

LIST OF FIGURES

Figure No.	Title	Page no.
2.1 (a)	Rabi Area Sown in 2018-19 (million hectares) (as on January 31, 2020).	8
2.1 (b)	Kharif Area Sown in 2019-20 (million hectares) (as on September, 2019)	8
2.2	Schematic diagram of mechanism of action of prebiotics.	19
4.1	True yield of xylan from corncob, orange peel, green banana peel and green pea shells.	48
5.1	True yield of xylan from the selected samples	70
5.2.1(a)- 5.2.5(c)	HPLC chromatograms of XOS standard, XOS derived from corn cob, orange peels, banana peels and green pea shells respectively in triplicates.	72-76
5.3.1(a)- 5.3.9(b)	HPLC chromatograms showing bile resistance of XOS with 0.5%, 1% and 1.5% at 0h, 1.5h and 3h.	78-86
5.4.1(a)- 5.4.11(b)	HPLC chromatograms in duplicates showing acid tolerance of XOS with 1.5pH, 2pH and 3pH at 0h, 1.5h and 3h.	87-95
5.5	Impact on the growth of <i>Lactobacillus plantarum</i> , <i>Bifidobacterium adolescentis</i> and <i>Escherichia coli</i> with XOS	96
5.6.	Mean growth of <i>Lactobacillus plantarum</i> , <i>Bifidobacterium adolescentis</i> and <i>Escherichia coli</i> with 0.5%, 1% and 2% levels of XOS	98
5.7.1	Production of Propionate by <i>Lactobacillus plantarum</i> , <i>Bifidobacterium adolescentis</i> and <i>Escherichia coli</i>	99
5.7.2	Production of Butyrate by <i>Lactobacillus plantarum</i> , <i>Bifidobacterium adolescentis</i> and <i>Escherichia coli</i>	100
5.7.3	Production of Acetate by <i>Lactobacillus plantarum</i> , <i>Bifidobacterium adolescentis</i> and <i>Escherichia coli</i>	101
5.8.1 (a)	HPLC chromatogram of <i>Bifidobacterium adolescentis</i> +XOS (BAX1) producing acetate, butyrate and propionate	103
5.8.1 (b)	HPLC chromatogram of <i>Bifidobacterium adolescentis</i> + XOS (BAX2) producing acetate, butyrate and propionate	103
5.8.2 (a)	HPLC chromatogram of <i>Bifidobacterium adolescentis</i>	104

	+ Glucose (BAG1) producing acetate, butyrate and propionate	
5.8.2 (b)	HPLC chromatogram of <i>Bifidobacterium adolescentis</i> + Glucose (BAG2) producing acetate, butyrate and propionate	104
5.8.3 (a)	HPLC chromatogram of <i>Escherichia coli</i> + Glucose (ECG1) producing acetate, butyrate and propionate	105
5.8.3 (b)	HPLC chromatogram of <i>Escherichia coli</i> + Glucose (ECG2) producing acetate, butyrate and propionate	105
5.8.4 (a)	HPLC chromatogram of <i>Escherichia coli</i> + XOS (ECX1) producing acetate, butyrate and propionate	106
5.8.4 (b)	HPLC chromatogram of <i>Escherichia coli</i> + XOS (ECX2) producing acetate, butyrate and propionate	106
5.8.5 (a)	HPLC chromatogram of <i>Lactobacillus plantarum</i> + Glucose (LPG1) producing acetate, butyrate and propionate	107
5.8.5 (b)	HPLC chromatogram of <i>Lactobacillus plantarum</i> + Glucose (LPG2) producing acetate, butyrate and propionate	107
5.8.6 (a)	HPLC chromatogram of <i>Lactobacillus plantarum</i> + XOS (LPX1) producing acetate, butyrate and propionate	108
5.8.6 (b)	HPLC chromatogram of <i>Lactobacillus plantarum</i> + XOS (LPX2) producing acetate, butyrate and propionate	108
5.9.1 (a-e)	Scores for organoleptic attributes of <i>Paneer Butter Masala</i> with varying levels of added XOS	110
5.9.2(a-e)	Scores for organoleptic attributes of <i>Prawn patia</i> with varying levels of added XOS	112
5.9.3 (a-e)	Scores for organoleptic attributes of <i>Black rice kheer</i> with varying levels of added XOS	114
5.9.4 (a-e)	Scores for organoleptic attributes of <i>Gajar ka halwa</i> with varying levels of added XOS	116
