

ACKNOWLEDGEMENT

It is a matter of great pleasure for me to express my grateful thanks to LATE PROFESSOR J. M. LOHAR, Head, Applied Chemistry Department, Faculty of Technology and Engineering, M.S.University of Baroda, for suggesting the research problem and valuable guidance. My debt to him is too great to be expressed in words. I owe him very heavily and take this opportunity of expressing it. Unfortunately, he was not with us in the final phase of this work.

I simply fumble to find appropriate words to express my deep sense of gratitude towards Professor Y. K. AGRAWAL, Head, Pharmacy Department, Faculty of Technology and Engineering, M.S.University of Baroda, who readily agreed to shoulder the responsibility of completing this study after the sudden demise of Professor J.M.LOHAR in the final phase.

My thanks are due to Dean, Faculty of Technology and Engineering, M.S. University of Baroda and to Head, Applied Chemistry Department, M.S.University of Baroda, for providing necessary facilities to carry out this work.

I am very much grateful to the authorities of Indian Petrochemicals Corporation Limited for granting the necessary permission to carry out the work and for DSC analysis.

I am thankful to Dr. S. S. Lele, Mr. Madhavrao and Mr. S. L. Patel for micro-analysis.

I am indebted to my friends, colleagues, well wishers and staff members of Applied Chemistry Department, particularly Dr. Jayrang Dave and Mr. Vijay Dhimar, for their kind co-operation and active help in completing this work.

I express my deep sense of gratitude towards my parents, wife - RAKSHA and children - ARTI and DIPAN who underwent all sorts of inconvenience for such a long period with smiling faces.

P. R. VYAS
