

LIST OF FIGURES

Figure No.	Contents	Page No.
2.1	Stages of Nutrition Transition	20
2.2	Outcomes of the combined effect of Globalization, Nutrition Transition and Urbanization	23
2.3	Nutrient Intake as percent of Energy Consumption in India	24
2.4	Distribution of Disease Burden in India and the World	24
2.5	Disease Burden Estimates (1990) and Projections (2020) in India	25
2.6	Proposed Changes for Allergen Labeling by FALCPA	46
2.7	Keyhole symbol	59
2.8	Facts-up-Front Labeling	60
2.9	Traffic light labeling system recommended by Food Standards Agency	60
2.10	Variants of Traffic light signposting used by Various manufacturers in UK	61
2.11 (a)	Commonly Adopted GDA labeling	62
2.11 (b)	Color coded GDA labeling	62
2.12	Understanding GDAs	63
2.13	National Heart Foundation Symbol	64
2.14	Smart Choice Symbol	66
2.15	Guiding Stars Symbol (one star, two stars and three stars)	66
2.16	Variants of Healthier Choice Pyramid	67
2.17	Sensible solution Symbol	68
3.1	Schematic diagram of experimental design	87

Figure No.	Contents	Page No.
3.2	Schematic Diagram Representing Sampling Design for Consumer Enrollment	88
4.1.1	Distribution of Consumers with respect to Body Mass Index (BMI) and Age-group Categories According to Asia Pacific Criteria, 2004 (in percentage)	114
4.1.2	Most Popular Processed Packaged Foods Consumed by the Consumers from Various Food Categories (in percentage)	115
4.2.1	Kind of Nutrition Facts Panel (NFP) Displayed on Food Labels in Total Products (in percentage)	123
4.2.2	Reporting of Mandatory Nutrients on NFP in Total Products (in percentage)	126
4.2.3	Processed Packaged Foods High in Energy (≥ 400 Kcal/100g) as per USFDA Criteria in Various Food groups (in percentage)	129
4.2.4	Processed Packaged Foods High in Fat ($\geq 35\%$ of the Total Energy from Fat) as per USFDA Criteria in Various Food Groups (in percentage)	130
4.2.5	Food Products Reporting High Content of Two or More Than Two Nutrients According to UK-FSA Criteria in Various Food Groups (in percentage)	131
4.2.6	Low, Medium or High content of Fat, SFA, Sugar and Salt as per UK-FSA Criteria in Total Products (in percentage)	132
4.2.7	Difference in Reported and Calculated Values of Energy, Fat and Calories from Fat (in percentage)	134
4.2.8	Ingredients List Compliance with FSSAI of India in Various Food Groups (in percentage)	136
4.2.9	Listing of More than One Source of "Ingredients of Concern" in Ingredients List in Total Products (in percentage)	138
4.2.10	Sources of Trans Fatty Acids (TFAs) in Ingredients List and their Substantiation by NFP in Various Food Groups (in percentage)	142
4.2.11	Allergen Declaration on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	148

Figure No.	Contents	Page No.
4.2.12	Health Claims Declared on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	151
4.2.13	Nutrient Claims Declared on Food Labels of Processed Packaged Foods in Total Products (in percentage)	155
4.2.14	Nutrient Claims Declared on Food Labels of Processed Packaged Foods in Various Food Groups (in percentage)	156
4.2.15	Reporting and Substantiation of Nutrient Claims by NFP (in percentage)	162
4.2.16	Substantiation of Nutrient Claims by NFP according to Codex Alimentarius Guidelines (in percentage)	163
4.2.17	Substantiation of Nutrient Claims by NFP and Ingredients List (in percentage)	164
4.2.18	Ingredient Claims Declared on Food Labels of Processed Packaged Foods in Total Products (in percentage)	165
4.2.19	Substantiation of Ingredients Claim by NFP and Ingredients List (in percentage)	169
4.2.20	Symbols and Logos displayed on Food Labels of Processed Packaged Foods in Total Products (in percentage)	170
4.2.21	Format of Labeling “Manufacture (MD) and Best Before date (BB)” on Food Labels of Processed Packaged Foods in Total Products (in percentage)	175
4.3.1	Reporting of “Nutrients of Concern” on NFP of Selected Processed Packaged Foods (in percentage)	179
4.3.2	Difference in Reported and Analyzed Values of “Nutrients of Concern” in Total Products Selected (n=101) for Nutrient Analysis (in percentage)	179
4.3.3	Nutrients of Concern as Low, Medium or High in Analyzed Processed Packaged Foods as per UK-FSA Criteria (in percentage)	210
4.3.4	Processed Packaged Foods High in Fat, Sugar and Sodium Content as per UK-FSA Criteria and Substantiation by Ingredients List (in percentage)	211

Figure No.	Contents	Page No.
4.4.1	Reasons for Processed Packaged Food Consumption by the Consumers in Total Population (in percentage)	226
4.4.2	Non-Nutritional Factors Considered by the Consumers while Purchasing Processed Packaged Foods (in percentage)	227
4.4.3	Nutritional Factors considered by the Consumers while Purchasing Processed Packaged Foods (in percentage)	229
4.4.4	Reasons for Examining Food Labels by the Consumers (in percentage)	233
4.4.5	Reasons for not Examining Food Labels by the Consumers (in percentage)	234
4.4.6	Examining and Understanding the Use of Three Major Components of Food Labels by the Consumers (in percentage)	236
4.4.7	Information Looked on NFP during Processed Packaged Food Purchase by the Consumers (in percentage)	238
4.4.8	Comprehension of Four Kinds of NFPs by the Consumers (in percentage)	243
4.4.9	Percent Knowledge Scores of Consumers on Food Labeling (in percentage)	244
4.4.10	Nutrients Considered by the Consumers while Evaluating Four Kinds of NFPs (in percentage)	245
4.4.11	Difficult to Understand NFPs Reported by the Consumers (in percentage)	246
4.4.12	Terminologies Difficult to Understand on NFP as Reported by the Consumers (in percentage)	246
4.4.13	Understanding of Various Components of Food Labels in Label 1 and Label 2 among Adolescents Post Intervention (percent scores)	250
4.4.14	Understanding of Three Major Components of Food Labels among Adolescents-Pre and Post Intervention (percent scores)	252
4.4.15	Increase in awareness among Adolescent Consumers regarding Symbols and Logos	253

Figure No.	Contents	Page No.
4.4.16	Increase in Awareness among Adolescent Consumers about Nutrient Claims	254
4.4.17	Increase in Awareness among Adolescent Consumers about Health Claims, Information about Colors and Flavors and Allergen	255
