

APPENDIX VII

Letter to the Head of the Institution/department

=====

Mrs. P.L.Srivastava

Pandita Gargi Hall
 5, Staff Room,
 M.S. University,
 Baroda- 2

Dear Madam,

The present study has been selected by me because Home Science has achieved wide acceptance in every state of the country either as a subject at different levels of education and also as a full fledged degree programme at higher level. The number of institutions imparting education for Home Science degrees have increased rapidly. But, no information is available in any of the educational literature.

The present study has been taken up to find out :

1. The development from the beginning, present status and future plans for Home Science for the higher programmes, students and professions.
2. The factors responsible for the rapid development and progress of the institutions.
3. The resources which help in the progress.

However, the purpose of the study is not to evaluate the institutions. Therefore, your free and objective response is requested.

This being the first study of its kind in India, I am keen that all the institutions having fulfilled degree programmes are represented. Your institution is one of them and plays an important role, therefore, contribution would be valuable in the study.

I am working as an Associate Professor of Home Science Education and Extension Education in the College of Home Science, Punjab Agricultural University, Ludhiana (Punjab) and am on leave for this work. As, I have to go back soon your cooperation and help in returning the Questionnaire by due date will be of great help to me. The Questionnaire seems to be long but once you start, due to your interest in the discipline, you will not find it so.

Before you start filling up, please get Question Nos. 5, 4, 5.5, 6.1, filled up by your office. Self addressed envelop with due stamps is enclosed herewith for the return of the Questionnaire

Thanking you,

Yours faithfully,

(Mrs.) P.L.Srivastava

Please return the Questionnaire by May 30, 1974. THANK YOU
