Acronyms xii

Chapter-1

Introduction 1

1.1 Requirements of Speech Enhancement 2

1.2 Scope of Research in Speech Enhancement and Detection 4

1.3 Objectives of the Research Work 6

1.4 Organization of the Thesis 6

Chapter-2

Speech Enhancement Techniques: State of Art 11

2.1 Interferences and Suppression Techniques 13

2.2 Recent Trends - Speech Enhancement Techniques 14

2.2.1 Additive Noise Removal 15

2.2.1.1 Transform Domain Methods 16

2.2.1.2 Adaptive Filtering Methods 19

2.2.1.3 Model Based Methods 20

2.2.1.4 Auditory Masking Methods 20

2.2.2 Reverberation Cancellation 21

2.2.2.1 Temporal Processing Methods 21

2.2.2.2 Cepstral Processing Methods 22

2.2.3 Multi-speech (speaker) Separation 22

2.2.3.1 CASA Method 23

2.2.3.2 Sinusoidal Modeling 23

2.3 A Case Study of Speech Enhancement Technique Using Adaptive Filtering Algorithms 24
2.3.1 ANC Using NLMS Algorithm 25
2.3.2 Practical Implementation of ANC with NLMS Algorithm 27
2.3.3 Performance of NLMS algorithm for ANC 32
2.3.4 Echo Cancellation Using NLMS Algorithm 40
2.4 Summary 41

Chapter-3

Speech Enhancement and Detection Techniques: Transform Domain 43

3.1 Signal Processing Framework 44
3.1.1 Short Time Fourier Transform (STFT) Analysis 44
3.1.2 Overlap Add Synthesis 46
3.1.3 Spectrographic Analysis of Speech Signals 49
3.2 Short Time Spectral Amplitude (STSA) Algorithms 51
3.3 Spectral Subtraction (SS) Methods 53
3.3.1 Magnitude and Power Spectral Subtraction (MSS and PSS) 53
3.3.2 Berouti Spectral Subtraction (BSS) 54
3.3.3 Multiband Spectral Subtraction (MBSS) 56
3.4 Wiener Filtering Methods 58
3.4.1 Decision Direct (DD) Approach 58
3.4.2 DD Approach with Parametric Wiener Filter 59
3.5 Statistical Model Based Methods 59
3.5.1 Maximum Likelihood (ML) Approach 59
3.5.2 Minimum Mean Square Error (MMSE) Approach 60
3.5.3 MMSE Log Spectral Amplitude (LSA) Approach 60
3.5.4 Maximum a Posteriori (MAP) Approach 61
3.6 Voice Activity Detection (VAD) and Noise Estimation 62
3.7 Speech Enhancement Using Wavelet Transform 64

3.7.1 Thresholding of Wavelet Co-efficients for Speech Enhancement . 66
3.8 Objective Quality Measures for Speech Enhancement Methods 68
3.9 Summary 72

Chapter-4

MATLAB Implementation and Performance Evaluation of Transform Domain Methods 73

4.1 MATLAB Implementation-STSA Techniques 74
4.2 Spectrographic Results of Simulation 80
4.3 The NOIZEUS Database for Performance Evaluation 83
4.4 Objective Evaluation of STSA Algorithms 84
4.5 Graphical User Interface (GUI) 93
4.6 Implementation of Wavelet De-noising Methods 95
4.7 Summary 96

Chapter-5

Relative Spectral Analysis-RASTA 97

5.1 Auditory Masking Features 99
5.1.1 Frequency-Domain Masking Principles 99
5.1.2 Masking Threshold Calculation 101
5.1.3 Exploiting Frequency Masking in Noise Reduction 101
5.2 RASTA Processing System 103
5.3 RASTA Method 104
5.4 RASTA Algorithm Implementation and Modifications 108
5.5 Objective Evaluation and Results 112
5.6 Summary 119

Chapter-6

Hybrid Algorithm for Performance Improvement 120

6.1 Proposed New Approach 121
6.2 MATLAB Implementation of Proposed Algorithm 123
6.3 Spectrographic and Objective Evaluation of Proposed Algorithm 123

6.4 Subjective Evaluation 129
6.5 Setup for Subjective Evaluation 130
6.6 Subjective Evaluation of Proposed Algorithm 133
6.7 Evaluation of Proposed Algorithm in Reverberant Environments 133
6.8 Summary 136

Chapter-7

Hardware Implementation Tools 137

7.1 The Digital Signal Processor: TMS320C6713 138
7.1.1 DSP 6713 Features 139
7.2 DSK 6713 142
7.2.1 Functional Overview of DSK 6713 143
7.3 Code Composer Studio Integrated Development Environment (CCS IDE) 144
7.4 MATLAB/SIMULINK in Real Time Applications 146
7.4.1 Real Time Workshop Toolbox 146
7.4.2 Target Support Package TC6 149
7.5 Summary 150

Chapter-8

Real Time and Embedded Implementation of modified algorithm 151

8.1 Typical Setup for Developing Models 152
8.2 Real Time Implementation of Hybrid Approach on PC 152
8.3 SIMULINK Profile Results 156
8.4 Real Time Implementation of Hybrid Approach on DSK6713 157
8.5 Profiling Results for DSK 6713 Implementation 157
8.6 CCS Profiling Results for DSK 6713 Implementation 164
8.7 Summary 166

Chapter-9

Conclusions and Future Scopes 167

Chapter-10
