

Acknowledgement

The foremost support which I have incurred up to this stage is from my parents for building my bright future. My mother, Meenaben Patel has shouldered so many responsibilities at my personal level, so I could focus in my professional life during my research work, which has made this doctorate process a success. My father, Kiritbhai Patel is the constant source of motivation to me who has built my strong study base during my schooling period which has been helpful to me throughout my research carrier. He has furnished me with education and knowledge, so I could become confident and ambitious.

The major contribution which I have acquired during the doctoral program is obtained from my research guide Dr. Naveen Kumar Acharya who gave me the opportunity to grow by developing my abilities in this field area. He has always given his valuable time to discuss various aspects related to my work. Without his constant support, guidance, motivation and discussion, this work would not be completed.

I wish to express my deepest gratitude to the architectures of my carrier (all the teachers from my play school to this stage) who have feed me with their incredible knowledge and made me capable to defense any challenges during my study period. I wish to thanks to Dr. B. S. Chakrabarty, Head of Applied Physics Dept. and Prof. Arun Pratap, Dean of Faculty of Tech. & Eng. for their generous advice and support during the research work.

I am very thankful to my beloved husband Jigar Patel and my younger siblings Dhara and Deep for their moral support and appreciation. I express

my deep sense of profound respect to my grandparents and my in laws for their blessings. I am grateful to Deepak uncle and Neeta aunty for their appreciation and motivation in acquiring higher study. I am also thankful to Ghanashyam uncle for his support in manufacturing my system equipment. I wish to thank my best friend Abhishek Panchal for his constant motivation and wishes.

I am very thankful to my friend Vismay Trivedi for his finest efforts in establishing instrumentation system in the laboratory. I wish to express my thanks to all my friends of applied physics department Sohan, Laxmi, Kevil, Nakul, Sonal, Priyanka, Mugdha, Dhavalbhai, Kavita madam and Nimit. I am thankful to M.Sc. Students Nilesh and Shreya for their best wishes. The teaching and non-teaching staff of applied physics department is also an integral part of the acknowledgement.

I wish to acknowledge UGC for honoring BSR RFSMS fellowship during the course of work. I am also thankful to Mehjal Enterprises, Gayatri Engineering, Baroda Scientific Glass Works, Labthink (China), PerkinElmer and TA Instruments for providing technical support.

Last but not least, I am very thankful to God to provide enough potential and courage, so I could remove barriers which came in my path and could accomplish the task.

Avani K. Patel
