

## LIST OF ILLUSTRATIONS

1*	Main Types of Postnatal Growth of the various parts and Organs of the body ... ..	32
2**	Two periods of Catch-up Growth following episodes of anorexia nervosa in a young child	40
Ia	Mean stature + 1 standard deviation of urban lower males : Cross-sectional Data ...	119
Ib	Mean stature + 1 standard deviation of urban lower females : Cross-sectional Data ...	120
Ic	Mean stature + 1 standard deviation of rural lower males : Cross-sectional data ...	121
Id	Mean stature + 1 standard deviation of rural lower females : Cross-sectional Data ...	122
IIa	Percentile graphs: Stature urban lower males Cross-sectional Data ... ..	123
IIb	Percentile Graphs: stature urban lower females cross-sectional data ... ..	124
IIc	Percentile graphs: stature rural lower male infants. Cross-sectional Data ... ..	125
IId	Percentile graphs: stature rural lower females cross-sectional data ... ..	126
III	Graphs of Mean monthly increment in stature of male and female infants aged 1-15 months: From higher and lower urban area. Longitudinal data ... ..	128
IV-1	Graphs of mean monthly increments in stature superimposed with selected individual graphs of monthly increment in stature : Lower urban males - Longitudinal Data ...	129
IV-2	Graphs of mean monthly increments in stature superimposed with selected individual graphs of monthly increment in stature : Lower urban males and females. Longitudinal Data ...	130
IV-3	Graphs of mean monthly increments in stature superimposed with selected individual graphs of monthly increment in stature : Lower urban females - Longitudinal Data ... ..	131

---

\* After Scammon : The measurement of the body in childhood, The measurement of man, University of Minnesota Press.

\*\* From Prader, Tanner and Von Harnack, 1963.

Va	Mean stem height + 1 standard deviation of urban lower males : Cross-sectional Data ...	133
Vb	Mean stem height + 1 standard deviation of urban lower females : Cross-sectional Data ...	134
Vc	Mean stem height + 1 standard deviation of rural lower males : Cross-sectional Data ...	135
Vd	Mean stem height + 1 standard deviation of rural lower females : Cross-sectional Data ...	136
VIa	Percentile graphs : stem height urban lower males cross-sectional data ...	137
VIb	Percentile graphs : Stem height urban lower females - Cross-sectional Data ...	138
VIc	Percentile graphs : stem height rural lower males - Cross-sectional Data ...	139
VIId	Percentile graphs : stem height rural lower females. Cross-sectional Data ...	140
VII	Graph of mean monthly increase in stem height of male and female infants aged 1-15 months from lower socio-economic class of the urban area. Longitudinal Data...	142
VIII-1	Graphs of mean monthly increments in stem height superimposed with selected individual graphs of monthly increment in stem height lower urban male. Longitudinal Data ...	143
VIII-2	Graphs of mean monthly increments in stem height superimposed with selected individual graphs of monthly increment in stem height lower urban female. Longitudinal Data ...	144
VIII-3	Graphs of mean monthly increments in stem height superimposed with selected individual graphs of monthly increment in stem height lower urban female. Longitudinal data ...	145
IXa	Mean head circumference + 1 standard deviation of urban lower males. Cross-sectional Data ...	152
IXb	Mean head circumference + 1 standard deviation of urban lower females cross-sectional data..	153
IXc	Mean head circumference + 1 standard deviation of rural lower males. Cross-sectional Data	154
IXd	Mean head circumference + 1 standard deviation of rural lower females. Cross-sectional Data	155

Xa	Percentile graphs: Head circumference urban lower males. Cross-sectional data	...	157
Xb	Percentile graphs : Head circumference urban lower females. Cross-sectional Data	...	158
Xc	Percentile graphs : Head circumference rural lower males. Cross-sectional Data	...	159
Xd	Percentile graphs : Head circumference rural lower females. Cross-sectional Data	...	160
XI	Graphs of mean monthly increments in head circumference of male and female infants aged 1-15 months from lower socio-economic class of urban area. Longitudinal Data	...	161
XII-1	Graphs of mean monthly increments in head circumference superimposed with selected individual graphs of monthly increment in head circumference lower urban male. Longitudinal Data	... ..	162
XII-2	Graphs of mean monthly increments in head circumference superimposed with selected individual graphs of monthly increment in head circumference lower urban female. Longitudinal Data	... ..	163
XIIIa	Mean chest circumference + 1 standard deviation of urban lower Males: Cross-sectional Data	... ..	164
XIIIb	Mean chest circumference + 1 standard deviation of urban lower Females. Cross-sectional Data	... ..	165
XIIIc	Mean chest circumference + 1 standard deviation of rural lower males : Cross-sectional Data...		166
XIIId	Mean chest circumference + 1 standard deviation of rural lower females : Cross-sectional Data		167
XIV a	Percentile graphs: Chest circumference urban lower males. Cross-sectional Data	...	169
XIV b	Percentile graphs : Chest circumference urban lower females. Cross-sectional Data	...	170
XIV c	Percentile graphs: Chest circumference rural lower males. Cross-sectional Data	...	171
XIV d	Percentile graphs : Chest circumference rural lower females. Cross-sectional Data	...	172
XV	Graphs of mean monthly increments in chest circumference of male and female infants aged 1-15 months from lower socio-economic class of urban area. Longitudinal data	...	173

XVI-1	Graphs of mean monthly increments in chest circumference superimposed with selected individual graphs of monthly increment in chest circumference lower urban male. Longitudinal Data	... ..	175
XVI-2	Graphs of mean monthly increments in chest circumference superimposed with selected individual graphs of monthly increment in chest circumference lower urban female. Longitudinal Data	... ..	176
XVII-1	Distance graph of mean head circumference and mean chest circumference of urban male : infants belonging to lower socio-economic group : As they grow from 1 month to 15 months. Longitudinal Data	... ..	177
XVII-2	Distance graph of mean head circumference and mean chest circumference of urban female: Infants belonging to lower socio-economic group: As they grow from 1 month to 15 months. Longitudinal Data	... ..	178
XVIIIa	Mean weight $\pm$ 1 standard deviation of urban lower males : Cross-sectional Data	... ..	185
XVIIIb	Mean weight $\pm$ 1 standard deviation of urban lower females : Cross-sectional Data	... ..	186
XVIIIc	Graph of mean weight $\pm$ 1 standard deviation of male infants aged 1 to 15 months of lower socio-economic group of rural area	... ..	187
XVIId	Graph of mean weight $\pm$ 1 standard deviation of female infants aged 1 to 15 months of lower socio-economic group of rural area.	... ..	188
XIXa	Percentile graphs : Weight urban lower males. Cross-sectional Data	... ..	190
XIXb	Percentile graphs : Weight urban lower females Cross-sectional Data	... ..	191
XIXc	Percentile graphs : Weight Rural lower males. Cross-sectional Data	... ..	192
XIXd	Percentile graphs : Weight rural lower females Cross-sectional Data	... ..	193
XX	Monthly mean increase in weight of male and female infants aged 1-15 months from urban lower and higher socio-economic groups. Longitudinal Data	... ..	194

XXI-1	Graphs of mean monthly increments in weight superimposed with selected individual graphs of monthly increment in weight lower urban male. Longitudinal Data ... ..	196
XXI-2	Graphs of mean monthly increments in weight superimposed with selected individual graphs of monthly increment in weight lower urban male and female. Longitudinal Data ...	197
XXI-3	Graphs of mean monthly increments in weight superimposed with selected individual graphs of monthly increment in weight lower urban female - Longitudinal Data ... ..	198
XXII	Three graphs depicting the relationship between the head circumference and chest circumference with age in months as a parameter on the graphs ... ..	212
XXIII	Graphs of mean quarterly increments in stature of male and female infants aged 1-15 months from higher and lower socio-economic urban area. Longitudinal Data ...	333
XXIV	Graphs of mean quarterly increments of stem height of male and female infants of lower socio-economic class of urban area. Longitudinal Data ... ..	334
XXV	Graphs of quarterly mean increase in head circumference of male and female infants aged 1-15 months from lower socio-economic class of the urban area. Longitudinal Area ...	335
XXVI	Graphs of quarterly mean increment in chest circumference of male and female infants aged 1-15 months from lower socio-economic class of the urban area. Longitudinal area ...	336
XXVII	Quarterly mean increase in weight showing quarterly rate of growth. Longitudinal Sample	337

Illustrations XXIII to XXVII are included in Appendix II.
