

BIBLIOGRAPHY

Agnew, R. P.

1. On double orthogonal series.
Proc. London Math. Soc. 33(2) (1931-32),
433-34.
2. Euler Transformations.
Amer. J. Math. 66 (1944), 313-333. MR 6, 46.

Alexits, G.

3. Eine Bemerkung zur starken Summierbarkeit der Orthogonalreihen.
Acta Sci. Math. 16 (1955), 127-139. MR 17, 813.
4. Ein Summationssatz für Orthogonalreihen.
Acta Math. Acad. Sci. Hungar. 7 (1956), 5-9.
MR 17, 813.
5. Sur la convergence absolue de certains développements orthogonaux.
Acta Math. Acad. Sci. Hungar. 8 (1957), 303-316.
MR 30 # 1977.
6. Ein Summationssatz für Orthogonalreihen.
Acta Math. Acad. Sci. Hungar. 7 (1956), 5-9.

Alexits, G.

7. Convergence problems of orthogonal series.
Pergamon Press, 1961.

Alexits, G. and Králík, D.

8. Über die absolute Summierbarkeit und die Konvergenz der Orthogonalreihen.
Monatsh. Math. Phys. Naturwiss. 7 (1962), 363-371. MR 27 = 1773.

Bary, H. R.

9. A treatise on trigonometric series, Vol. I.
Pergamon Press, 1964.
10. A treatise on trigonometric series, Vol. II.
Pergamon Press, 1964.

Dhatriagar, G. G.

11. On convergence and summability of orthogonal series.
Ph. D. Thesis: University of Indiana, 1973.

Billard, P.

17. Sur la sommabilité Absolue des séries de
Fonctions Orthogonales.

Bull. Sci. Math. (2) 65 (1931), 23-28.

MR # A 1545.

Bochkarev, G. G.

18. Absolute convergence of Fourier series with
respect to complete orthonormal systems.

Russian Math. Surveys Vol. 27 No. 2 (1972);

55-51. Zhurn. f. Math. Fiz. Band 240 # 42019.

Borgen, S.

19. Über $(C,1)$ -Summierbarkeit von Reihen
orthogonaler Funktionen.

Math. Annalen 99 (1934), 124-150.

Bourbaki, J. J. I'a

20. Introduction to the theory of infinite series.

Macmillan and Co. Ltd., London, 1965.

Cesàro, E.

21. Sur la multiplication des séries.

Bull. des Sci. Math. 14 (1890), 114-120.

Chapman, S.

17. On non-integral orders of summability of series and integrals.

Proc. London Math. Soc. 9 (1910), 369-400.

Das, G.

18. Discontinuous Riesz means.

Math. Student 34 (1906), 153-162.

19. On some methods of summability.

Quart. Jour. Math. (Oxford) (2) 17 (1906),
344-353. MR 34 # 4749.

20. On some methods of summability. II.

Quart. Jour. Math. (Oxford) (2) 19 (1908),
417-431. MR 32 # 6270.

Edwards, R. S.

21. Fourier Series - A Modern introduction, Vol. I.

Holt, Rinehart and Winston, Inc., New York,
1937.

Fekete, M.

22. Untersuchungen über absolute summable Reihen
mit Anwendung auf Dirichletsche und Fouriersche
Reihen.

Math. Zs. 22 (1914), 339-426.

Fischer, E.

23. Sur la convergence en moyenne.

Comptes Rendus Acad. Sci. Paris 144 (1907),
1022-1034 and 1143-1150.

Flett, T. N.

24. On an extension of absolute summability and
some theorems of Littlewood and Paley.

Proc. Lond. Math. Soc. 7 (1937), 112-141.
MR 13, 263.

Foxia, G. A.

25. A generalization of the Hoss-Fischer theorem.

Math. Notes 12 (1973), 651-655 (1973).

Transl. from Mat. Zametki 12 (1973), 335-372.

Zentr. f. Math. Nov. Ser. 347 =# 42012.

Frost, C.

26. Orthogonal polynomials.

Rockman Press, 1971.

Gepőchin, V. F.

27. On the convergence of orthogonal series.

Doklady Akad. Nauk SSSR 150 (1961), 213-216.

MR 23 =# 6242.

Gran, J. P.

20. Über die Entwicklung reeller Funktionen in Reihen mittels der Methode der kleinsten Quadrate.

Monat. f. reine u. angew. Math. 91 (1903),
41-73.

Grospodkaja, L. V.

20. Absolute summability of orthogonal series.
Mat. sb. (N. S.), Vol. 65 (197) (1964),
370-383. in 30 # 2353.

Hardy, G. H.

30. Theorems relating to the summability and convergence of slowly oscillating series.
Proc. London Math. Soc. (2) 3 (1909), 301-320.

31. Divergent series.

Alexander Press, Oxford, 1949.

Hardy, G. H. and Littlewood, J. E.

32. Theorems concerning the summability of series by Borel's exponential method.

Proc. Camb. Math. Soc. 41 (1916), 36-53.

Hardy, G. H. ; Littlewood, J. E. and Pólya, G.

33. Inequalities.

Cambridge Univ. Press, 1967.

Hardy, G. H. and Rogosinski, W. W.

34. Fourier Series.

Cambridge Univ. Press, 1966.

Hardy, G. H.

35. Collected Papers, Vol. III.

(Oxford 1969).

Hobson, E. W.

36. On the convergence of series of orthogonal
functions.

Proc. London Math. Soc. (2) 12 (1913),
297 - 308.

Jensen, F. and Weyl, H.

37. Über die Konvergenz von Reihen, die nach
periodischen Funktionen fortschreiten.

Math. Annalen 66 (1900), 67-80.

Kaczmarz, J.

38. Über die Summierbarkeit der Orthogonalreihen.
Math. Zeitschrift, 26 (1927), 99-106.

Kaczmarz, J. und Steinhaus, H.

39. Theorie der Orthogonalreihen.
Chelsea Pub. Co., New York, 1951.

Kantorowitch, L.

40. Some theorems on the almost everywhere
convergence.
Doklady Akad. Nauk SSSR 14 (1937), 637-640.

Knopf, E.

41. Multiplikation divergenten Reihen.
Abhandlungen der Berliner Mathematischen
Gesellschaft (Jahrgang) Vol. 7 (1907), 1-12.
42. Grenzwerte von Reihen bei der Annäherung an
die Konvergenzgrenze.
Dissertation, Berlin, 1907.
43. Über das Eulersche Summationsverfahren I.
Math. Zeit. 15 (1923), 236-253.

44. Über das Eulersche Summierungsverfahren, II
Mitteilung.
Math. Zeit. 16 (1923), 125-133.

Eguchi, S.

45. Sur les séries absolument sommables par la
méthode des moyennes arithmétiques.
Ann. Sci. Math. (2) 49 (1923), 221-256.

Koljoda, V. I.

46. The rate of summation of orthogonal series
by Euler methods.
Izv. Vses. Nauch. Issled. Mat. (1) 116 (1972),
42-51. MR 45 # 5657.

Kolmogoroff, A. and Silverstoff, G.

47. Sur la convergence des séries de Fourier.
Rendicenti R. Acad. Lincei 3 (1926), 307-310.

Kuro, S.

48. The absolute Euler summability of Fourier series.
Jour. Australian Math. Soc. (2) XIII (1972),
123-140. MR 45 # 5653.

Leindler, L.

49. On the absolute summability of orthogonal series.

Acta Sci. Math. 22 (1961), 243-268.

MR 24 # A 2762.

50. On the strong summability of orthogonal series.

Acta Sci. Math. 27 (1963), 217-230.

MR 35 # 658.

Lorentz, G. G.

51. Piece methods of summation and orthogonal series.

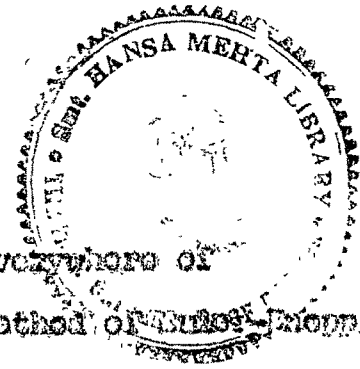

Trans. Roy. Soc. Canada, Sect. III (3)

45 (1961), 19-32. MR 14, 160.

Nedor, J.

52. On the summability almost everywhere of orthonormal series by the method of first logarithmic means.

Rend. Mat. 17 (1959), 1-34. MR 21 # 7307.

53. On the summability almost everywhere of orthonormal series by the method of Birkhoff-Thopp.
Ann. Polon. Math. 6 (1958), 135-143.
MR 24 =# A 1511.
54. On certain relations between Euler-Thopp's and Cesàro summability methods with respect to the orthonormal series.
Bull. Acad. Polon. Sci. 7 No.10 (1959), 599-602. MR 22 =# A 1183.
55. On very strong Miesz summability of orthogonal series.
Studia Mathematica 20 (1961), 325-300.
MR 24 =# A 1543.
56. On the Hörlund summability of orthogonal series.
Ann. Polon. Math. XII (1963), 231 - 250.
MR 26 =# 2771.
57. Absolute Hörlund summability of orthogonal series.
Bull. Acad. Pol. Sci. Math. (6) VII (1961), 471 - 476. MR 20 =# 401.

58. Further results concerning the Hörlund summability of orthogonal series.
Ann. Polon. Math. 16 (1965), 237 - 265.
MR 30 # 5121.

59. Absolute Hörlund summability of orthogonal series.
Ann. Polon. Math. 18 (1966), 1-12.
MR 33 # 491.

60. Absolute Hörlund summability of orthogonal series for a system of II-type.
Colloq. Math. XVIII (1967), 203 - 210.
MR 36 # 4196.

61. Some theorems on Hörlund summability of orthogonal series.
Bull. Acad. Pol. Sci. Ser. Math. 10 (1963), 201 - 207. MR 37 # 5631.

Moncheff, D.

62. Sur les séries de fonctions orthogonales I.
Darmstadt Math. 4 (1923), 82-105.

Mitchell, J.

62. Convergence and $(C,1,2)$ -summability of double orthogonal series.
Duke Math. J. 16 (1951), 211 - 219.
MR 12, 698.

Moore, G. H.

61. Summable series and convergence factors.
Dover Pub., New York, 1963.

Horváth, P.

65. Über Riesz'sche Summation der Orthogonalreihen.
Acta Sci. Math. 23 (1962), 92-95. MR 36 # 8391.
36. A note on the strong T -summation of orthogonal series.
Acta Sci. Math. 30 (1969), 69-76. MR 32 # 3932.

Natanson, I. P.

67. Theory of functions of a real variable Vol. 1.
Frederick Ungar Publ. Co. New York, 1955.

Nörlund, U. E.

63. Sur une application des fonctions périodiques.
Anna Universitatis Arsakrift (2) 16 (1929),
1-10.

Pandzhakidze, Sh. P.

69. On Bonchov-Badonachor theorem for Double orthogonal series.

Sovh. Akad. Nauk. SSSR. SER 39 (1965),
277-292. MR 33 # 6106.

70. On the absolute convergences of double orthogonal series.

Sovh. Akad. Nauk. SSSR. SER 39 (1965),
521-526. MR 33 # 4573.

Patel, C. H.

71. A note on Euler means of orthogonal series.

Indian J. Math. (2) 8 (1966), 41-46.
MR 35 # 3269.

72. On absolute Cesàro summability of orthogonal series.

Proc. Ind. Acad. Sci. India (A) 36 (1966),
221-225. MR 42 # 719.

73. On a connection between Riesz and Euler means of orthogonal series.

Vikram Math. J. (1) I (1966), 47-52.

74. On absolute convergences of orthogonal series.

Math. Student Vol. XXVII (1939),
193-199. MR 41 # 9912.

75. On double orthogonal series.

Bull. College Sci. (Baghdad) (1970),
31-33. MR 42 # 2253.

Peyorinhoff, A.

76. Lectures on Summability.

Lecture Notes in Mathematics, Vol. 107,
Springer-Verlag, 1963.

Plancherel, H.

77. sur la convergence des series de fonctions orthogonales.

Comptes Rendus Acad. Sci. Paris 157 (1913),
530-542.

Plossmann, A.

78. Über convergenz von trigonometrischen reihen.

Jour. f. reine u. angew Math. 166(1900), 25-35.

Pólya, G. and Szegő, G.

70. Problems and Theorems in Analysis Vol. I.
Springer-Verlag, 1972.

Powell, R. D. and Shah, S. M.

80. Summability Theory and Applications.
Van Nostrand, 1972.

Prasad, D. N.

81. The summability of a Fourier series and its conjugate series.
Proc. of 30th Indian Sci. Congress, Nagpur (1945), Part II - Presidential Addresses, pp. 193-200, IN 7, 246.
82. The absolute summability of Fourier series.
25th Session of the National Acad. of Sci. of India, Gandhinagar (1960), Presidential Address.
83. Recent researches in the absolute summability of infinite series and their applications.
Proc. of 63rd Session of Indian Sci. Congress, Chandigarh (1960), Part II - Presidential Addresses, pp. 3-47, IN 36 # 614.

Kurašvili, H. [Kurašvili, H. H.]

84. Some problems on summability of double orthogonal series.

Tbilis. Univ. Gabonconl., Tbilisi (1966),
39 pp. MR 36 # 5059.

Rademacher, H.

85. Einige Sätze über Reihen von allgemeinen Orthogonalfunktionen.

Math. Annalen 87 (1923), 112-136.

Riesz, F.

86. Sur les systèmes orthogonaux de fonctions.

Comptes Rendus Acad. Sci. Paris 144 (1907),
615-619 and 734-736.

Saharay, E. H.

87. On the Mörland summability of double Fourier series.

Indl. Bollett. Math. Soc. (4) 54 (1962),
219-223. MR 36 # 4269.

Salen, E.

88. A new proof of a theorem of Vonchoff.
Duke Math. J. 8 (1941), 269-274. MR 3,105.

Sanson, G.

89. Orthogonal functions Vol. IX.
Interscience Publishers, London, 1962.

Sapro, A. B.

90. Convergence and summability of orthogonal series.
Ms. 2. Dept. University of Indore, 1971.
91. On Euler means and I-means of orthogonal series.
Mathematical Monthly 9 (24) (1972), 93-96.
Zentr. f. Math. Nrv. Band 214 # 43033.

Schmidt, E.

92. Entwicklung willkürlicher Funktionen nach Systemen vorgeschriebener.
Disertation (Göttingen, 1905) also Kath. Annalen 63 (1907), 433-476.

Sharma, J.

93. On Euler summability of orthogonal series.
Indian J. Math. (2) 12 (1970), 107-119.
MR 46 # 2307.
94. Convergence and Approximation Problems of
general orthogonal expansions.
Ph. D. Thesis, University of Allahabad,
1970.

Sharma, P. L.

95. Convergence and summability of double
Fourier series.
Ph. D. Thesis, University of Banar, 1960.

Singh, D. D.

96. Strong summability of Fourier series and
applied topics.
Ph. D. Thesis, University of Banar, 1953.

Singh, U. D.

97. On the strong summability of a Fourier
series and conjugate series.
Proc. Nat. Inst. Sci. India, Vol. 13 (1947),
319-326. MR 10, 34.

98. Strong summability of trigonometric series.
Ph. D. Thesis, Allahabad University, 1949.

Srivastava, P.

99. On absolute Riesz summability of orthogonal series.
Indian J. Math. 9 (1967), 513-520. MR 40 # 6160.

Stechkin, S. B.

100. On the absolute convergence of orthogonal series.
Izv. Akad. Nauk SSSR 17 (1953), 490-512.
101. On the absolute convergence of orthogonal series.
Dokl. Akad. Nauk. SSSR 102 (1955), 37-40.
MR 16, 1101.

Sunouchi, G.

102. On strong summability of orthogonal series.
Expo. Im. Acad. Tokyo 30 (1944), 251-253.
MR 7, 513.

103. On double Fourier series.

Proc. Amer. Math. Soc. (1959), 522-525.
MR 19, 251.

104. On the strong summability of orthogonal series.

Acta Sci. Math. 27 (1963), 71-76. MR 33 # 3935.

Orszag, I.

105. On generalized absolute Cesàro summability of orthogonal series.

Acta Sci. Math. (Szeged), (1-2) 33 (1971),
51-57. Centr. f. Math. Nov. Ser. 217, 143.

Orszag, G.

106. Orthogonal polynomials.

American Math. Soc.

Colloq. Publ., Vol. XXIII, 1967.

Randorp, H.

107. Über Orthogonale Reihen.

Acta Sci. Math. 16 (1955), 74-76. MR 18, 50.

108. Über die orthogonalen Funktionen II.

(Summation).

Acta Sci. Math. 13 (1957), 149-166.

MR 24 # A 3453.

109. Über die orthogonalen Funktionen IV

(Starke Summation).

Acta Sci. Math. 13 (1953), 19-25. MR 24 # A2192.

110. Über die orthogonalen Funktionen VI. (Eine

genaue Bedingung für die starke Summation).

Acta Sci. Math. 20 (1953), 14-19. MR 23 # A1206.

Tandori, K.

111. Über die orthogonalen Funktionen. (Eine not

wendige Bedingung für die Konvergenz).

Acta Sci. Math. 20 (1953), 245-251.

MR 22 # A 2624.

112. Über die orthogonalen Funktionen II (Absolute

Summation).

Acta Sci. Math. 21 (1955), 292-299. MR 24 # A390.

113. Über die Konvergenz orthogonalreihen.
Acta Sci. Math. 33 (1963), 139-151.
MR 27 # 2800.

Tinon, R. F.

114. (C, α, β) summability of Fourier series of functions of two variables.
Soviet. Acad. Math. Sci. 33 14 (1963),
335-339. MR 15, 952.

Triconi, F. G.

115. Vorlesungen über Orthogonalreihen.
Springer-Verlag, 1970.

Tsuchida, T.

116. Absolute Cesàro summability of orthogonal series.
Tokyo Math. J. (2) 5 (1952), 52-60.
MR 15, 417.

Ulyanov, P. L.

117. Solved and unsolved problems in the theory of trigonometric and orthogonal series.
Russian Math. Surveys (1964), 1-62. MR 28 # 4304.

Voronei, C. F.

118. Verallgemeinerung des Begriffs der Summe
inner unendlicher Reihen.

Proceedings of the eleventh Congress of
Russian naturalists and scientists, St.
Petersburg (1902), 60-61.

Walton, A.

119. Über einige Orthogonalreihen.

Bulletin of the Georgian Section Acad. Sci.
ISSAR 1 (1940), 411-420. IR 3, 108.

Weyl, H.

120. Über die Konvergenz von Reihen, die nach
orthogonal Funktionen fortschreiten.

Math. Annalen 67 (1909), 225-245.

Winn, C. D.

121. On strong summability of any positive order.

Math. Zeit. 37 (1933), 461-492.

Zalawarski, Z.

122. Sur la sommabilité des séries de Fourier.

Annales Math. 6 (1936), 22-23.

Zinn, G. A.

123. Summability of orthogonal series by Euler method.

Mat. Zh. (U.S.S.R.) 53 (193) (1935), 351-377.

Mat. Zh. 53 560.

Syguni, A.

124. Sur la sommation des séries de fonctions orthogonales.

Bulletin Intern. Acad. Polon. Sci. Lettres
(Cracovie), Serie A (1927), 295-307.

125. Sur l'application de la dernière moyenne arithmétique dans la théorie des séries orthogonales.

Fundamenta Math. 10 (1927), 356-362.

126. Trigonometric series, Vols. I-II.

Cambridge Univ. Press, 1963.
