

## ACKNOWLEDGMENT

---

It is a matter of great pleasure to express my deep sense of gratitude to my respected Guide, **Dr. J. I. Nanavati**, Professor of Mechanical Engineering Department, M. S. University of Baroda, who has been the real motivating and supporting force behind this innovative investigation. His endless efforts to maintain and operate the blower unit with appropriate technical support to fabricate new test setups have helped me considerably in completing this exhaustive experimental investigation. His critical observations and constant inspiration to work hard with affection and care, interest and deep concern have encouraged me to work sincerely for achieving the goal of timely completion of the work. His immense care in going through the manuscript and important suggestions for improving the same has made it possible to submit the thesis in the presentable format with a number of paper publications at national and international level.

I would like to thank **Shri. G D Karhadkar**, Head of Mechanical Engineering Department who has been kind enough to provide me necessary laboratory facilities and moral support for this research work.

I am thankful to all my colleagues and friends who have offered me their moral and physical support with eagerness to help me in one or the other way during the work.

Finally, I would like to thank my loving wife Aarti and my best friend, my daughter Prajakta and my parents, for their constant moral support, encouragement, social sacrifice and for providing necessary healthy environment to work hard throughout this work.

October 2013

A. S. Mohite
