

LIST OF TABLES

CHAPTER I

<u>Table No.</u>		<u>Page</u>
1.	Population in Bangladesh 1974, 1981	: 13
2.	Population in Bangladesh by age and sex, 1974	: 14
3.	Probability of survival by age and sex, 1977	: 15
4.	Mean age at marriage, 1974, 1975 in Bangladesh	: 16
5.	Numerical and Percentage Distribution of Literate Population by sex and area 1974	: 17
6.	Percentage distribution of labour force Participation rates according to pilot manpower study, 1979	: 18

CHAPTER V

SECTION I

<u>Table No.</u>		
1.	Frequency and Percentage distribution of the 200 sample households according to their religion, family type and socio-economic status	: 126
2.	Chi-square value of the relationship between family type and socio-economic status of households	: 127
3A & B	Frequency and percentage distribution of spouses with regard to their age according to socio-economic status of households (3A for husbands and 3B for wives)	: 128

(List of Tables)

Table No.		Page
4.	t-values of difference between the mean age of spouses according to categories of socio-economic status of households	: 129
5.	F-values of difference in the mean age of both husbands and wives of four socio-economic status of households	: 130
6A & B	Frequency and percentage distribution of spouses with regard to their age at marriage according to socio-economic status of households (6A for husbands and 6B for wives)	: 131
7.	F-values of difference in the mean age at marriage of both husbands and wives of four socio-economic status of households	: 135
8A & B	Frequency and percentage distribution of husbands and wives with regard to their marriage practice according to socio-economic status and religion (8A for husbands and 8B for wives)	: 137
9.	Distribution of children born according to sex and socio-economic status of households	: 139
10.	Frequency and percentage distribution of child bearing of housewives (195) in the sample according to socio-economic status of households	: 141
11.	F-value of difference between the mean number of children of households classified according to socio-economic status	: 142

(List of Tables)

Table No.		Page
12.	Distribution of children born to present sample housewives according to religion	: 143
13.	Frequency and percentage distribution of dead children of sample households according to sex and socio-economic status of households	: 145
14.	Distribution of alive children of the present sample households according to sex and socio-economic status of households	: 147
15.	Frequency and percentage distribution of households according to vaccination given to children	: 149
16.	Frequency and percentage distribution of respondents (188) with regard to birth spacing of their children according to socio-economic status of households	: 150
17.	F-value of difference between the mean birth spacing of children of four categories of socio-economic status of households.	: 151
18.	Frequency and percentage distribution of children born to sample housewives according to their literacy level	: 154
19.	Frequency and percentage distribution of children born to sample housewives according to their labour participation	: 155

(List of Tables)

Table No.		Page
PART 2		
20A & B.	Frequency and percentage distribution of spouses with regard to their literacy rate and educational level according to socio-economic status of households (20A for husbands, 20B for wives)	: 156
21.	Frequency and percentage distribution of wives with regard to their literacy rate according to their socio-economic status	: 158
22.	Frequency and percentage distribution of wives with regard to their literacy rate according to religion	: 159
23A.	Frequency and percentage distribution of husbands with regard to their occupation according to socio-economic status of households	: 161
23B.	Frequency and percentage distribution of wives with regard to their occupation according to socio-economic status of households	: 163
24.	Frequency and percentage distribution of wives with regard to labour force participation according to socio-economic status of households.	: 164
25.	Frequency and percentage distribution of wives with regard to labour force participation according to religion	: 165
26.	Frequency and percentage distribution of wives with regard to labour force participation according to literacy level	: 165

(List of Tables)

Table No.		Page
27.	Frequency and percentage distribution of the households with regard to working members according to socio-economic status of households	: 166
28.	F-value of difference between the mean number of working members in four socio-economic status of households	: 167
29.	t-values of difference between the mean number of working members in different categories of socio-economic status of households	: 167
30.	Chi-square value between socio-economic status of households and number of working members	: 168
31.	Frequency and percentage distribution of households with regard to amount of land according to socio-economic status of households	: 169
32.	Frequency and percentage distribution of households according to FLP and amount of land	: 170
33.	Chi-square value showing relationship between amount of land possessed by households and FLP.	: 171
34.	Frequency and percentage distribution of households with regard to their income level per month according to socio-economic status	: 172
35.	Frequency and percentage distribution of households with regard to total members according to socio-economic status	: 173

(List of Tables)

Table No.		Page
36.	Frequency and percentage distribution of households with regard to their saving per month according to socio-economic status	: 175
37.	Frequency and percentage distribution of sources of savings of the present sample	: 176
38.	Frequency and percentage distribution of households with regard to their investment according to socio-economic status	: 177
39.	Frequency and percentage distribution of loans taken by the sample households according to socio-economic status	: 178
40.	F-value of difference in the mean credits (in absolute value) between four categories of socio-economic status of households	: 179
41.	Frequency and percentage distribution of sources of credit taken by the sample households	: 180
42.	Frequency and percentage distribution of reasons of not taking loan from banks	: 188
43.	Frequency and percentage distribution of purposes of credit taken by the sample households	: 182

SECTION II

PART 1

Table No.

1.	Frequency and percentage distribution of total sample women classified according to their participation pattern in economic activities and socio-economic status of households	: 186
----	--	-------

(List of Tables)

Table No.		Page
2.	Frequency and percentage distribution of employed wives outside home with regard to their work pattern according to their socio-economic status	: 188
3.	Frequency and percentage distribution of employed wives outside home with regard to the duration of work, holidays, and wage rate according to the types of occupation	: 190
4.	Frequency and percentage distribution of employed women within the home according to the socio-economic status of households	: 192
5.	Frequency and percentage distribution of employed women both outside and within the home with regard to their income per month	: 194
6.	Frequency and percentage distribution of employed women with regard to their age at employment	: 197
7.	Frequency and percentage distribution of job satisfaction among 75 employed women of the present sample	: 198
8.	Frequency and percentage distribution of job satisfaction of 29 satisfied employed women according to their occupation	: 199
9.	Frequency and percentage distribution of the reasons for job satisfaction of 29 satisfied employed women of the present sample	: 200
10.	Frequency and percentage distribution of reasons for dissatisfaction of 45 dissatisfied employed women of the present sample	: 201

(List of Tables)

Table No.		Page
11.	Frequency and percentage distribution of facilities preferred by 45 dissatisfied employed women	: 202
12.	Frequency and percentage distribution of the nature of work of fulltime housewives according to socio-economic status of households	: 203
13.	Frequency and percentage distribution of respondents (fulltime housewives) with regard to their reason for not working outside home	: 205
14.	Frequency and percentage distribution of respondents with regard to their skill according to their occupational categories	: 207
15.	Frequency and percentage distribution of the willingness to learn skills according to the occupational	: 208
16.	Frequency and percentage distribution of reasons of learning the skills according to the occupational categories of respondents	: 209
17A.	Frequency and percentage distribution of respondents (employed outside home) with regard to their decision making pattern.	: 211
17B.	Frequency and percentage distribution of respondents (employed gainfully within home) with regard to their decision making pattern	: 212
17C.	Frequency and percentage distribution of respondents (fulltime housewives) with regard to their decision making pattern	: 213

(List of Tables)

Table No.		Page
18.	Frequency and percentage distribution of respondents (200 wives) with regard to the division of labour in the household activities:	215
19.	Frequency and percentage distribution of respondents (200 wives) with regard to their control over family purse	: 218
20.	Frequency and percentage distribution of employed wives with regard to their giving income to their husbands	: 219
21.	Frequency and percentage distribution of respondents with regard to their membership in ongoing development organization	: 220
22.	Frequency and percentage distribution of respondents (200 wives) with regard to their belief family planning	: 222
23.	Frequency and percentage distribution of respondents with regard to their reasons of preference of family planning	: 223
24.	Frequency and percentage distribution of respondents with regard to their use of family planning method	: 224
25.	Frequency and percentage distribution of respondents (N=111) with regard to their reasons of not using family planning method	: 226
26.	Frequency and percentage distribution of respondents (N=111) with regard to their willingness to adopt family planning method	: 227
27.	Frequency and percentage distribution of respondents with regard to their behalf towards economic condition	: 228

(List of Tables)

Table No.		Page
28.	Frequency and percentage distribution of respondents with regard to their beliefs towards success in life	: 229
29.	Frequency and percentage distribution of respondents with regard to their feeling towards life	: 230

Part 2

Table No.		
1.	Frequency and percentage distribution of the status scores of 200 respondents	: 235
2.	Frequency and percentage distribution of status scores of respondents according to socio-economic status of households	: 236
3.	F-value of difference of mean status scores obtained by respondents between four categories of socio-economic status of household	: 237.
4.	Frequency and percentage distribution of status scores of respondents according to FLP.	: 238
5.	Frequency and percentage distribution of status scores of respondents according to their literacy level	: 239
6.	Frequency and percentage distribution of status scores of respondents according to their religion	: 240
7.	Frequency and percentage distribution of status scores of respondents according to family size	: 241

(List of Tables)

Table No.		Page
8.	t-values of difference of total mean status scores obtained by respondents according to different selected variables	: 241
9.	Frequency and percentage distribution of scores on management practice according to socio-economic status of households	: 245
10.	F-value of differences of mean scores on management practices between four categories of socio-economic status of household	: 246
11.	Frequency and percentage distribution of scores on management practices according to FLP	: 248
12.	Frequency and percentage distribution of scores on management practices according to literacy level	: 249
13.	Frequency and percentage distribution of scores on management practices according to religion	: 250
14.	Frequency and percentage distribution of scores on management practices according to family size	: 251
15.	t-values of difference of mean scores on management practices by respondents according to 5 selected variables	: 252
16.	Frequency and percentage distribution of scores on control over fertility according to socio-economic status of households	: 253
17.	F-value of difference of mean scores on control over fertility between four categories of socio-economic status of households	: 254

(List of Tables)

Table No.		Page
18.	Frequency and percentage distribution of scores on control over fertility according to FLP.	: 225
19.	Frequency and percentage distribution of scores on control over fertility according to literacy level	: 255
20.	Frequency and percentage distribution of scores on control over fertility according to religion	: 256
21.	Frequency and percentage distribution of scores on control over fertility according to family size.	: 256
22.	t-values of difference in mean scores on control over fertility according to different selected variables	: 257
23.	Frequency and percentage distribution of scores on Access of membership according to different socio-economic status of households	: 258
24.	F-value of difference of mean scores on access to membership between three categories of socio-economic status of households.	: 259
25.	Frequency and percentage distribution of scores on access to membership according to FLP	: 260
26.	Frequency and percentage distribution of scores on access to membership according to literacy level	: 260
27.	Frequency and percentage distribution of scores on access to membership according to religion	: 261
28.	Frequency and percentage distribution of scores on access to membership according to family size:	261

(List of Tables)

Table No.		Page
29.	t-values of difference of mean scores on access to membership according to different selected variables	: 262
30.	Frequency and percentage distribution of perception scores of respondents according to socio-economic status of households	: 263
31.	F-value of difference of mean scores on perception between four categories of socio-economic status of households	: 264
32.	Frequency and percentage distribution of perception scores of respondents according to FLP	: 265
33.	Frequency and percentage distribution of perception scores of respondents according to literacy level	: 266
34.	Frequency and percentage distribution of perception scores of respondents according to religion	: 267
35.	Frequency and percentage distribution of perception scores of respondents according to family size	: 268
36.	t-values of difference of mean scores on perception of life of respondents according to different selected variables	: 269
37.	Frequency and percentage distribution of scores on small family norm of respondents according to socio-economic status of households	: 270
38.	F-value of difference of mean scores between four categories of socio-economic status of households	: 271
39.	Frequency and percentage distribution of scores on equality of sex according to socio-economic status of households	: 271

(List of Tables)

Table No.		Page
40.	F-values of difference of mean scores between four categories of socio-economic status of households	: 272
41.	Frequency and percentage distribution of scores on small family norm of respondents according to FLP.	: 273
42.	Frequency and percentage distribution of scores on equality of sex of respondents according to FLP	: 274
43.	Frequency and percentage distribution of scores on small family norm of respondents according to literacy level	: 275
44.	Frequency and percentage distribution of scores on equality of sex according to literacy level	: 276
45.	Frequency and percentage distribution of scores on small family norm of respondents according to religion	: 277
46.	Frequency and percentage distribution of scores on equality of sex of respondents according to religion	: 278
47.	Frequency and percentage distribution of scores on small family norms of respondents according to family size.	: 279
48.	Frequency and percentage distribution of scores on equality of sex of respondents according to family size.	: 279
49.	t-values of difference of mean scores on opinion towards small family norm and equality of sex according to 4 variables	: 280

(List of Tables)

Table No.		Page
50.	F-values and t-values of difference in the mean scores between different categories of determinants of status.	: 282
51.	Summary of regression analysis (stepwise multiple) of selected 5 variables on the status of sample women	: 285

SECTION III

PART 1

Table No.		
1.	Per household and per capita monthly consumption expenditure of 200 sample households on different food and non-food items in absolute values	: 292
2.	Per household monthly consumption expenditure on different food and non-food items of 200 sample households according to socio-economic status	: 296
3.	Per capita consumption expenditure on different food and non-food items of 200 sample households according to socio-economic status	: 298
4.	Per household consumption expenditure on different food and non-food items in terms of Engel's ratio according to socio-economic status of 200 sample households	: 301
5.	Per capita consumption expenditure on different food and non-food items in terms of Engel's ratio according to socio-economic status of 200 sample household	: 302
6.	F-values of difference in the mean expenditures on total food and non-food between four socio-economic status of households	: 305

(List of Tables)

Table No.		Page
7.	t-values of difference in mean per capita consumption expenditures on different goods and services between 4 socio-economic status of households	: 307
8.	Per capita consumption expenditure of different food and non-food items of 200 sample households classified into 2 classes namely: poor class and well-to-do class	: 308
9.	Per capita expenditure on different food and non-food items in terms of Engel's ratio of 200 households classified into 2 classes namely: Poor and well-to-do class	: 309
10.	t-values of difference in mean per capita consumption expenditure on different goods and services between poor and well-to-do households	: 310
11.	Per capita consumption expenditure of different food and non-food items of 67 poor households classified according to FLP	: 313
12.	Per capita consumption expenditure on different food and non-food items of 67 poor households in terms of Engel's ratio according to FLP	: 314
13.	Per capita consumption expenditure on different food and non-food items of 50 extreme poor households classified according to FLP	: 315
14.	Per capita consumption expenditure on different food and non-food items of 50 extreme poor households in terms of Engel's ratio according to FLP	: 316

(List of Tables)

Table No.		Page
15.	t-values of difference in mean expenditures on different goods and services of 67 poor households according to FLP	: 317
16.	t-values of difference in mean expenditures on different goods and services of 50 extreme poor households according to FLP	: 318
17.	Per household monthly consumption expenditure on different food and non-food items of 200 sample households according to their religion	: 319
18.	Per capita monthly consumption expenditure on different food and non-food items of 200 sample households according to their religion	: 320
19.	Per household monthly consumption expenditure on different food and non-food items in terms of Engel's ratio according to religion of 200 sample households	: 321
20.	Per capita monthly consumption expenditure on different food and non-food items in terms of Engel's ratio according to religion of 200 sample households	: 322
21.	t-values of difference between mean per capita consumption expenditure on different food and non-food items of 200 sample households according to their religion	: 323
PART 2		
22.	Results of regression of per household and per capita consumption expenditure on per household and per capita aggregate expenditure of 200 households with model I	: 327

(List of Tables)

Table No.	Page
23. Results of regression of per household and per capita consumption expenditure on per household and per capita aggregate expenditure of 200 households with model II	: 329
24. Summary of results of stepwise multiple regression of total expenditure (T), family size (fs), religion (R), and female labour participation (FLP) on consumption expenditure (200 household)	: 338
