Synopsis.....iii

Acknowledgement.....viii

CHAPTER 1 Introduction1

1.1 General.....1

1.2 Importance of Clean Power.....2

1.3 Basics of Power Quality.....2

1.4 Power Quality Problems.....10

1.4.1 Sources of Power Quality Problems11

1.4.2 Generic Power Problems.....11

1.4.3 Responsibility of utility12

1.5 The Most Common Power Quality Problems.....12

1.6 An Overview of Power Problems, Their Causes and Effects.....14

1.7 Power Quality Solutions.....15

1.7.1 Surge Suppressors.....15

1.7.2 Voltage Regulator.....15

1.7.3 Generator.....16

1.7.4 Filters17

CONTENTS

1.8 Active Filter.....8

1.8.1 Shunt Active Filter.....18

1.8.2 Series Active Filter.....18

1.8.3	Shunt Series Active Filter.....	19
1.9	Harmonic Standards.....	19
1.10	State of Art.....	20
1.11	The Motivation.....	25
1.12	Organization of the Thesis.....	26
CHAPTER 2	Shunt Active Filter.....	29
2.1	Basic compensation principle of STATCOM.....	29
2.2	Power Flow for Ideal Compensation.....	31
2.3	Estimation of Reference Source Current.....	32
2.4	Role of DC link Capacitor.....	35
2.5	Proposed Control Scheme of STATCOM.....	36
2.5.1	Design of DC Capacitor.....	37
2.5.2	Selection of reference Capacitor Voltage.....	39
2.5.3	Selection of Filter Inductor L_f	41
2.5.4	Design of PI controller.....	42
2.5.5	Hysteresis Controller.....	43
2.6	Proposed Control Block of STATCOM	44
2.7	Operation of Proposed simulation model.....	45
CONTENTS		
2.8	Conclusion	46
CHAPTER 3	Series Active Filter.....	48
3.1	Basic compensation principle.....	48

3.2	Design of Reference Voltage and Control Scheme.....	50
3.3	Proposed Control Block of STATCOM	55
3.4	Proposed Simulation Model of Series Active filter.....	55
3.4	Conclusion.....	56
CHAPTER 4 Unified Power Quality Conditioner.....		50
4.1	Basic configuration of UPQC.....	58
4.2	Specific UPQC.....	59
4.3	Mathematical Modeling of UPQC.....	60
4.4	Proposed UPQC Operating Principle.....	61
4.5	Design of Proposed UPQC Control model.....	62
4.5.1	Design of DC link Bus Capacitor Voltage.....	65
4.5.2	Compensation scheme for Voltage and Current.....	66
4.5.3	Current Detecting method.....	66
4.5.4	Voltage Detecting Method.....	68
4.5.5	Voltage and Current Combined Method.....	68
4.6	Implementation of Proposed control algorithm of UPQC.....	72
4.7	Conclusion.....	73
CHAPTER 5 Simulations and Performance Investigation.....		74
5.1	Introduction.....	74
5.2	Simulation and performance investigation of Shunt APF.....	75
5.2.1	Extraction of Unit Vector Template and Pulse Generation Technique.....	75

CONTENTS

- 5.2.2 Simulation result analysis of Shunt APF (STATCOM)77
- 5.2.3 Performance of STATCOM..... 85
- 5.3 Simulation and Performance Investigation of DVR.....86
 - 5.3.1 Performance of DVR.....92
- 5.4 Simulation and Performance Investigation of UPQC.....92
 - 5.4.1 Simulation result analysis of UPQC.....92
 - 5.4.2 Performance of UPQC.....104
- CHAPTER 6 Conclusions and Future Extension.....105**
 - 6.1 Conclusion.....105
 - 6.2 Future Extension107
- Bibliography.....108**
