

Appendix: IX

Mineral Resources: Location and Minerals of Prospect Areas

So far the Ministry of Energy, Mines and Water Resources have defined about 19 mineral locations as prospect areas. The identified mineral locations have been classified into three categories:

- [A] Prospect areas for immediate investment for exploration,
- [B] Prospect areas for extensive prospecting and subsequent exploration, and
- [C] Prospect areas where appraisal of available information is in progress.

The locations and type of minerals for each of the 19 defined prospect areas are shown in the following Map and two Tables:
