

Appendix – D

Interview Schedule for students of standard X

- 1.** How far are you interested in learning the physics concepts?
- 2.** Your views on the difficulty level of concepts in physics at standard VIII, IX and X.
- 3.** What were the different teaching methods used by the teacher in teaching the physics concepts in standard IX?
- 4.** Which were the concepts in physics of standard IX wherein you found difficulty in understanding?
- 5.** Were you made to perform activities related to the concepts in physics at standard IX?
- 6.** How far those activities helped in learning the concepts?
- 7.** How far the practical work in lab helped you to understand the physics concepts in standard IX?
- 8.** What types of home assignments in physics were given?
- 9.** Do you ask questions and participate in classroom discussions?
- 10.** Do you refer any other reference material/materials for physics apart from your classroom notes?
- 11.** How far the classroom interactions and discussions helped you in learning the physics concepts?
