

List of the Tables

Chapter-2

Table 2.1	Thickness of pure polymer and polymer composites	48
Table 2.2	Irradiation details of the samples	56

Chapter-3

Table 3.1	FWHM, crystallite size and % crystallinity of pristine and irradiated PMMA/Al composites for 10% and 40% concentrations of filler	122
Table 3.2	FWHM, crystallite size and % crystallinity of pristine and irradiated Cu/PMMA composites for 10% and 40% concentration of filler	141

Chapter-4

Table.4.1	FWHM, crystallite size and % crystallinity of pristine and irradiated PVC/Al composites for 10% and 40% concentrations of filler	187
-----------	----------------------------------------------------------------------------------------------------------------------------------	-----

Chapter-5

Table. 5.1	Direct and indirect band gap values for pristine and irradiated PP+TiO ₂ composites	221
Table.5.2	FWHM, crystallite size and crystallinity of pristine and irradiated polypropylene /TiO ₂ composites.	223
Table 5.3	Direct and indirect band gap values for pristine and irradiated PP+GF composites	232
Table. 5.4	Band gap, degree of crystallinity (K) and crystalline size for HDPE/CB composites	242
