

Acknowledgements

My sincere gratitude extends to one and all who have supported, influenced, motivated, inspired, criticized, helped, cared for, corrected, praised, pampered, and challenged me during my research tenure.

Foremost, I would like to express my sincere gratitude to my guide Prof. C. N. Murthy for the continuous support during my Ph.D study, and also for his patience, motivation, enthusiasm, and immense knowledge. His guidance helped me in all the time of research and writing of this thesis. I could not have imagined having a better advisor and mentor for my Ph.D study. His truly scientific intuition has made him a constant oasis of ideas and passions in science, which exceptionally inspired and enriched my growth as a student, a researcher and a scientist. I am indebted to him more than he knows. Besides, my advisor my sincere acknowledgement and gratitude also belongs to Prof. Jae-Suk Lee for having led me into a fascinating area of research and afforded me nice scientific surrounding in his laboratory at Department of Nanobio Materials and Electronics, and School of Materials Science and Engineering, Gwangju Institute of Science and Technology, (GIST) Gwangju, South Korea for the last three years. I gratefully acknowledge him for his advice, supervision, and crucial contribution, which made him a backbone of this research and so to this thesis. I shall forever be indebted to both of them for this opportunity to grow.

I gratefully acknowledge Prof. Taihyun Chang (POSTECH, Pohang, Korea) and Dr. S. R. Shah (Chemistry Department, The M.S.University of Baroda) for their valuable contribution and guidance for the work in Chapter 6 of this thesis.

I would like to acknowledge the help of the teaching as well as non-teaching staff in India and also in Korea for their valuable research assistance and advise.

I'm extraordinarily fortunate to have Dr. Rahul Ghildiyal as more than a friend to me. I want to say a big thank you to him for his friendship and help in the past five years. Rahul, I am grateful in every possible way and hope to keep up our acquaintance in the future. Our friendship has become something I will always treasure.

Collective and individual acknowledgements are also owed to my colleagues in India and at GIST, Korea. Many thanks go in particular to Dr. R.B. Yadav, Rajesh (Anna), Dr. Munish Dhiman, Dr. Susheel Chaudhari, Dr.Indrajit Shown, Dr. Sachin Joshi, Dr. Rikesh Joshi, Dr. Romesh, Harish Talele, Vinod, Murali, T. Gangadhar, Mayur, Parimal, Gautam, for giving me such a pleasant time when working together with them since I knew them in The M. S.University of Baroda. I hope I have been able to justify their beliefs which were shared with such honesty.

Special thanks go to Dr. G. Yogendranath, Dr. M. Chanzej, Dr. A. A. El-Shehawy, and Dr. J. P Thakur, for sharing their knowledge, experiences and expertise.

I would like to express my humble gratitude to the members of Prof. Lee's Laboratory at GIST, who have contributed towards my scientific growth. Of the many that have helped me towards completion of this journey, I would especially like to thank Priyank Shah, Nam-Goo Kang, Beom-Goo Kang, Juen-Kun Min, Un-Ko, Dong-Woo Kim, Won-Jeong Shin, for their open and enthusiastic working atmosphere.

Where would I be without my family? My parents deserve special mention for their inseparable support and prayers. My father, Sh. Bakshi Ram, in the first place is the person who shows me the joy of intellectual pursuit ever since I was a child. My mother, Smt. Satya Devi, is the one who sincerely raised me with her caring and gentle love; to express my gratitude to her is beyond the scope of my lexicon.

Words fail me to express my appreciation to my wife Dimple Thakur, whose dedication, love and persistent confidence in me, has taken the load off my shoulder. I owe her for being unselfishly let her intelligence, passions, and ambitions collide with mine. Therefore, I would also thank Dogra's family for letting me take her hand in marriage, and accepting me as a member of the family, warmly. I also thank my daughter Jaanvi Thakur, for giving me the most wonderful moments of my life.

Finally, I would like to thank everybody who was important to the successful realization of this thesis, as well as expressing my apology that I could not mention personally one by one.
