

LIST OF TABLES

Table No.	Table Heading	Page No.
1.1	Levels of Parallelism	9
1.2	Different Phases of Static Structural Analysis	12
5.1	Comparison of Maximum Joint Displacement at Top	107
5.2	Comparison of Maximum Axial Force at Bottom	107
5.3	Comparison of Reactions at One Support	107
6.1	Tasks for Distributed Implementation of FEM	118
6.2	Comparison of Analysis and Reference Results	126
6.3	Time Required for Sequential and Parallel Processing	128
6.4	Comparison of Displacement Coefficient	132
6.5	Time Required for Sequential and Parallel Processing	135
6.6	Deflection Coefficient for Skew Plate	137
6.7	Coefficients for Maximum Moment at Center of Plate	138
6.8	Coefficient for Maximum Moment at Free Edge	138
6.9	Time Required for Sequential and Parallel Processing	139
6.10	Time Required to Derive Stiffness Matrix & Load Vector	141
6.11	Time Required for Various Processes	142
6.12	Comparison of Time in Sequential & Distributed Processing	143
7.1	Data for Various Examples	151
7.2	Comparison of Natural Frequency of First Three Modes	153
7.3	Comparison of Frequency with Different Substructures	159
7.4	Comparison of Time Required with Different Computers	160
8.1	Sample Training Data Sets for Biaxially Loaded Columns	168
8.2	Comparison of Time Required for Training	171
9.1	Time Consumed in Various Processes	181
10.1	Comparison of Results – Plane Truss Problem	198
10.2	Details of Member Grouping	199
10.3	Comparison of Results – 25 Bar Truss Problem	200
10.4	Comparison of Time	200

11.1	Subtasks for Distributed Analysis of Laminated Composite	216
11.2	Comparison of Calculated and Reference Results	220
11.3	Time Required for Sequential and Parallel Processing	221
12.1	List of Tasks for Nonlinear Analysis	236
12.2	Comparison of Displacements at Different Loads	239
12.3	Comparison of Timing for First Alternative	240
12.4	Comparison of Timing for Second Alternative	242
