected work and worker related variables and psychological cost of work (3) job satisfaction.	192
4.9.5	Coefficient of Correlation showing relationship between selected worker related variables and psychological cost of work in terms	194
