Abstract	vi
List of Figures	xvii
List of Tables	xxii
List of Symbols	xxvll
Chapter	
1 Introduction	1
Objective	8
Methodology	8
2 Review of Literature	9
2.1 Sources of Steel Plant Waste	10
2.1.1 Slag	15
2.1.1.1 Blast Furnace	15
2.1.1.2 Steelmaking	16
2.1.2 Flue Dust and Sludge	18
2.1.2.1 Blast Furnace	18
2.1.2.2 Steelmaking	19
2.1.2.3 Pollution Control Units	20
2.2 Waste Management	22
2.3 Methods of Beneficiation	23
2.3.1 Milling	24
2.3.2 Magnetic Separation	26
2.3.3 Flotation	26
2.4 Utilization of Steel Plant Wastes	27
2.5 Pelletization	33
2.5.1 Composite Pellets	35
2.5.2 Preparation of Composite Pellets	36
2.5.3 Binders for Composite Pellets	37
2.5.3.1 Inorganic Binders	37

2.5.3.2	Organic Binders	38
2.5.3.3	Combined Binders	40
2.6	Reduction of Composite Pellets	41
2.6.1	Theory of Reduction	41
2.6.2	Pyrolysis of coal	42
2.6.3	Kinetics of Carbothermic Reduction	45
2.7	The advantages and disadvantages of composite pellets	51
2.8	Smelting Reduction Processes	52
2.8.1	Prospects of Iron Ore-Coal Composite Pellets in Smelting Reduction	54
2.8.2	Advantages of Composite Pellets as Feed Material	55
2.8.3	Basic Principle of Smelting Reduction	56
2.8.4	Advantages and Limitations of Smelting Reduction	57
2.8.4.1	Advantages	57
2.8.4.2	Limitations	57
3	Characterization and Beneficiation (Experimental-1)	59
3.1	Characterization and Preparations of Raw Materials	60
3.2	Instrument/Apparatus Used for Characterization and Beneficiation	60
3.2.1	Sieve Shaker	61
3.2.2	Ball Mill	62
3.2.3	X-ray Fluorescence (XRF) Spectrometer	63
3.2.4	Scanning Electron Microscopy (SEM)	65
3.2.5	X-ray Diffractometer	65
3.2.6	Air Classifier	65
3.2.7	Hydro-Classifer (Centrifugal Classifier)	66
3.2.8	Wilfley Tabling	68
3.3	Characterization	69
3.3.1	Size Analysis	69
3.3.2	Chemical Analysis	70
3.3.3	Microscopic Observation of Raw Materials	72

3.3.4	XRD Analysis	72
3.4	Beneficiation	76
3.4.1	Single Stage Beneficiation Method	77
3.4.2	Two Stage Beneficiation Method	84
3.5	Conclusions	87
4	Briquetting and Pelletizing (Experimental – II)	88
4.1	Briquette Preparation	89
4.1.1	Stoichiometric Calculations	89
4.1.2	Binder Selection	90
4.1.3	Briquette preparation	90
4.1.4	Testing of Briquettes	91
4.1.4.1	<i>Drop test</i>	91
4.1.4.2	<i>Compression test</i>	92
4.1.5	Testing Results of Briquettes	92
4.2	Design of Experiments	95
4.2.1	Taguchi Method	95
4.2.2	Steps for Taguchi Method	96
4.2.3	Selection of Parameters and Levels	96
4.2.4	Selection of Orthogonal Array	96
4.3	Bonding Mechanism	113
4.3.1	Corn Starch	113
4.3.2	Corn starch and Molasses	115
4.4	Pellets Preparation	116
4.5	Study of Reducibility	119
4.5.1	Horizontal Tube Furnace	119
4.5.2	Measurement of Rate of Reduction (k) and Activation Energy (E)	121
4.6	Results for Reduction of Composite	122
4.6.1	Results for JSW Dust	122
4.6.2	Results for JSW Sludge	126
4.6.3	Results for VIZAG Sludge	131

4.7	XRD and SEM	136
4.8	Conclusions	138
5	Smelting Reduction (Experimental III)	140
5.1	Smelting Reduction	141
5.2	Induction Furnace	142
5.2.1	Principle	142
5.2.2	Advantages of Induction Furnace	143
5.2.3	Laboratory Induction Furnace	144
5.3	Mould Preparation	145
5.4	Smelting Reduction of Composite Pellet in Induction Furnace	145
5.4.1	Dissolution Behaviour of Composite Pellet	145
5.4.2	Bulk Dissolution of Composite Pellets	146
5.5	Chemical Analysis Using Optical Emission Spectrometer (OES)	147
5.6	Results of Bulk Dissolution of Composite Pellets	149
5.6.1	JSW Dust	149
5.6.2	JSW Sludge	151
5.6.3	VIZAG Sludge	154
5.7	Microstructure of Products (i.e. Steel/Cast Iron)	157
5.8	Conclusions	158
6	Summary and Conclusion	159
6.1	Summary	160
6.2	Conclusions	165
6.3	Suggestions for Further Work	167
