

LIST OF FIGURES

Figure No.	Title	Page No.
1	Percentage Distribution of selected Teachers according to their Age	99
2	Percentage Distribution of selected Teachers according to their Status of Job	100
3	Percentage Distribution of selected Teachers according to their Area of Specialization	100
4	Percentage Distribution of selected Teachers according to their Teaching Experience	100
5	Percentage Distribution of selected Teachers according to their Computer and Internet Usage	101
6	Percentage Distribution of selected Teachers according to their computer and internet related Competencies	102
7	Percentage Distribution of selected Teachers according to their Perception towards technology	103
8	Percentage Distribution of selected Teachers according to their Knowledge regarding e-content	103
9	Percentage Distribution of selected Teachers according to their Interest in e-content for teaching	104
10	Percentage Distribution of selected Teachers according to their Designation	106
11	Percentage Distribution of selected Teachers according to their Gender	106
12	Percentage Distribution of selected Teachers according to their Educational Qualification	106
13	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-Content for teaching	108
14	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-Content for teaching in relation to Age	117
15	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-Content for teaching in relation to job Status	117
16	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-Content for teaching in relation to Area of specialization	117

17	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-content for teaching in relation to Teaching Experience	118
18	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-content for teaching in relation to Computer and Internet Usage	118
19	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-content for teaching in relation to computer and internet related Technical competency	118
20	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-content for teaching in relation to perception towards technology	119
21	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-content for teaching in relation Knowledge regarding e-content	119
22	Percentage Distribution of selected Teachers according to their overall readiness regarding their usage of e-Content for teaching in relation to Interest in e-content for teaching	119
23	Percentage Distribution of selected Teachers according to aspect wise overall readiness regarding the usage of e-content for teaching	126
24	Percentage Distribution of the teachers according to their readiness regarding usage of e-content for teaching in relation to “self” and “department” with reference to Environment aspect and Technology aspect	127
25	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Age” variable with reference to the Environmental Aspect	130
26	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Job Status” variable with reference to the Environmental Aspect	130
27	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Area of Specialization” variable with reference to the Environmental Aspect	131
28	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Teaching Experience” variable with reference to the Environmental Aspect	131
29	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Computer and internet Usage” variable with reference to the Environmental Aspect	131

30	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Computer and internet related technical competency” variable with reference to the Environmental Aspect	132
31	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Perception towards Technology” variable with reference to the Environmental Aspect	132
32	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Knowledge regarding e-content” variable with reference to the Environmental Aspect	132
33	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Interest in e-content for Teaching” variable with reference to the Environmental Aspect	133
34	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Age” variable with reference to the Environmental Aspect	140
35	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Job Status” variable with reference to the Environmental Aspect	141
36	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Area of Specialization” variable with reference to the Environmental Aspect	141
37	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Teaching Experience” variable with reference to the Environmental Aspect	141
38	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Computer and internet Usage” variable with reference to the Environmental Aspect	142
39	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Computer and internet related technical competency” variable with reference to the Environmental Aspect	142

40	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Perception towards Technology” variable with reference to the Environmental Aspect	142
41	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Knowledge regarding e-content” variable with reference to the Environmental Aspect	143
42	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Interest in e-content for Teaching” variable with reference to the Environmental Aspect	143
43	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Age” variable with reference to the Financial Aspect	150
44	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Job Status” variable with reference to the Financial Aspect	151
45	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Area of Specialization” variable with reference to the Financial Aspect	151
46	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Teaching Experience” variable with reference to the Financial Aspect	151
47	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Computer and internet Usage” variable with reference to the Financial Aspect	152
48	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Computer and internet related technical competency” variable with reference to the Financial Aspect	152
49	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Perception towards Technology” variable with reference to the Financial Aspect	152
50	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Knowledge regarding e-content” variable with reference to the Financial Aspect	153

51	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Interest in e-content for Teaching” variable with reference to the Financial Aspect	153
52	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Age” variable with reference to the Technology Aspect	160
53	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Job Status” variable with reference to the Technology Aspect	161
54	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Area of Specialization” variable with reference to the Technology Aspect	161
55	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Teaching Experience” variable with reference to the Technology Aspect	161
56	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Computer and internet Usage” variable with reference to the Technology Aspect	162
57	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Computer and internet related technical competency” variable with reference to the Technology Aspect	162
58	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Perception towards Technology” variable with reference to the Technology Aspect	162
59	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Knowledge regarding e-content” variable with reference to the Technology Aspect	163
60	Percentage Distribution of selected Teachers according to their “self” readiness for usage of e-content for teaching in relation to the “Interest in e-content for Teaching” variable with reference to the Technology Aspect	163
61	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Age” variable with reference to the Technology Aspect	170

62	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Job Status” variable with reference to the Technology Aspect	171
63	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Area of Specialization” variable with reference to the Technology Aspect	171
64	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Teaching Experience” variable with reference to the Technology Aspect	171
65	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Computer and internet Usage” variable with reference to the Technology Aspect	172
66	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Computer and internet related technical competency” variable with reference to the Technology Aspect	172
67	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Perception towards Technology” variable with reference to the Technology Aspect	172
68	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Knowledge regarding e-content” variable with reference to the Technology Aspect	173
69	Percentage Distribution of selected Teachers according to their “Department” readiness for usage of e-content for teaching in relation to the “Interest in e-content for Teaching” variable with reference to the Technology Aspect	173
70	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Age” variable with reference to the Course Content Aspect	180
71	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Job Status” variable with reference to the Course Content Aspect	181
72	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Area of Specialization” variable with reference to the Course Content Aspect	181

73	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Teaching Experience” variable with reference to the Course Content Aspect	181
74	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Computer and internet Usage” variable with reference to the Course Content Aspect	182
75	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Computer and internet related technical competency” variable with reference to the Course Content Aspect	182
76	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Perception towards Technology” variable with reference to the Course Content Aspect	182
77	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Knowledge regarding e-content” variable with reference to the Course Content Aspect	183
78	Percentage Distribution of selected Teachers according to their readiness for usage of e-content for teaching in relation to the “Interest in e-content for Teaching” variable with reference to the Course Content Aspect	183
