

## LIST OF APPENDICES

- No.
- 4.1 Score card for sensory evaluation.
  - 5.1 Effect of bean / water ratio on the curd strength of soymilks.
  - 5.2 Effect of bean / water ratio of soymilks on the ratio of whey expulsion.
  - 5.3 (a)Composition of cheese blended in maska spreads.
  - 5.3 (b)Correlation values.
  - 5.4 Effect of different cheese solids levels on the sensory scores of maska based cheese spreads.
  - 5.5 (a)Composition of cheese blended in slurry spreads.
  - 5.5 (b)Correlation values.
  - 5.6 Effect of different cheese solids levels on the sensory scores of slurry spreads.
  - 5.7 (a)Composition of milk solids blended slurry spreads.
  - 5.7 (b)Correlation values.
  - 5.8 Effect of different milk solids levels on the sensory scores of slurry spreads.
  - 5.9 Effect of extent of curing on pH and TA of soy cheese spreads.
  - 5.10. Changes in nitrogenous fractions during curing in maska based cheese spreads.
  - 5.11. Changes in nitrogenous fractions during curing in cheese cheese blened slurry spreads.
  - 5.12. Changes in nitrogenous fractions during curing in milk solids blended slurry spreads.
  - 5.13. Computed values of nitrogenous fractions during curing.
  - 5.14. Changes in SN/TN during curing.

....contd.

- 5.15. Changes in NPN/TN during curing.
- 5.16. Changes in AN/TN during curing.
- 5.17 (a) Changes in microbiological counts  
in cheese blended in maska spreads.
- 5.17 (b) Correlation values.
- 5.18 (a) Changes in microbiological counts in  
cheese blended slurry spreads.
- 5.18 (b) Correlation values.
- 5.19 (a) Changes in microbiological counts in  
milk solids blended slurry spreads.
- 5.19 (b) Correlation values.
- 5.20. Changes in FFA during curing.
- 5.21. Changes in TVFA during curing.
