

TABLE OF CONTENTS

LIST OF ABBREVIATIONS.....	4
LIST OF FIGURES	5
LIST OF TABLES.....	7
ABSTRACT.....	8
1 INTRODUCTION AND REVIEW OF LITERATURE.....	9
1.1 Regulation of gene expression in bacteria	9
1.1.1 Regulation at transcription level	9
1.1.2 Regulation at translation level	10
1.2 Small Regulatory RNAs	10
1.2.1 Classification of sRNAs in Bacteria	11
1.3 Mechanism of gene regulation mediated by sRNAs.....	18
1.3.1 Translation repression.....	18
1.3.2 Translational activation.....	19
1.3.3 Interference with ribonucleolytic decay.....	20
1.4 Identification of small regulatory RNAs in Bacteria	20
1.4.1 Bio-computational approach.....	21
1.4.2 Experimental approach for sRNA identification	22
1.5 Identification of mRNA targets for sRNA.....	24
1.5.1 Computational programs for target prediction.....	24
1.5.2 Experimental approach for target identification	26
1.6 Small RNAs in pathogenic bacteria.....	28
1.6.1 sRNAs involved in stress response and metabolism.....	28
1.6.2 sRNAs regulating host-pathogen interactions	29
1.6.3 sRNAs in regulatory networks.....	30
1.7 <i>Staphylococcus aureus</i> – A human pathogen	32
1.7.1 <i>Staphylococcus aureus</i> Newman	32
1.8 Small regulatory RNAs in <i>S. aureus</i>	33
1.8.1 sRNAs involved in metabolic regulation.....	33
1.8.2 sRNAs that couples quorum sensing to virulence	33
1.8.3 sRNAs expressed from pathogenicity island	34
1.9 Virulence factors of <i>Staphylococcus aureus</i>	37
1.9.1 Surface associated virulence factors	39
1.9.2 Secreted virulence factors	40

1.10	Principal genetic regulations involved in <i>S. aureus</i> virulence	43
1.10.1	Two-component system	43
1.10.2	SarA	46
1.10.3	Alternative Sigma factor (σ^B)	46
1.10.4	RNases in <i>S. aureus</i>	46
1.11	Potential use of bacterial sRNAs	48
1.11.1	As biomarkers	48
1.11.2	Targeting sRNAs for antimicrobial therapy	48
2	PRESENT STUDY	50
3	MATERIALS AND METHODS	52
3.1	Bacterial strains and plasmids.....	52
3.2	Media, chemicals, enzymes and kits.....	53
3.3	Media and Growth conditions.....	53
3.4	Bioinformatic tools used in the study	54
3.4.1	Sequence retrieval.....	54
3.4.2	Target prediction and secondary structure.....	54
3.4.3	Primer design	54
3.4.4	<i>in silico</i> restriction analysis.....	54
3.5	Molecular biology techniques.....	54
3.5.1	Isolation of genomic DNA from <i>S. aureus</i>	54
3.5.2	Isolation of plasmid DNA from <i>E. coli</i> and <i>S. aureus</i>	55
3.5.3	Polymerase Chain Reaction (PCR).....	55
3.5.4	Restriction enzyme digestion.....	56
3.5.5	Agarose gel electrophoresis	57
3.5.6	Elution of DNA from agarose gels	57
3.5.7	Ligation	57
3.5.8	Transformation in <i>E. coli</i> and <i>S. aureus</i>	57
3.5.9	Cloning of RsaF in multicopy plasmid	58
3.5.10	Construction of <i>rsaF</i> disruption strain.....	58
3.5.11	DNA/RNA hybridization studies.....	59
3.6	Quantitative Real time PCR (qRT-PCR) assays.....	61
3.7	Hyaluronate lyase activity measurements.....	61
3.8	Assessment of biofilm formation.....	61
3.8.1	Quantitative biofilm assay	61

3.8.2	Confocal microscopy of biofilms	62
3.9	Detection of Protease activity by zymography	62
3.10	RNA/RNA interaction	63
3.10.1	<i>In vitro</i> transcription, elution and labeling of RNA	63
3.10.2	Electrophoretic mobility shift assay	63
3.11	Assay for mRNA stability	63
4	RESULTS AND DISCUSSION.....	65
4.1	<i>In silico</i> analysis of RsaF – a small non-coding RNA of <i>Staphylococcus aureus</i> ...	65
4.2	Interaction of RsaF with selected putative mRNA targets.....	68
4.3	Overexpression of RsaF from a multi-copy plasmid	68
4.4	Disruption of RsaF chromosomal copy with kanamycin resistance marker.....	69
4.5	Confirmation of <i>rsaF</i> gene disruption in <i>S. aureus</i> Newman	72
4.6	Expression analysis of RsaF in modified <i>S. aureus</i> strains	73
4.7	Influence of altered RsaF levels on the expression of hyaluronate lyase (HysA) ...	74
4.7.1	RsaF positively influences the expression of HysA in <i>S. aureus</i> Newman	74
4.7.2	Influence of RsaF on biofilm formation	75
4.8	RsaF positively influences the expression of serine protease like protein D (SplD) in <i>S. aureus</i> Newman	77
4.9	RsaF directly interacts with <i>hysA</i> and <i>splD</i> mRNAs	78
4.9.1	Influence of RsaF on <i>hysA/splD</i> mRNA stability	79
4.10	Regulatory network of HysA and SplD	80
4.11	Significance of sRNA RsaF in <i>S. aureus</i> Newman.....	81
5	SUMMARY	83
6	CONCLUSIONS.....	85
7	REFERENCES.....	86
	APPENDIX I	105
	APPENDIX II	107
	PUBLICATION.....	108
	POSTER PRESENTATIONS IN MEETINGS	108
