LIST OF TABLES.....	8
LIST OF ILLUSTRATIONS.....	12
ACKNOWLEDGEMENTS.....	13
1. INTRODUCTION.....	15
1.1 Importance and Singnificance of Employment of women.....	17
1.1.1 Reasons for women joining labour force.....	20
1.1.2 Emergent gains and problems of women's employment.....	21
1.2 Rationale of the study.....	22
1.3 Statement of the problem.....	28
1.4 Objectives of the study.....	28
1.5 Assumptions.....	30
1.6 Null Hypotheses.....	30
1.7 Limitations of the study.....	33
2. REVIEW OF LITERATURE.....	34
2.1 Conceptual foundation of changes brought about by employed women.....	35
2.1.1 Changes brought about by employed women at various levels.....	36
2.2 Empirical foundations of changes brought about by employed women.....	42
2.2.1 Researches conducted outside India.....	42
2.2.2 Researches conducted in India.....	44

	PAGE
2.3 Conceptual foundation of problem of employed women.....	50
2.3.1 Problems at home.....	50
2.3.2 Problems at work place.....	53
2.4 Empirical foundation of problems of employed women.....	55
2.4.1 Researches conducted outside India.....	55
2.4.2 Researches conducted in India.....	56
2.5 Brief resume of reviews and its relevance to the present investigation.....	61
3. METHOD OF PROCEDURE.....	64
3.1 Pilot study.....	65
3.1.1 Implication of pilot study.....	65
3.2 Population of the study.....	67
3.3 Operational definitions.....	69
3.4 Variables and their relationships.....	70
3.5 Research tool.....	74
3.5.1 Construction of the questionnaire.....	74
3.5.2 Validation of the questionnaire.....	76
3.5.3 Pretesting of questionnaire.....	77
3.6 Data collection.....	78
3.7 Analysis of data.....	78
3.7.1 Categorisation of variables.....	78
3.7.2 Statistics used for analysis of data.....	84
4 FINDINGS AND DISCUSSION.....	86
4.1 Description of the employed women of Jorhat, Assam.....	87
4.1.1 Personal characteristics of the respondents and their husbands.....	89

	PAGE
4.1.2 Family characteristics concerning both the respondents and their husbands.....	92
4.1.3 Personal and Demographic characteristics of respondents.....	96
4.2 Identification of the families having traditional and modern homemaking.....	98
4.2.1 Traditional and modern homemaking responsibilities in different areas of homemaking.....	99
4.2.2 Significant relationship between modernity in homemaking and personal and demographic characteristics of the respondents and their husbands.....	104
4.3 Use of equipment and Appliances in homemaking....	109
4.3.1 Possession and use of different equipment and appliances in selected areas of homemaking.....	110
4.3.2 Association between use of equipment and appliances in selected areas of homemaking and the modernity in homemaking.....	119
4.3.3 Association between the use of equipment and appliances in homemaking and the selected personal and demographic characteristics of the respondents.....	120
4.4 Reasons for not using modern equipment and appliances in homemaking	125
4.4.1 Respondents' reasons for not using modern equipment and appliances in homemaking.....	125
4.4.2 Variations in reasons of traditional and modern families for not using modern equipment and appliances.....	129
4.4.3 Variations in reasons for not using modern equipment and appliances in homemaking given by the respondents of different occupational class.....	134
4.5 Facilities available to employed women at home for better homemaking.....	139
4.5.1 Various facilities available to employed women of Jorhat.....	139

	PAGE
4.5.2 Association between the facilities available to employed women at home and modernity in homemaking.....	141
4.5.3 Association between the facilities available to employed women at home and the use of equipment and appliances in homemaking.....	142
4.5.4 Association between the facilities available to employed women at home and the personal and demographic characteristics of employed women....	143
4.6 Attitude of employed women towards working women.....	147
4.6.1 Attitude of respondents towards working women....	148
4.6.2 Distribution of employed women in three categories at attitude.....	152
4.6.3 Extent of favourableness of attitude towards working women according to selected variables....	154
4.6.4 Association between the attitude of respondents towards working women and modernity in home making, use of equipment and availability of facilities.....	158
4.6.5 Relationship between the attitude of employed women and the selected personal and demographic characteristics of respondents and their husbands.....	159
4.7 Problems faced by the employed women.....	162
4.7.1 Frequency and percentage distribution of respondents indicating their problems under different areas.....	163
4.7.2 Differences between moderately modern and traditional families in their problems.....	176
4.7.3 Association between problems of employed women and use of equipment, facilities available and attitude of employed women towards working women.....	177
4.7.4 Association between problems of employed women and their personal and demographic characteristics.....	179

	PAGE
4.8 Guidelines for development of a curriculum in Home Science Extension Education to take measures concerning the problems of employed women.....	183
4.8.1 Major findings and suggested curricula on modernity in homemaking in employed women's families of Jorhat.....	186
4.8.2 Major findings and suggested curricula on use of equipment and appliances in different areas of employed women and reasons for not using some modern equipment.....	190
4.8.3 Major findings and suggested curricula on facilities available to employed women at home for better homemaking.....	195
4.8.4 Major findings and suggested curricula on attitude of the employed women of Jorhat towards working women.....	200
4.8.5 Major findings and suggested curricula on problems of employed women of Jorhat.....	203
5. SUMMARY AND CONCLUSION.....	211
BIBLIOGRAPHY.....	222
APPENDICES.....	230
1. Research tool in English.....	230
2. Research tool in Assamese.....	254
3. Expert's certificate for Assamese translation of the questionnaire.....	286
4. Letter from employment exchange.....	287
5. Occupational Distribution of female workers in urban area.....	288
6. Correlation coefficient between the selected attributes of employed women and modernity in homemaking.....	289

	PAGE
7. Chi-square values between equipment used in different areas of homemaking and modernity in homemaking.....	290
8. Chi-square values between equipment used in different areas of homemaking and personal and demographic characteristics of respondents.....	291
9. Distribution of respondents using equipment and appliances in homemaking according to significant variables.....	292
10. Chi-square values between facilities available at home and the modernity in homemaking.....	301
11. Chi-square values between Attitude of employed women towards working women and modernity in homemaking, use of equipment and availability of facilities at home.....	301
12. Chi-square values between overall problems faced and use of equipment in homemaking.....	301
13. Frequency and percentage distribution of respondents having various facilities at home according to significant variables.....	302
14. Chi-square values between the facilities available at home and the personal characteristics of the employed women.....	305
15. Correlation coefficient between attitude of respondents and their Non-significant characteristics.....	306
16. Extent of differences in problems faced in different areas between the families having traditional and moderately modern homemaking.....	307
17. Chi-square values between problems of employed women and the personal and demographic characteristics.....	308
18. Distribution of respondents facing problems according to significant variables.....	309
