

ACKNOWLEDGEMENTS

First of all, I would like to convey my deepest gratitude to my guide Prof. S. Rama Mohan, who did not just guide me but also kept on motivating me throughout my journey of Ph.D. He stood by me whenever I needed him. It's only due to his caring and supportive approach, scholarly advices with technical support and timely help that I could complete my research work.

I sincerely thank Prof. D. C. Vakaskar, HOD, Department of Applied mathematics, MSU for his constant support, help and guidance. I extend my thanks to entire teaching & non-teaching staff of the dept. of Applied mathematics, MSU and especially to Dr. Bharat Ratanpal and Dr. Snehal Rao for their help and support. I must not forget to thank Prof. V. D. Pathak for introducing me to my guide Prof. Rama mohan.

I thank managements and authorities of both of the teaching institutions (ARIBAS, New V.V. Nagar, Shroff S. R. Rotary Institute of Chemical Technology (SRICT), Vataria and Marwadi Education Foundation's Group of institutions (MEFGI), Rajkot), for allowing me to carry out my research work during my regular service and also to the staff of both institutions for being wonderful colleagues.

Special thanks are due to Irshadbhai whose generous sharing of scrumptious lunch, friendly advices and joyful company made my research experience enjoyable. It would be unfair, if I don't thank my ex-colleagues and lifetime friends Dr. Brijesh Jajal, Dr. Rajiv Vaidya and Dr. Hiren Soni ('Chatushkon') for their love, support, advices and care. My best friends Bhavik, Mital, Daxesh & Yogesh deserve special mention.

Last, but not the least, I would like to thank my family members for their continuous and unconditional love and support, without which I could have never been the person who I am today.
