

Acknowledgement

I bow down to Lord Shiva and Maa Parvati, and pray that they continue showering their blessings on me. My faith and belief in them has helped me throughout this research period.

First and foremost, I would like to acknowledge and thank the invaluable support and guidance of my guide, Dr. Mamta Padole, Associate Professor, Department of Computer Science & Engineering, Faculty of Technology & Engineering, The Maharaja Sayajirao University of Baroda, Vadodara. From the beginning of the journey for research work, she has constantly motivated and challenged me to grow my perspective and deeper understanding to take this work to this level. Many ideas and inputs came from her to do this challenging task in a preeminent way. I am deeply indebted to her for her guidance and advice throughout my journey. There are many people who supported me along this journey. I would like to take this opportunity to thank each and every one.

I don't have enough words to express my deep gratitude towards Dr. Hari Vasudevan who have been a constant source of encouragement in all that I do. Nothing that I will ever do can even come close to his blessings and support for me.

During my Ph.D., I realized how difficult and time-consuming it is to do research work. I would like to thank my darling parents for bearing with the inconvenience during this period of my research work and for motivating and standing beside me in this strenuous journey. I would like to thank my mom and dad for showing their support and faith in me.

I thank my Vasant Kaki and Haresh kaka whose support and care helped me to move ahead. In addition, I would also like to thank my students for their support. I am also thankful to all the researchers and authors whose research work gave direction to my work and helped me to carry out this Research.

Last but not least, I am thankful to all my friends, well-wishers, students who directly or indirectly supported me throughout the duration of research.

Pratik Kanani
