

Acknowledgements

I express a heartfelt gratitude to my PhD guide and mentor, Dr. Rajesh Patkar for imparting his scientific wisdom, particularly in the field of plant-microbe interactions, which made a significant impact on my PhD project. I am indebted for his constant support and motivation during critical times of my PhD journey. Thank you, Sir!

I would like to acknowledge my former guide, late Prof. Bharat Chattoo, for providing me an opportunity to pursue PhD in his lab and for the sophisticated laboratory facility at the Bharat Chattoo Genome Research Centre (BCGRC). I also fondly remember, late Dr. Johannes Manjrekar, then my PhD guide, for his valuable suggestions and discussions during my research work.

I am grateful to the HoD, Prof. Archana Gayatri, for extending an invaluable help, both in terms of scientific suggestions and administrative support, especially during some extraordinary situations of my PhD tenure.

I would like to thank my Doctoral Advisory Committee members Prof. Mrinalini Nair and Prof. Sanjay Ingle for their comments on my work.

I am thankful to Dr. Naweed Naqvi (Temasek Lifesciences Laboratory, Singapore) for providing backbone vector pFGL1010.

I am thankful to present and former faculty members of the department, including Prof. T. Bagchi (former HoD), Prof. Devarshi Gajjar, Prof. Anuradha Nerurkar, Dr. Nandita Baxi, Dr. Pushpendra Singh and Dr. Ratika Srivastava, for their teachings and support.

I am thankful to my colleague and a friend, Khyati Mehta for helping me in carrying out advanced bioinformatics analyses for my PhD project and also helping me at various stages of the manuscript publication process.

I am thankful to my lab colleagues at BCGRC; Divya Purohit for helping me in maintaining the lab facility and being a good friend over these many years, and Dr. Priya Pillai for her concern and advice.

I would like to thank my former lab colleagues at BCGRC; Harsukh Tank for his tremendous support all this while, Kaminee Ranka for teaching me 2D-gel electrophoresis, Gaurav Tyagi for his valuable scientific suggestions, Chandra Prakash, Suhail Muzaffar and Vikas Mehra for being a wonderful company in the lab and at hostel, Sushma Meshram and Varsha Mohanan for helping me learn qRT-PCR, Hashim Reza and Hiral Shah for their immense support and a pleasant time spent together, Anand Parnandi and Sayali Bakore for their enthusiasm and support, Venkatlakshmi, Abhijeet Das and Parth Trivedi for a nice experience during their brief stay at BCGRC.

I would also like to thank my former and present peers in the department, Jagat Rathod, Abhik Saha, Mihir Sarang, Hasmata Buchad and Niralee Patel for some memorable experiences during my PhD.

I am thankful to non-teaching and administrative staff at the department and the University Office; Mr. Jayakumar Nair for his immense administrative help and support on numerous occasions during my PhD tenure, Mr. Shirish Nagarkar and Mr. Nitesh Bhatt for making all the paperwork smooth and also helping with ordering of the lab resources, Mr. A. Varghese for the support during his stay in the department.

I would like to thank lab-attendants Girishbhai, Mukeshbhai, Chimanbhai and late Rameshbhai for making the lab work easier.

I am grateful to the university staff, Chirag Bhatt (GCU section) for smooth and timely processing of my fellowship, Milindbhai (Academics section) for all his help during university procedures, and Mayurbhai (Examination section) for his clear guidance during synopsis and thesis submission.

I acknowledge University Grants Commission, Government of India for providing me UGC-BSR-RFSMS fellowship (F.7-128/2007-BSR, dtd-02.09.2014) for a tenure of five years.

Finally, I take this opportunity to thank my all-time support system, my family including my parents Panna and Vijay Thaker, my in-laws Gopi and Ashesh Vyas and my sister Saloni for believing in me. A special thanks to my wife Pooja for her unmatched support and patience during this years-long journey.

Many Thanks!

Akhil Thaker
