| List of Figures  | v             |
| List of Tables   | xv            |
| List of papers presented on the basis of work  | xvi           |
| <br>   |               |
| <b>1      Overview</b>   | <b>1-10</b>   |
| <b>2      Background: Robust Adaptive Observer Estimators</b>                                  | <b>11-54</b>  |
| 2.1     Deterministic  | 12            |
| 2.2     Stochastic   | 14            |
| 2.3     Observer-based control   | 15            |
| 2.4     Model Uncertainty and Robust Control   | 16            |
| 2.4.1    Robust Adaptive Control of Nonaffine Nonlinear Plants                                 | 17            |
| 2.5 $H_\infty$ Preview Control   | 18            |
| 2.5.1 $H_\infty$ : Optimal Preview Controller  | 19            |
| 2.5.2    Stochastic $H_2/H_\infty$ Control With State-Dependent Noise                          | 20            |
| 2.6     Bilinear Systems   | 22            |
| 2.6.1    Observer Design   | 23            |
| 2.6.2    C Implementation  | 24            |
| 2.6.2.1   Optimum reduced order observer-estimator for<br>Second Order LTVs with single output | 24            |
| 2.6.2.2   Optimum reduced order observer-estimator for<br>Third Order LTVs with single output  | 27            |
| 2.6.2.3   Optimum reduced order observer-estimator for<br>Third Order LTVs with Two outputs    | 31            |
| 2.7     Software Development Tools   | 35            |
| 2.7.1    MATLAB  | 35            |
| 2.7.1.1   MATLAB Implementation  | 36            |
| 2.7.2    SIMULINK  | 38            |
| 2.8     Robust Optimal Observer  | 40            |
| 2.8.1    Optimal observer  | 40            |
| 2.8.2    Robust Optimal Observer   | 43            |
| 2.8.3    SIMULINK Implementation: Robust Adaptive Observer                                     | 49            |
| 2.8.4    Application   | 50            |
| <b>3      Soft computing: Techniques and Development Tools</b>                                 | <b>55-105</b> |
| 3.1     Introduction   | 55            |
| 3.2     Fuzzy Logic  | 56            |
| 3.2.1    Keywords, Terminology   | 57            |
| 3.2.2    Architecture of fuzzy control   | 59            |
| 3.3     Artificial Neural Network  | 59            |
| 3.3.1    The Basic Artificial Model  | 60            |
| 3.3.2    Implementation of Artificial Neural Network   | 61            |

|          |  |                |
|----------|--|----------------|
| 3.3.3    | Single layer and Multi-layer networks  | 61             |
| 3.3.4    | Types of Neural Network Learning   | 63             |
| 3.3.5    | Back Propagation Network (BPN)   | 64             |
| 3.4      | Software Development Tools   | 67             |
| 3.4.1    | MATLAB 7   | 67             |
| 3.4.2    | SIMULINK 6   | 68             |
| 3.4.3    | FUZZY Logic toolbox  | 70             |
| 3.4.4    | Neural Network Toolbox   | 71             |
| 3.5      | Application: Electrical Drives   | 72             |
| 3.5.1    | Motor Control: (Conventional Controller)   | 74             |
| 3.5.2    | Modeling and Simulation of FLC   | 78             |
| 3.5.3    | FLC Algorithm & Pseudo code  | 78             |
| 3.5.4    | Simulation Setup   | 82             |
| 3.6      | Neuro-Fuzzy Controller   | 86             |
| 3.7      | Compensation of Dead-zone Non-linearity  | 90             |
| 3.7.1    | FLC Design   | 92             |
| 3.7.2    | Running the SIMULATION   | 94             |
| 3.8      | Adaptive Fuzzy Logic Compensator for Backlash  | 96             |
| 3.8.1    | Backlash non linearities   | 97             |
| 3.8.2    | Running the SIMULATION   | 98             |
| 3.8.3    | Two-Layered Adaptive Fuzzy Logic Controller  | 99             |
| <b>4</b> | <b>State of Art: Theoretical Background for soft computing</b>                           | <b>106-132</b> |
