

## ACKNOWLEDGEMENT

---

It is a matter of great privilege and pleasure to express my deep sense of gratitude to my respected *Guide*, **Dr. S. C. Patodi**, Professor of Structural Engineering, Applied Mechanics Department, M. S. University of Baroda, who is among well-known dignitaries of excellence and has been the real motivating force of this work. His critical comments and constant inspiration with affection and care, interest and deep concern have encouraged me to work sincerely for completing the work. His immense care in going through manuscript and important suggestions for improving the same has made it possible to submit the thesis in the presentable format.

I would also like to sincerely thank **Dr. K. R. Biyani**, Professor and present Head of Applied Mechanics Department and **Dr. S. C. Patodi**, Ex. Head of the Applied Mechanics Department who have been kind enough to provide me required computational facilities for this research work during their tenure.

I am thankful to all my colleagues who have offered me their moral support and eagerness to help me in one or the other way during the work.

Finally, I would like to thank my family members and especially my brother **Ghanshyam Solanki** for standing by me throughout this work.

October 2007

Naresh K. Solanki
