

LIST OF TABLES

Table No.	Contents	Page No.
2.1	Globalization Process Linked with the Nutrition Transition	22
2.2	Classification of Processed foods	26
2.3	Alternative sources/Names of Sugar	36
2.4	Criteria used in the Color-coded Traffic Light System for Classifying Nutrients as Low (Green), Medium (Amber) or High (Red)	61
2.5	Recommended GDAs for Various Nutrients	63
3.1	Processed Packaged Foods Examined for Food Labeling	84
3.2	Tools and techniques	86
3.3	Classification of BMI according to Asia Pacific criteria, 2004	89
3.4	Description of four NFPs	93
3.5	Preparation of Working Standard of Sodium	96
3.6	Preparation of Working Standard of Potassium	96
4.1.1	Socio-demographic Profile of the Consumers	113
4.1.2	Medical Condition and Food Allergy among the Study Population	113
4.1.3	Popular Brands of Processed Packaged Foods Consumed by the Consumers in the Present Study	117
4.1.4	Mean Monthly Consumption of Processed Packaged Foods among Consumers by Gender and Age-groups	118
4.1.5	Mean Processed Packaged Food Consumption according to the Presence or Absence of Medical Conditions among the Consumers	121
4.2.1	Food Groups and Food Categories Examined for Nutrition Labeling	122

Table No.	Contents	Page No.
4.2.2	Reporting of Mandatory Nutrients on NFP in Various Food Groups (in percentage)	127
4.2.3	Reporting of “Basic 5s”, “Other Important 7s” and “Total Number of Nutrients” in Various Food Groups (in percentage)	127
4.2.4	Recommended Limits for Fat, Saturated Fat, Salt and Sugar by UK-FSA, 2007	131
4.2.5	Low, Medium or High content of Fat, SFA, Sugar and Salt as per UK-FSA Criteria in Various Food Groups (in percentage)	133
4.2.6	Commonly Listed Alternative Sources/Names of the “Ingredients of Concern” in Ingredients list	137
4.2.7	Listing of More Than One Source of “Ingredients of Concern” in Ingredients List in Various Food Groups (in percentage)	140
4.2.8	Allergenic Substances declared on Food Labels by Manufacturers in Various Food Groups (Frequency)	145
4.2.9	Presentation of Allergen Declaration on Food Labels	147
4.2.10	Type of Allergen Declaration on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	149
4.2.11	Type of Health Claims declared on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	152
4.2.12	Type of Nutrient Claims Declared on Food Labels of Processed Packaged Foods	157
4.2.13	Nutrient Claims Reported on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	159
4.2.14	Conditions for Nutrient Content Claims as per Codex Alimentarius(CAC/GL 23-1997)	163
4.2.15	Ingredient Claims Declared on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	166
4.2.16	Substantiation of “No Hydrogenated Fats” Claim by NFP and Ingredients List in Various Food Groups (in percentage)	170
4.2.17	Substantiation of “No MSG” Ingredient Claim by Ingredients List in Various Food Groups (in percentage)	170

Table No.	Contents	Page No.
4.2.18	Types of Ingredients Claims Reported on Food Labels of Processed Packaged Foods	171
4.2.19	Symbols and Logos Displayed on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	174
4.2.20	Format of labeling “Manufacture (MD) and Best Before date (BB)” on Food Labels of Processed Packaged Foods from Various Food Groups (in percentage)	176
4.3.1	Number of Products Selected for Nutrient Analysis from each Food Category	178
4.3.2	Over-reporting, Under-reporting and Mean Sodium Content of Selected Processed Packaged Foods in Various Food categories	182
4.3.3	Food Products “Not Reporting” Sodium Values in Various Food Categories	184
4.3.4	Over-reporting, Under-reporting and Mean Potassium Content of Selected Processed Packaged Foods in Various Food categories	186
4.3.5	Food Products “Not Reporting” Potassium Values in Various Food Groups	188
4.3.6	Over-reporting, Under-reporting and Mean Sugar Content of Selected Processed Packaged Foods in Various Food categories	190
4.3.7	Food Products “Not Reporting” Sugar Values in Various Food Categories	191
4.3.8	Over-reporting, Under-reporting and Mean Fiber Content of Selected Processed Packaged Foods in Various Food Categories	192
4.3.9	Food Products “Not Reporting” Dietary Fiber Values in Various Food Categories	193
4.3.10	Over-reporting, Under-reporting and Mean Total Fat Content of Selected Processed Packaged Foods in Various Food Categories	195
4.3.11	Mean SFA Content of Selected Processed Packaged Foods in Various Food Categories	198
4.3.12	Food Products “Not Reporting” SFA Values in Various Food Categories	199

Table No.	Contents	Page No.
4.3.13	Mean MUFA Content of Selected Processed Packaged Foods in Various Food Categories	201
4.3.14	Food Products “Not Reporting” MUFA Values in Various Food Categories	202
4.3.15	Mean PUFA Content of Selected Processed Packaged Foods in Various Food Categories	203
4.3.16	Food Products “Not Reporting” PUFA Values in Various Food Categories	204
4.3.17	Mean TFA Content of Selected Processed Packaged Foods in Various Food Categories	205
4.3.18	Food Products “Not Reporting” TFA Values in Various Food Categories	206
4.3.19	Recommended Limits for Total Fat, Saturated Fat, Salt/Sodium and Sugar by UK-FSA, 2007	210
4.3.20	Processed Packaged Foods High in Sodium, Sugar, Total Fat, SFA as per UK-FSA Criteria by Various Food Categories	212
4.3.21	Processed Packaged Foods High in Two or More than Two Nutrients of Concern as per UK-FSA criteria	213
4.3.22	Most Commonly found Fatty Acids in Analyzed Processed Packaged Foods and their Fat/Oil Sources	215
4.3.23	Mean Fatty Acid (%g of total fat) Composition of Analyzed Processed Packaged Foods in Various Food Categories	219
4.3.24	Types of Fat Declared in the Ingredients List in Various Food Categories	222
4.4.1	Reasons for Processed Packaged Food Consumption by the Consumers- Gender and Age-group wise (in percentage)	226
4.4.2	Non-Nutritional Factors Considered by the Consumers while Purchasing Processed Packaged Foods- Gender and Age-group wise (in percentage)	228
4.4.3	Nutritional Factors Considered by the Consumers while Purchasing Processed Packaged Foods- Gender and Age-group wise (in percentage)	230

Table No.	Contents	Page No.
4.4.4	Practice of Reading Food Labels among Consumers- Gender and Age-group wise (in percentage)	232
4.4.5	Reasons for Examining Food Labels by the Consumers- Gender and Age-group wise (in percentage)	233
4.4.6	Reasons for not Examining Food Labels-Gender and Age-group wise (in percentage)	235
4.4.7	Examining and Understanding the Use of Three Major Components of Food Labels by the Consumers- Gender and Age-group wise (in percentage)	237
4.4.8	Information Looked on NFP during Processed Packaged Foods Purchase by the Consumers- Gender and Age-group wise (in percentage)	239
4.4.9	Familiarity, Understanding and Use of Symbols and Logos present on Food Labels-Total Population (in percentage)	240
4.4.10	Familiarity, Understanding and Use of Symbols and Logos present on Food Labels- Gender and Age-group wise (in percentage)	242
4.4.11	Comprehension of Four Kinds of NFPs by the Consumers- Gender and Age- group wise (in percentage)	243
4.4.12	Percent Knowledge Scores of Consumers on Food Labeling- Gender and Age-group wise (in percentage)	244
4.4.13	Terminologies Difficult to Understand on NFP as Reported by the Consumers- Gender and Age-Group wise (in percentage)	247
4.4.14	Differences between Experimental Food Labels	249
4.4.15	Post Intervention Scores of Adolescents on Food Label Comprehension (Label 1 and Label 2) (percent scores)	250
4.4.16	Understanding of Various Components of Food Labels in Label 1 and Label 2 among Adolescent Boys and Girls Post Intervention (percent scores)	251
4.4.17	Mean Knowledge Scores on Three Major Components of Food Labels among Adolescents	253
