ABSTRACT	(i)
LIST OF PRINCIPAL SYMBOLS	(iii)
CHAPTER I INTRODUCTION	1 - 26
CHAPTER II SYSTEM REQUIREMENTS AND SHAPING OF POLAR CHARACTERISTICS	27 - 52
2.1 Introduction	27
2.2 Power System Requirements	27
2.2.1 Requirements of zone-1	28
2.2.2 Requirements of zone-2	28
2.2.3 Requirements of zone-3	29
2.3 Distance Schemes	30
2.4 Factors Influencing the Discriminative Properties of Distance Protection Schemes	33
2.5 Discrimination against Maximum Circuit Loading Conditions	35
2.6 Power Swing Requirements	38
2.7 Distance Protection Scheme Requirements	40
2.8 Application to Protection of Compensated Lines	46
2.8.1 Directional Distance Relay for Compensated Lines	48

	2.8.2 Distance relay monitored phase comparison schemes	50
CHAPTER III	A GENERAL APPROACH TO SINE COMPARATORS	53 - 86
	3.1 Introduction	53
	3.2 Analysis of Distance Relays	54
	3.3 Mathematical Basis of 2-Input Sine Comparators	56
	3.3.1 Basic equations	56
	3.3.2 Graphical construction for circular characteristics	60
	3.3.3 Rectilinear characteristics- basic equations	61
	3.3.4 Graphical construction	63
	3.4 A General Analysis of Sine Comparators	64
	3.4.1 2-input comparators	64
	3.4.2 Multi-input comparators	69
	3.5 Static Distance Relay With Unsymmetrical Comparison Limits	71
	3.5.1 Input signals	71
	3.5.2 Principle of the relay	73
	3.5.3 Relay circuitry	75

	Pulse forming circuits	75
	Monostable multi-vibrator circuits	78
	3.5.4 Complete Relay	83
	3.5.5 Performance Tests	83
CHAPTER IV	DEVELOPMENTS IN SEQUENCE COMPARATORS	87 - 111
	4.1 Introduction	87
	4.2 Principle of the Comparator	88
	4.3 Mathematical Basis	90
	4.4 Selection of Inputs with The Direct Approach	91
	4.5 Sequence Detection Relay With Quadrilateral Characteristic	92
	4.5.1 Input signals	92
	4.5.2 3-input sequence detector	94
	4.5.3 First zone relay	94
	4.6 Three Step Distance Relay Schemes	97
	4.6.1 3-step characteristics with single fault detector	98
	Scheme- 1	98
	Scheme- 2	103
	4.6.2 Third zone monitored relay scheme	106
	4.7 Performance Tests	109

CHAPTER V	DEVELOPMENTS IN HYBRID COMPARATORS	
	TO YIELD CONIC CHARACTERISTICS	112 - 129
5.1	Introduction	112
5.2	Principle of Operation	113
5.3	Mathematical Basis	115
5.3.1	Ellipse	115
5.3.2	Parabola	116
5.3.3	Limacon	118
5.3.4	Cardioid	119
5.4	Relay Circuitry For	
	Elliptical Characteristic	119
5.4.1	The phase comparator	120
5.4.2	The function generator	120
5.4.3	Rectifying and Filtering	
	Circuits	124
5.4.4	Output stage	126
5.5	Performance Tests	127
CHAPTER VI	EFFECT OF POLARISATION ON COMPARATOR	
	MODELS	130 - 152
6.1	Introduction	130
6.2.1	Multi-input phase comparator	131
6.2.2	Relay polar characteristics	133
6.3.1	Sequence Comparator	141
6.3.2	Polar characteristics	144
6.4.1	Hybrid comparator	148
6.4.2	Polar characteristics	149

CHAPTER VII	A NEW SELF ADJUSTING DISTANCE	
	RELAY	153 - 175
7.1	Introduction	153
7.2	Principle of Operation	154
7.3	Directional Characteristic	159
7.4	Relay Analysis	161
7.4.1	Healthy and overload conditions of the system	161
7.4.2	Power swings	163
7.4.3	Effect of faults on relays on unfaulted phase(s)	165
	Ground Fault Relays	165
	Line to ground faults	167
	Phase to phase faults	168
	Phase To Phase Fault Relays	168
	Line to ground faults	169
	Phase to phase faults	169
7.4.4	Faults on the protected phase(s)	169
	External faults	170
	Reverse faults	170
	Internal faults	170
7.5	Selection of K_1, K_2 and K_3 to Yield Desired Characteris- tics	171

7.5.1	Selection of K_1	171
7.5.2	Selection of K_2 and K_3	172
7.5.3	Effect of Z_S / Z_L ratio and fault location on the shape of the characteristic	174
7.6	Performance Tests	174
CHAPTER VIII DEVELOPMENTS IN PILOT - WIRE DIFFERENTIAL PROTECTION		
		176 - 210
8.1	Introduction	176
8.2	Principle of the Protection Scheme	178
8.3	Choice of Stable Zone	182
8.4	Inversion Chart	184
8.4.1	Construction	184
8.4.2	Method of use	186
8.5	Shaping of Stable Zone	187
8.6	Application of Sine Type Phase Comparator	191
8.6.1	Mathematical basis of 2-input sine comparators	191
8.6.2	Graphical construction Rectilinear characteristics Circular characteristics	195 195 196
8.6.3	Derivation of inputs to the comparator	196

8.6.4	Relay circuitry	199
8.7	Application of Instantaneous Amplitude Comparator	200
8.7.1	Principle of the comparator	200
8.7.2	Comparator Circuit	207
8.7.3	Output stage	208
CHAPTER IX	RESTRICTED ZONE PROTECTION OF SHORT TRANSMISSION LINES	211 - 245
9.1	Introduction	211
9.2	Scheme- 1	213
9.2.1	Analysis	213
	Basic equations	213
	Attenuation And Phase Shift Ignored	216
	Through faults and healthy conditions	216
	Internal faults	217
	Effects of Attenuation And Phase Shift	217
	Healthy condition of the system	218
	Through faults	218
	Internal faults	220
9.2.2	Power swing equation	221
	End voltages equal	221
	End voltages unequal	223

9.2.3	The shape of the stable zone	223
9.3	Scheme 2	232
9.3.1	Analysis	232
	Basic equations	232
	Internal faults	234
	Healthy condition	234
	Through fault condition	235
9.3.2	Power swing equation	235
	End voltages equal	235
	End voltages unequal	237
9.3.3	Shape of the stable zone	237
9.4	Relay Circuitry	239
9.4.1	Scheme 1	239
9.4.2	Scheme 2	242
9.5	Pilot Monitoring	245
9.5.1	Scheme 1	245
9.5.2	Scheme 2	245
CHAPTER X	CONCLUSIONS	246 - 253
APPENDICES		254 - 294
CHAPTER XI	THE DYNAMIC TEST BENCH	255 - 257
CHAPTER XII	TESTING OF THE RELAY EMPLOYING MULTI-INPUT SINE COMPARATOR	258 - 261
	Dynamic polar curve	258
	Transient over-reach V/s angle of switching	260

CHAPTER XIII	TESTING OF HYBRID COMPARATOR	
	YIELDING CONIC CHARACTERISTICS	262 - 266
CHAPTER XIV	RESULTS OF COMPUTER PROGRAMMES	
	AND TESTS CONDUCTED ON THE	
	COMPARATOR YIELDING SELF-ADJUSTING	
	CHARACTERISTIC	267 - 280
	Ratios V_b/E_p for line to ground	
	faults on phase 'A'	267
	Determination of K_1	268
	Effect of the location of the	
	fault and Z_S/Z_L ratio on the shape	
	of the characteristic	270
	Steady state and Dynamic Testing.	271
	Static Polar curves	271
	Transient Over-reach	273
	Time contour curves	275
CHAPTER XV	INPUT ADMITTANCE DIAGRAM FOR A	
	4 - TERMINAL NETWORK	281 - 283
CHAPTER XVI	DERIVATION OF PROPAGATION CONSTANT	284 - 285
REFERENCES		286 - 294
