

TABLE OF CONTENTS

	Page
List of Figures.....	IX
List of Tables	XIX
 CHAPTER 1 – INTRODUCTION	 1
1.0 Introduction to Composites	1
1.1 Textile Composites	1
1.2 Aim of the study	5
 CHAPTER 2 - LITERATURE SURVEY	 7
2.0 Introduction	8
2.1 Historical importance of Composites	8
2.2 Market scenario for Textile Composite	9
2.3 Textile Composite	11
2.4 Reinforcement	13
2.4.1 Carbon fibre	14
2.4.2 Aramid fibre	17
2.4.3 HDPE	18
2.5 Matrix/Resin material	19
2.5.1 Types of Matrix	20
2.5.1.1 Thermoset resin	20
2.5.1.1.1 Epoxy resin	21
2.5.1.2 Thermoplastic resin	23
2.6 Laminates	23
2.6.1 Types of Lay-up sequence	24
2.6.2 Importance of angle of lay-up (skew angle) in laying sequence of textile composite	25
2.7 Method of preparation of Textile composite	28
2.7.1 Hand lay-up technique	28
2.8 Cutting of the composite sample	31

2.9	Testing and Analysis	31
2.9.1	Physical properties	32
2.9.1.1	Fibre volume fraction	32
2.9.2	Mechanical properties	35
2.9.2.1	Tensile properties	36
2.9.2.2	Flexural properties	37
2.9.2.3	Impact properties	38
2.9.2.4	Damage resistance properties	44
2.9.3	Fracture Analysis	47
2.9.3.1	Scanning Electron microscope (SEM)	48
2.9.3.2	Fracture mechanism	49
2.10	Application fields of textile composite	50
2.11	Numerical simulation of woven composite laminates	52
2.11.1	Hierarchy of Textile structure	56
2.11.2	History and Advantage: FEM for composite Structures	62
2.11.3	Finite Element Modelling	63
2.12	Objectives	66
CHAPTER 3 - EXPERIMENTAL: SET-UP, PROCEDURE AND MATERIAL		68
3.0	Introduction	69
3.1	Methodology	69
SECTION - I		
3.2	Weaving of hybrid fabric	70
3.2.1	Materials	70
3.2.2	Experimental methods	71
3.2.2.1	Preparation of fabrics on sample loom	71
A.	Preparation of sample on handloom	71
B.	Preparation of sample on power-loom	73
C.	Preparation of sample on CCI sample loom	73
SECTION - II		
3.3	Preparation of composite sample	80
3.3.1	Conjectural Trials	80
3.3.2	Preparation of appropriate fabric specimen for required composite	82
3.3.3	Preparation of matrix	83

3.3.4	Fabrication of the textile polymer composite laminate (TPCL)	86
3.3.4.1	Laminate Stacking sequence	90
3.3.4.2	Preparation of specimen for testing	94
SECTION - III		
3.4	Testing and Analysis	95
3.4.1	Physical properties	98
3.4.1.1	Dimension measurement	98
3.4.1.2	Density measurement	98
3.4.1.3	Fibre volume fraction	102
3.4.2	Mechanical properties	103
3.4.2.1	Tensile properties	104
3.4.2.2	Flexural properties	108
3.4.2.3	Impact properties	111
3.4.2.4	Damage resistance properties	113
3.4.3	Fracture analysis	118
3.4.3.1	Scanning electronic microscope (SEM)	118
CHAPTER 4 – RESULT AND DISCUSSION.....		120
4.0	Introduction	121
4.1	Comparing the properties of differently oriented textile polymer composite laminate (TPCL)	122
4.2	Physical properties	124
4.2.1	Density	124
4.2.2	Fibre volume fraction	125
4.3	Mechanical properties	127
4.3.1	Tensile strength	127
4.3.1.1	Effect of skew angle of fabric orientation on tensile properties of TPCL	131
4.3.1.2	Effect of weave structure of fabric on tensile properties of TPCL	134
4.3.1.3	Effect of type of reinforced yarn on tensile properties of TPCL	138
4.3.1.4	SEM analysis	139
4.3.2	Flexural strength	142

4.3.2.1	Effect of skew angle of fabric orientation on flexural properties of TPCL	143
4.3.2.2	Effect of weave structure of fabric on flexural properties of TPCL	144
4.3.2.3	Effect of type of reinforced yarn on flexural properties of TPCL	146
4.3.2.4	SEM analysis	148
4.3.3	Impact strength	153
4.3.3.1	Effect of skew angle of fabric orientation on impact properties of TPCL	153
4.3.3.2	Effect of weave structure of fabric on impact properties of TPCL	156
4.3.3.3	Effect of type of reinforced yarn on impact properties of TPCL	157
4.3.3.4	SEM analysis	158
4.3.4	Damage resistance strength	160
4.3.4.1	Effect of skew angle of fabric orientation on damage resistance properties of TPCL	160
4.3.4.2	Effect of weave structure of fabric on damage resistance properties of TPCL	164
4.3.4.3	Effect of type of reinforced yarn on damage resistance properties of TPCL	167

CHAPTER 5 – NUMERICAL EVALUATION OF TENSILE STRENGTH OF COMPOSITES USING FINITE ELEMENT METHOD 170

SECTION - IV

5.0	Introduction	171
5.1	Fabric composites and its material properties	171

5.2	FEM Implementation	173
5.2.1	Mesh Formation	173
5.2.2	Stiffness Matrix and System of Equations	175
5.3	Result and discussion	176
5.3.1	Longitudinal Results	176
5.3.2	Transverse Results	190
5.4	Summary and statistical significance	203
5.5	Conclusion	210
CHAPTER 6 – CONCLUSION AND FUTURE SCOPE		212
Abbreviations		222
Appendices.....		223
Appendix – I CCI SW550 Mini warpers		224
Appendix – II CCI Evergreen Rapier Machine		225
Appendix – III Density measurement		226
Appendix – IV Fibre volume fraction		227
Appendix – V TENSILE TEST MACHINE (Universal Testing Machine)		228
Appendix – VI FLEXURAL TEST MACHINE (Universal Testing Machine)		229
References		230
