<u>PREFACE</u>	ii
<u>LIST OF TABLES</u>	xiii
<u>LIST OF GRAPHS</u>	xix
<u>CHAPTER I</u>	
<u>INTRODUCTORY - REVIEW OF LITERATURE AND STATEMENT OF PROBLEM</u>	<u>1-51</u>
Review of Literature	3
Summary of Approaches of Past Studies	44
Statement of Problem	46
Approach to the Study	46
Objective of Study	47
Area for the Study	49
Outline of the Study	49
<u>CHAPTER II</u>	
<u>RURAL ELECTRIFICATION POLICY AND WORKING OF THE M.S.E.B.</u>	<u>52-81</u>
Policy guidelines on rural electrification	54
State Electricity Boards and Their Finances	61
Financial Position of MSEB	62
Financial Position in Recent Period	66
Rural Electrification by MSEB	67
Organisational Set-up of MSEB	69
Description of Poona Rural Division	73
Concept of Electrified Place	78

	<u>Page</u>
<u>CHAPTER III SURVEY METHODOLOGY</u>	<u>82-149</u>
Description of the sample design	82
Alteration in the selected villages	88
Sampling at Second Stage	95
Characteristics of Different Modes of Irrigation	96
Sample of electric Motors	98
Selection of Other Modes of Irrigation	107
Conditions Stipulated by MSEB for Supply of Power	107
Procedure for Selection of Other Modes of Irrigation	110
Method of Collection of Data	113
Coverage of wells in the Selected Villages	115
Field Survey	119
<u>Annexure-3A</u> : Schedule for Cultivators using Sample Electric Motors (Specimen)	120
<u>Annexure-3B</u> : Schedule for Cultivators using Sample Oil Engines (Specimen)	131
<u>Annexure-3C</u> : <i>Schedule for cultivators using Sample Bullock Lifts</i>	141
<u>CHAPTER IV COST OF IRRIGATION BY ELECTRIC MOTOR</u>	<u>150-217</u>
Rainfall during the period of reference	152
Irrigated Crops in the Region	152
Sample of Electric Motors	153
Initial Total Investment	159
Depreciation Cost	171
Interest Rate Charges	174
Source of Finance	174
The Variable Costs	188

	<u>Page</u>
Components of Operation & Maintenance	
Costs	190
Tariff Structure	195
Maintenance Cost	198
Total Costs	206
Cost Functions	210
<u>Annexure-4A</u> : Taluka-wise normal Rainfall and Rainfall during 1965-66	212
<u>Annexure-4B</u> : List of Crops Irrigated in the Region/Sample Villages and by the Sample Modes of Lift	213
<u>Annexure-4C</u> : Cost Functions	214
<u>CHAPTER V</u> <u>COST OF IRRIGATION BY OIL ENGINES</u>	<u>218-270</u>
Components of Costs	218
Distinctive Features of Oil Engines	219
Fixed Cost : Limitations of Data	220
Initial Investment in Oil Engines	221
Method for Charging Depreciation	224
Use of Pipes by Engines in the Sample	227
Assumptions underlying Computation of Depreciation Charges	229
Computation of Interest Costs	240
Sources of Finance of Oil Engines	240
Variable Costs	245
Operational Cost : Types of Inputs used	245
<u>IRRIGATION OIL</u>	246
Maintenance Cost	250
Impact of use of Different Types of Lubricating Oils and Fuels on Maintenance Cost	259

	<u>Page</u>
Age of the Engine and Its maintenance cost	261
Hours of Operation of Engine During the Year	262
Variable Costs at Different Levels of Operation	264
Total Costs of Irrigation	266
Cost Functions of Oil Engines	267
<u>Annexure-5A</u> : Cost Functions	269
<u>CHAPTER VI</u> <u>COST OF IRRIGATION BY BULLOCK</u> <u>OPERATED LIFT</u>	<u>271-319</u>
Nature of Costs Data	271
Cost of Bullock Labour	272
Components of Costs	276
Computation of Fixed costs	278
Computation of Variable Costs	279
Level of Operation of Bullock-Lift	284
Sample of Bullock-Operated Lifts	286
Costs of Irrigation by Bullock Lift	313
Cost Function	316
<u>Annexure-6A</u> : Cost Function	318
<u>CHAPTER VII</u> <u>COMPARISON OF COSTS OF IRRIGATION</u> <u>BY DIFFERENT MODES</u>	<u>320-345</u>
Standard for Comparison	321
Methodology for Conversion	322
Underlying Assumptions	327
Model for Comparison of Hours of Operation	329

	<u>Page</u>
Comparison Costs of Irrigation by Different Modes	331
Up-dating the Costs of Irrigation	335
Source of Data	336
Initial Investment Costs	337
Operation Costs	340
<u>Annexure-7A</u> : Details of Computation of 'M _{jk} ', 'R _{jk} ', 'W _k ' and 'R _j '	344

<u>CHAPTER VIII</u>	<u>FACTORS INFLUENCING THE USE OF ELECTRICITY</u>	<u>346-439</u>
	<u>FOR IRRIGATIONAL PURPOSES</u>	
	Factors under Consideration	348
	Ownership pattern of Modes of Irrigation of Cultivators covered by the Study	349
	Comparison of Socio-Economic Indicators of Cultivators Owning Mechanised Type of Lift and Not Owning Mechanised Type of Lift	354
	Influence of Ownership Right in the Well and the Area Under the Command of Well on the Type of Mode Employed	362
	Method Adopted for Studying the Influence of Second Set of Factors	369
	The analysis of Influence of Second set of Joint Ownership of Mechanised Modes. factors	371 379
	Shift from Oil Engine to Electric Motor	390
	Farmers' Concept of Relative Economies of Electric Motor	399
	Village-wise Installation of Engines with Respect to Date of Electrification of Village	402

Page

Analysis of Time-Lag in connection of Electricity for the Farmers using Motors	407
Time-Lag in connection of Pumpsets after completion of Scheme	428
<u>CHAPTER IX SUMMARY AND CONCLUSION</u>	<u>440-463</u>
<u>BIBLIOGRAPHY</u>	<u>464-470</u>
