

List of Figures

2.1	Variation of p against $\frac{r^2}{R^2}$ in the core and variation of p_r, p_\perp against $\frac{r^2}{R^2}$ in the envelope.	29
2.2	Variation of ρ against $\frac{r^2}{R^2}$ throughout the distribution.	30
2.3	Variation of $\frac{dp}{d\rho}$ against $\frac{r^2}{R^2}$ in the core and variation of $\frac{dp_r}{d\rho}, \frac{dp_\perp}{d\rho}$ against $\frac{r^2}{R^2}$ in the envelope.	30
3.1	Variation of p_r, p_\perp against $\frac{r^2}{R^2}$ in the core and variation of p against $\frac{r^2}{R^2}$ in the envelope for $f = 0.7$	48
3.2	Variation of ρ against $\frac{r^2}{R^2}$ throughout the distribution for $f = 0.7$. . .	49
3.3	Variation of $\frac{dp_r}{d\rho}, \frac{dp_\perp}{d\rho}$ against $\frac{r^2}{R^2}$ in the core and variation of $\frac{dp}{d\rho}$ against $\frac{r^2}{R^2}$ in the envelope for $f = 0.7$	49
3.4	Variation of $\rho - p_r - 2p_\perp$ against $\frac{r^2}{R^2}$ in the core and variation of $\rho - 3p$ against $\frac{r^2}{R^2}$ in the envelope for $f = 0.7$	50
3.5	Variation of polytropic index γ at the centre and at the surface against f	51
5.1	Variation of ρ against z throughout the distribution	69
5.2	Variation of p against z in the core	70
5.3	Variation of p_r and p_\perp in the envelope	70
5.4	Variation of $\frac{dp}{d\rho}$ against z in the core	71
5.5	Variation of $\frac{dp_r}{d\rho}$ and $\frac{dp_\perp}{d\rho}$ against z in the envelope	71

6.1	Variation of density (ρ) against the radial parameter r	84
6.2	Variation of pressure (p_r and p_\perp) against the radial parameter r . . .	85
6.3	Variation of $\frac{dp_r}{d\rho}$ against the radial parameter r	85
6.4	Variation of anisotropic parameter $S(r)$ against the radial parameter r	86
6.5	Variation of $\rho - p_r - 2p_\perp$ against the radial parameter r	86
6.6	Variation of $v_{sr}^2 - v_{sp}^2$ against the radial parameter r	87
6.7	Variation of radial pressure against density.	88
