

Table Index

Table no		Page no.
1.1	List of plants used for biocontrol studies	34
2.1	concentrations (in $\mu\text{g/l}$) of the vitamins used	48
3.1	Percentage inhibition of <i>Lasiodiplodia theobromae</i> at different concentration of methanolic leaf extracts	62
3.2	Percentage inhibition of <i>Pestalotiopsis disseminata</i> at different concentration of methanolic leaf extracts	63
3.3	Percentage inhibition of <i>Pestalotiopsis maculans</i> at different concentration of methanolic leaf extracts	64
3.4	Percentage inhibition of <i>Phomopsis tectonae</i> at different concentration of methanolic leaf extracts	65
3.5	Effect of different media on four foliicolous fungi	68
3.6	Effect of different pH on four foliicolous fungi	73
3.7	Effect of different temperatures on four foliicolous fungi	74
3.8	Effect on different carbon sources on four foliicolous fungi	78
3.9	Effect of different Nitrogen compounds on 4 foliicolous fungi	83
3.10(a)	Effect of different B -vitamins on four foliicolous fungi	99
3.10(b)	Effect of different vitamins on four foliicolous fungi	100
3.11	Effect of all vitamins on four foliicolous fungi	102
3.12	Utilization of sugars by four Follicolous fungi	103
